EXAMPLE

Alderon Pump Tracker Elapsed Time Meter (120V Piggyback)

The Alderon Pump Tracker Elapsed Time Meter is the only field installable elapsed time meter. The Pump Tracker installs using a piggyback plug setup where the pump plugs into the Pump Tracker, the Pump Tracker plugs into the float, and the float plugs into the power supply. Adding an ETM to an existing system would normally require modifying or replacing a control panel. The Pump Tracker allows you to add these features anywhere in-line, eliminating the modifications of an existing control panel.

In Stock

\$89.50 MSRP: \$105.00

ITEM #:8060

Manufacturer:Alderon

EXAMPLE OF Pump TIME meter
