Product Identification: CLT-120

Industrial Water Treatment Compound

Closed Recirculating Water Loop Corrosion & Scale Inhibitor

Description

CLT-120 is a concentrated liquid borate/nitrite, scale/corrosion inhibitor and dispersant. CLT-120 is formulated to provide complete protection of closed-loop systems either during the initial pretreatment phase or during normal operation.

Advantages

CLT-120 is an effective product to provide corrosion protection to ferrous and yellow-metal alloys. The corrosion inhibitors in CLT-120 will maintain effective corrosion protection and mitigate the formation of scale and deposits when used as directed. In high hardness waters, the polymeric dispersants and sequestrants contained in CLT-120 will prevent the formation of troublesome carbonate and phosphate scales.

Directions

For the pretreatment of new systems, add 5 gallons of CLT-120 per 1000 gallons of system volume (1200 ppm nitrite by test). Recirculate the system for 48 to 72 hours then bleed the system to city water quality to remove oil/grease, mill scale, and dirt/debris. For cleaned systems, add 2.5 gallons of CLT-120 per 1000 gallons of system volume (600 ppm nitrite by test). Verify test components on a monthly basis. Systems with leaks may require more frequent testing. All systems may require the addition of a suitable biocide to prevent microbiological slime growth in the system.

Caution

This product contains potassium hydroxide. This product can be corrosive to the skin and eyes. Avoid contact with the skin and eyes. If eye contact occurs, flush with water for 15 minutes. Get prompt medical attention if irritation occurs. If skin contact occurs, remove contaminated clothing. Flush with clear water. If irritation occurs, consult a physician. Do not take internally. If swallowed, do not induce vomiting. Drink large volumes of water and seek medical attention immediately. **KEEP OUT OF REACH OF CHILDREN.**

Container Disposal: Triple rinse container and offer for recycling or disposal according to local regulations.

HMIS Rating: Health = 2, Flammability = 0, Reactivity = 1, PPE = C

Selecor 45

Use 1-2% of total water volume

Use under direction of a trained water treatment service person.

Warning: Eye and skin irritant.

First Aid

EYES – Immediately flush with water. If irritation persists, see a doctor.

SKIN – Wash with water. **INGESTION** – Drink water and see a doctor.

INHALATION – If breathing problems develops, move person to fresh air.
