FINISH REQUIREMENTS:

- No paint substitutions
- Any diffusers, vents, plates are to be painted to match surface they are on.
- Carpet: The work includes the installation of carpet tile; carpet contractor to prepare floor as required; ensure levelness and smoothness. Comply with general recommendations and information contained in Carpet Specifications Handbook published by the Carpet and Rug Institute. Install carpet in compliance with manufacturer's instructions and recommendations. Refer to Carpet Specifications for secondary backing and cushion information. Installer to provide seaming diagram and direction of carpet.
 - Repair any floor cracks, or depressions using leveling compound on floor slab. Sand/grind ridges and high spots level. Clean slab surfaces and vacuum immediately before installation.
 - Align lines of carpet as woven using no fill strips less than 12" wide, laying all carpet in the same direction unless specified otherwise by the Designer.
 - Seal and cut the edges with manufacturers' recommended seam sealer to prevent delamination and fiber loss. Provide resilient edge guards, reducers and transition strips at exposed edges or where two dissimilar carpet and flooring materials meet. Bind all cut edges not protected by edge guards

4.0. Painting: All paint to be VOC-free Product, unless otherwise noted. The work includes, but is not limited to, the painting and finishing of all exposed surfaces at new construction. Refer to Finish Plans for type and location.

- Provide primers and other undercoat paint produced by the same manufacturer as finish coat. Apply per manufacturer's instructions and recommendations.
- At Gypsum Wallboard: Primer: Latex Wall Primer; Finish: Latex Eggshell - two coats.
- At Metals: Primer Filler: Alkyd Metal Primer; Finish: Alkyd Semi-Gloss Enamel - two coats.
- At Wood (Painted): Primer: Oil base; Finish: Semi-Gloss Acrylic Latex.
- Paint surfaces in compliance with manufacturers' instructions. Properly prepare and clean all surfaces in accordance with finish manufacturers' requirements prior to commencing painting.
- Wallcovering: Vinyl wall covering to be installed in strict accordance with manufacturer's recommendations. All walls to be smooth and blemish free before installation. Adhesives: Provide manufacturers' recommended Low VOC adhesive, primer, and sealer. Prepare and utilize adhesives per manufacturer's instructions and recommendations.
- LVT & Vinyl Enhanced Tile Flooring: Install as recommended by manufacturer using manufacturers' own Low VOC adhesives and accessories.
- Run all flooring under millwork.
- Window Shades: Fabricator to determine best width to achieve no seams. Provide shades at each individual window.
- Window Film on interior glass: Refer to Architect's drawings for film requirements.
