

---

## SPECIAL CONDITIONS

1. **SCOPE**

The intent of this section is to describe and clarify special conditions which relate to this project. Special Conditions which differ (or are in conflict) with the Supplemental Conditions - or the policies of other agencies (public or private) which have jurisdiction by law - shall be brought immediately to the attention of the Engineer.

2. **TOOLS, MANPOWER, AND EQUIPMENT**

If - at any time before the commencement or during the progress of the work - the tools, manpower, or equipment appears to the Engineer to be insufficient, inefficient, or inappropriate to secure the quality of work required (or the proper rate of progress), the Engineer may order the Contractor to increase the efficiency, to improve the character, to increase the number, or to substitute new tools, plant, or equipment (as the case may be) and the Contractor must conform to such order.

Before executing any subcontract, the successful Bidder as Contractor shall submit the name of any proposed subcontractor for prior approval.

3. **PERMITS**

The Engineer has endeavored to obtain all permits (unless indicated elsewhere), with the exception of Local Building Permits and Highway Work Permits. Contractor shall promptly apply for all permits which are required for completion of the work. Contractor shall complete all application forms, pay all fees or bonds, and provide documentation as requested by the permit agency.

4. **APPROVABLE MANUFACTURERS OR SUPPLIERS**

Where "Approved Manufacturers or Suppliers" are listed, or where a particular manufacturer's products are listed, the reference shall be taken to include the qualification of "or equal as approved by the Engineer." If Contractor proposes "or-equal" items, the burden for demonstrating this equivalency shall rest on the Contractor. The Engineer shall retain the right of approval over proposed "or-Equal" items and shall in making an evaluation and determination consider the durability, reliability, life-cycle costs, ease of repair, technical service, and other like factors in addition to the proposed substitutes attainment of design standards for the new product. The only allowable equipment is such that is manufactured in the United States.

5. **PERFORMANCE WARRANTY**

The Contractor shall furnish (at the Contractor's expense) a one (1) year Warranty, with respect to all materials, equipment, and construction, equal to 25 percent of the contract price. This Warranty shall be provided upon Substantial Completion of the work, regardless of earlier occupancy or use of parts of the work. All Warranty issues identified by the Engineer in writing during the one (1) year Warranty period shall be resolved by the Contractor to the Owner's satisfaction. If authorized by the Engineer, the Owner may require the Contractor to furnish (at the Contractor's expense) a special performance Warranty or other surety over and above the one (1) year Warranty, with respect to materials or equipment substitutions. If Contractor fails to act to resolve Warranty issues within 30 days of written notice, or such lesser period as may be dictated by the Owner's needs to use facilities subject to the Warranty, the Contractor will be considered to be in default of his Warranty obligations. In the event of such default, Owner may make other arrangements to remedy the Warranty problem and claim all direct and incidental costs against Contractor's Warranty Bond.

6. **MAINTENANCE OBLIGATION**

If, at any time during the performance of the Contract, defects in the work shall develop or be discovered, the Contractor shall promptly repair or replace the defective workmanship or materials even though such workmanship or materials have already passed inspection. The Contractor will be

---

required to perform maintenance in all areas of finished road surfaces where defects and/or settlement has occurred. These areas shall be repaired promptly and under the direction of the Engineer with the materials and procedures stated in the Specifications section that applies.

Contractor shall furnish and maintain fuel, electric, and consumable supplies (such as chemicals) from the period of initial start-up of systems until Substantial Completion for the Work and acceptance by the owner.

The Contractor shall maintain all areas of work and storage in a neat and orderly condition at all times.

The Contractor - at the end of each day - will be required to remove (and dispose of properly) scattered piles of debris, surplus materials, construction equipment, or any obstructions deemed by the Engineer (or any other agency having Jurisdiction) which create a health or safety hazard to the public.

The Contractor shall keep all existing facilities - such as storm drains, culverts, catch basins, ditches, and all public and private utilities in the area of construction - clean and operational during construction. All excavations shall be backfilled to grade at the end of each day, unless the Engineer approves the use of fencing and barricades. At the end of each day, all areas disturbed (which are used for public or private, pedestrian or vehicular traffic) shall be made accessible for its intended use, with proper signs and safety devices installed for the protection of the public. As work progresses in the various areas of construction, all traffic areas shall be kept broom-cleaned, with a dust suppressor used as directed by the Engineer. Prior to final restoration, all areas disturbed during construction shall be maintained. Clean-up of areas requested by the Engineer shall be done promptly and to the satisfaction of the Engineer.

**7. LIQUIDATED DAMAGES**

The OWNER and CONTRACTOR recognize that time is of the essence of this Agreement and that the OWNER will suffer financial loss if the work is not completed within the times specified In the Contract Agreement plus any extensions thereof allowed in accordance with Article 11, "Change of Contract Time", of the General Conditions. They also recognize the delays, expense, and difficulties involved in proving legal arbitration proceeding the actual loss suffered by the OWNER if the work is not completed on time. Accordingly, instead of requiring any such proof, OWNER and CONTRACTOR agree that as liquidated damages for delay (but not as penalty), CONTRACTOR shall pay OWNER, for each day that expires after the time specified in the Contract Standard Form of Agreement, the following Stipulated Penalties: (see Standard Agreement)

**8. CONSTRUCTION DOCUMENTATION**

A. "As-Built" Drawings: The Contractor shall note, on a set of the Contract Drawings kept especially for this purpose, the final locations and details of construction, the location of underground utilities, and obstructions, and any other pertinent information necessary for preparation of "As-Built" drawings.

B. Photographs: The Contractor shall furnish preconstruction photographs (or videotapes), to show the conditions existing prior to construction. Photographs shall be legible, complete, and marked with the direction of view, station, and date. The Contractor shall furnish Progress photographs shall be taken monthly and as directed by the Engineer. Original prints and negatives for Preconstruction and Progress Photographs shall be furnished to the Engineer and shall become part of the record to be retained by the Owner upon completion of the project.

---

9. **COMMUNICATIONS**

A. **Written Communications:** All notices, demands, requests, instructions, approvals, proposals, and claims must be in writing. Any notice to or demand shall be sufficiently given if delivered at address stated on the signature page of the Agreement. Any such notice shall be deemed to have been given as of the time of actual delivery. All urgent matters should be sent by Overnight Mail or by facsimile with an original by Registered Mail.

B. **Project Meetings:** Contractor shall arrange meetings, schedule attendance of necessary parties, and record and distribute minutes. Meetings shall include, at a minimum, Pre-construction Conference, Bi-Weekly Progress Meetings (as needed), Substantial Completion Meeting, and Final Inspection. At routine Progress Meetings, the Contractor shall present: a review of work progress since the previous meeting, conflicts and resolutions for problems, scheduling issues or delays and their resolution, potential changes orders or delays, and other business as directed by the Engineer in advance of the meeting.

10. **PAYMENT TO CONTRACTOR**

Progress payments will be made to the Contractor by the Owner, based on a monthly work performance period ending on the last day of the month. The estimate for in-place work performed during the preceding period must be duly certified and approved by the Owner. The Contractor will be directed in writing as to the schedule on which payments must be submitted.

At the sole discretion of the Owner, and in consideration of the general progress of the work, partial payments may be made for materials delivered and stored on the project site. Payments will be only in the amount of the raw materials costs, as documented by paid receipts, and may not exceed any scheduled value of the material.

All work paid for shall thereupon become the sole property of the Owner, but this provision shall not be construed as relieving the Contractor from the sole responsibility for the care and protection of the work for which payments have been made or the restoration of any damaged work, or as a waiver of the right of the owner to require fulfillment of all terms of the Contract.

11. **SCHEDULING AND WORK HOURS**

Unless special permission is given by the Engineer, all work shall be done between 7:00 A.M. and 5:00 P.M., Monday through Friday. Contractor shall prepare, coordinate, and maintain the contract completion schedule. Where requested by the Engineer due to the complexity of the project, the Schedule presented shall be a "bar-type" schedule which shows major tasks, completion dates, and potential conflicts. Contractor shall revise Construction Progress Schedule monthly to reflect changes in progress of the work. The Contractor shall be solely responsible for obtaining any dispensation required by the Department of Labor for overtime, night, holiday, or weekend work, as well as for payment of wage supplements required as a result.

12. **SUBMITTALS**

A. **Shop Drawings:** CONTRACTOR shall review Shop Drawings and product data prior to submittal, verify field dimensions and suitability, document conformance with the Plans, and schedule submittals so as to not delay the work. Contractor shall review and note his approval on each submittal, prior to its delivery to the Engineer. Each submittal shall be numbered, identify the manufacturer, list model or part numbers, provide weights and dimensions, and include any other pertinent data required by Engineer for review. Upon approval, Contractor shall distribute approved submittals to the Contractor's field office, and to Subcontractors, suppliers, fabricators and other Contractor's affected. Contractor shall allow up to 14 days review by the Engineer, and should specifically request expedited review if needed. Submit at least three (3) copies for review.

---

B. Test Results: Results of concrete, soil, and other materials testing (where required) shall be distributed to the Engineer, the Engineer's Field Office, and affected Subcontractor's immediately upon receipt of the data. Contractor shall review test results and note any results which do not meet the project requirements.

C. Operation and Maintenance Data: Contractor shall compile manuals, installation instructions/packing documents, and copies of purchase orders for all components installed and bind these documents into an Owner's O&M Manual. Manual shall be indexed and tabbed and suitable for use by the Owner and Operator. Submit Draft for Engineer's approval and three (3) final copies, Engineer will retain two copies.

**13. LAYOUT OF WORK**

The contractor shall perform all layout work necessary for the satisfactory execution of the construction for the contract as shown on the contract Drawings, and all costs in connection therewith shall be included in the Contract price(s). The contractor shall verify all dimensions on the drawings and shall be responsible for same.

All construction shall be installed to the lines and grades as shown on the Contract Plans. Any discrepancies, obstructions, or conflicts, which are encountered, shall be brought to the immediate attention of the Engineer in the field. All work shall be laid out a minimum of 200 feet in advance. All existing utilities and underground structures or facilities are to be located by the Contractor a minimum of fifteen hundred (1500) feet ahead of actual construction. Any abrupt changes in vertical or horizontal alignment, slope, or field conditions which differ substantially from the Contract Plans and Specifications shall be brought to the attention of the Engineer in writing.

The Contractor will be held responsible for the protection and safe-guarding of all control points and bench marks set by the Engineer for this Contract. Any replacement or re-establishment of control points or bench marks by the Engineer shall be at the expense of the Contractor for whom the bench mark was originally set.

**14. LIMIT OF WORK AREA**

Easements for the purpose of this Contract will be provided by the Owner. If the Contractor desires the temporary use, during construction, of lands to which the Owner has no rights, the Contractor shall secure written permission from the appropriate property owners and shall file a duplicate copy of such permission with the Engineer. Land shall not be used or occupied by the Contractor prior to the securing of permission. The Contractor shall at all times save harmless the Owner from actions by third parties, by reason of any acts or omissions by the Contractor.

Before final acceptance of the work - and as a prerequisite to the release of the final payment - the Contractor shall secure a written release - from the authorities or owners having jurisdiction over the lands (including easements) occupied by the Contractor - certifying to the satisfactory restoration of all pavements, other surfaces, and utility structures removed or safeguarded for the-work.

The Contractor shall confine all materials - and their storage and the operations of the Contractor's workmen - to the limits indicated by laws, ordinances, permits, directions of the Engineer, and as shown on the Plans. The Contractor will not unreasonably encumber the premises with such materials, but shall store them in orderly fashion, such that they will not interfere with the work under this Contract (or other contracts) or with the operation of the owner's facilities.

Should the Owner provide the land for materials, equipment, trailers, and automobiles, such items shall be stored in the areas designated on the Plans. The Contractor shall mark and place barriers to limit such storage areas.

---

15. **TEMPORARY FACILITIES**

A. **General:** The Contractor, shall provide temporary power, heating, telephone, and water service, and the sanitary facilities, for his operations throughout the construction period. At the completion of the work, or when the temporary services are no longer required, the temporary facilities shall be restored to their original conditions. All costs in connection with the temporary utilities - including, but not limited to, installation, utility company service charges, maintenance, relocation, and removal - shall be borne by the Contractor. Contractor shall furnish and maintain fuel, electric, and consumable supplies (such as chemicals) from the period of initial start-up of systems until Substantial Completion for the Work and acceptance by the owner.

B. **Specific Facilities Required:** Provide and maintain signage, traffic warning and control devices, and flagmen as required to provide safe working conditions, limit the risk of accidents, and meet the requirements of the appropriate authorities. Provide and maintain temporary sanitary toilet facilities conforming to state and local health and sanitation regulations, in sufficient number for use of Engineer's, Contractor's and Subcontractor's employees. Provide and maintain secure enclosed storage facilities or fencing for equipment and materials stored on site. Provide and maintain temporary lighting meeting code requirements and sufficient to enable Contractor to complete Work and Engineer to observe work as it is being performed. Provide and maintain temporary heat and construct temporary enclosures as necessary for proper completion of the work. Make arrangements and pay fuel costs, supervise, and maintain heating units. Construct and maintain temporary site roadways in snow free, ice free, driveable condition necessary to carry out construction operations.

C. **Housekeeping:** The Contractor shall keep the work and storage areas in a neat and orderly condition at all times. All scattered piles of material, trash, and debris shall be cleaned up daily and removed from the site weekly - or more frequently, as directed by Engineer. The Contractor shall store all potentially hazardous materials in a manner approved by the Engineer and keep all equipment and machinery in good working order. Any leaks, spills, or discharges created by or as a result of construction shall be promptly and thoroughly cleaned up, according to the rules and regulations prescribed by NYSDEC.

16. **PROJECT SIGNS**

The project sign, if required, shall be furnished and installed by Contractor. Each Contractor shall be responsible for providing their own traffic control signs and other safety signs as required.

17. **ENVIRONMENTAL CONTROLS**

Contractor shall: provide erosion control measures in place before commencing work on project site, maintain erosion control measure during construction, and remove erosion control measures upon establishment of permanent, surface stabilization. Contractor shall take such measures as may be required to prevent degradation of stream water quality during his work.

Site clearing will be limited to the area shown on the plans unless otherwise approved by the Engineer. Trees and brush may not be piled on the site, and shall be cut up and removed as clearing progresses.

Any excess soil and rock removed from the site shall be disposed at a point designated by the Owner. All brush and debris removed from the site shall be disposed as listed above or disposed at Contractor's expense in accordance with NYSDEC requirements.

Minimize air pollution by requiring use of properly operating combustion emission control devices on construction vehicles and equipment and encourage shutdown of motorized equipment not in use.

Do not burn trash on construction site. Maintain road and work areas so as to control dust through water spray or other means. Generally, no visible dust should result from traffic or operations.

---

Conduct operations to minimize disturbance to residents in vicinity of Work, and comply with applicable local ordinances. Assure that exhaust mufflers and silencer devices are in good working order. Maintain noise levels below 50 decibels at the property lines where homes or commercial property abut the construction site.

Route vehicles carrying rock, concrete or other material over such streets as will cause least annoyance to public and do not operate on public streets between hours of 6:00 p.m. and 7:00 a.m., or on Saturdays, Sundays or legal holidays unless approved by Owner.

Fuel storage area and fuel equipment shall be approved by Owner prior to installation. Submit containment provisions to Owner for approval. Report spills or leaks from fueling equipment or construction equipment to Owner and cleanup as required. Owner may require Contractor to remove damaged or leaking equipment from Project site. Do not change oil on equipment or store or dispose of fuels, solvents, lubricants, or other potentially hazardous materials on site.

**18. FAMILIARITY WITH SITE CONDITIONS**

The Contractor shall inspect the site and become acquainted with all the field conditions on which the work is dependent. The Contractor is advised that sheeting, shoring, bracing, and dewatering of excavation may be required for the safety of excavations where required by subsoil conditions. No extra costs will be allowed by this work. The Contractor acknowledges satisfaction as to the nature and location of the work; the general and local conditions - particularly those bearing upon transportation, disposal, handling and storage of materials; availability of labor, water, electric power, and roads; the uncertainties of weather, ground water table, or similar physical conditions at the site; the conformation and condition of the ground; the character, quality, and quantity of surface and subsurface materials to be encountered; the character of equipment and facilities needed prior to and during the prosecution of the work; and -all other matters which can in any way affect the work or the cost thereof under this Contract. Any failure by the contractor in becoming acquainted with all the available information concerning these conditions will not relieve him of the responsibility for estimating properly the difficulty or cost of successfully performing the work.

**19. TESTING LABORATORY**

Contractor shall employ testing labs as required in the Specifications. Additional testing shall also be conducted (at the Contractors expense) when directed by the Engineer, to verify the conformance of the work with the specifications.

**20. TEMPORARY SUSPENSION OF WORK DUE TO WEATHER**

All work to be performed under the Contract shall be completed within the time stated in the Agreement or within such extended time for completion as may be granted by Change Order. If, during the progress of the work, it should become necessary because of the lateness of the season, to stop the work, the Contractor shall open proper drainage ditches, erect temporary structures, install temporary materials, and winterize the project so that there will be a minimum of interference with traffic or deterioration of the work already performed. Temporary materials - such as bituminous asphalt, cold mix, and calcium chloride - shall be installed and maintained throughout the Winter. Temporary materials shall be graded and compacted to keep the Contract in First Class condition for snow plows and traffic. The Contractor shall take every precaution to prevent any damage or unreasonable deterioration of the work during the time the project is shut down. Unless there are exceptions specifically approved by the Engineer, seasonal limitations for material installations shall be as specified in the NYSDOT Standard Specifications. All materials, labor, and equipment necessary to winterize the project shall be the responsibility of the Contractor. No payment will be made for any temporary work. The cost anticipated shall be incorporated into the bid items of the Bid Proposal.

---

21. **MATERIAL, CONTROL, AND CERTIFICATION**

A. Certifications: Material certifications from manufacturers and/or suppliers shall be supplied for each product cited in the appropriate Section of the Specifications, or as requested by the Engineer prior to installation. Additional testing, certifications, or performance guarantees may be required on material or product substitutions anticipated for use by the Contractor. All additional costs associated with any substitutions shall be borne by the Contractor (as stated in the General Conditions, Article 7.05).

B. Controls: Unless otherwise specified, all materials shall be new and of first quality. The source of supply of each of the materials shall be approved by the Engineer before delivery is started. Representative preliminary samples (of the character and quality specified) shall be submitted by the Contractor or producer for examination, -and tests shall be conducted in accordance with A.S.T.M. or other generally-recognized standards which regulate the particular industry or product. Only materials so tested and found to conform to the requirements of these Specifications shall be used in the work. All materials proposed for such incorporation may be inspected or tested at any time during their preparation or use. If, after trial, it is found that some approved sources of supply do not provide a uniform, acceptable product, the Contractor shall furnish the acceptable material from other approved sources. No material which, after approval, has in any way become unfit for use shall be used in the work, and stored material - even though approved prior to being stored - shall be inspected before use in the work and shall meet the requirements of the Specifications at the time of such use.

22. **PROJECT CLOSE-OUT.**

A. Prerequisites

The contractor shall comply with all the General Conditions and complete the following before requesting a final inspection and Certificate of Substantial Completion:

1. Submit executed warranties, workmanship bonds, maintenance agreements, Inspection certificates, and similar required documentation for specific units of work enabling Owner's unrestricted occupancy and use.
2. Submit record documentation, maintenance manuals, tools, spare parts, keys, and similar operational Items.
3. Complete instruction of owner's operating personnel and start-up of systems.
4. Complete final cleaning and remove temporary facilities and tools.
5. Submit executed close-out documents, including: Release of Liens, Surety's Release, Warranty Bonds (where required in the Supplemental Conditions or as a result of the conditional acceptance of work or materials), written Release of Claims for subcontractors or suppliers (when required by the Engineer).
6. Obtain approvals including Occupancy Permit, Electrical Underwriters Certificate, releases and approvals for work done in easements, and such other approvals as may be required to allow full use by the Owner of the completed works unencumbered by Liens or Claims resulting from the Work.

B. Record Documents

The Contractor shall furnish the following:

1. The Contractor shall note, on a set of contract drawings kept especially for this purpose, the final locations and details of construction, the location of underground utilities and obstructions, and any other pertinent information necessary for preparation of "As-Built" drawings.
2. Operation and Maintenance Manuals - The Contractor shall request from the -supplier/manufacturer a minimum of three (3) copies of such documents, to be provided to the Engineer for each piece of equipment and system installed.

- 
3. Installation Instructions and Catalog Cuts - The contractor shall provide the Owner with one (1) copy of all installation instructions received for items such as light fixtures, door hardware, etc.
  4. Equipment Start-up - The Contractor shall provide, as part of the Contract, a qualified Manufacturer's Representative to: Inspect the installation, Service the equipment (as required), Adjust and calibrate the equipment (as necessary), Instruct the owner's Representative in the operation and maintenance of the equipment, and provide a written report and certification to the Contractor and the Engineer, for each piece of equipment or system in the Contract.

C. FINAL CLEANING

At the time of Project Close-out, the Contractor shall clean (or re-clean) the work to the condition expected from a normal, well maintained facility, including: Remove non-permanent protection and labels, Polish glass, Clean exposed finishes, Touch-up minor finish damage, Clean or replace mechanical system filters, Remove debris, Broom-clean unoccupied spaces, Clean light fixtures and replace burned-out lamps, Sweep and wash paved areas, Clean yard and grounds.

23. DRAWINGS AND SPECIFICATIONS - DEFINITIONS AND PRECEDENCE

A. GENERAL

The intent of the Plans and Specifications is that the Contractor shall furnish all labor, materials, tools, equipment, and transportation necessary for the proper execution of the work, in accordance with the Contract Documents. It is understood, that the Contractor is familiar with construction projects of this type and size, and that generally-accepted construction practices will be applied in order to complete the project in an acceptable manner. All incidental work, whether or not it is shown in the Plans or stated in the specifications, is expected to be, carried out in order to achieve the desired result - which is a complete facility, ready for use, occupancy, or operation by the Owner.

B. DEFINITION AND PRECEDENCE

1. In case of a conflict between the Plans and the Specifications, the Specifications shall govern.
2. Dimensions on the Drawings shall govern over scaled dimensions.
3. Detail Drawings shall govern over general Drawings.
4. General Notes on the Plans apply to all Contract areas.
5. Special Notes on a plan apply to a specific Drawing or condition of the Plans.
6. The Standard General Conditions of the Contract set forth the principal Contract provisions governing the main parties involved. The General Conditions define the rights, responsibilities, and relationships of those parties.
7. The Special Conditions of the Contract modify and adapt the standardized General Conditions to fit the specific requirements of the project.
8. The Supplemental Conditions of the Contract - describe or identify the general rules and regulations of the other parties, which have (in whole or in part) involvement in the project by law.
9. The Contract Specifications - set forth technical information concerning materials, components, systems, and equipment to be furnished and installed - as indicated in the Contract Plans. These Specifications state the quality, performance, characteristics, and results to be achieved by application of construction methods.

C. RESOLUTION OF DISCREPANCIES

Any discrepancies found between the Drawings, the Specifications, and the site conditions - or any other inconsistencies or ambiguities - shall be reported immediately in writing to the

---

Engineer, who shall promptly respond (in writing) to correct the situation. Any work performed by the Contractor (after the discovery of such discrepancies) shall be done at the Contractor's risk.

Project Type Construction of new firehouse building.

### PREVAILING WAGE SCHEDULE FOR ARTICLE 8 PUBLIC WORK PROJECT

Attached is the current schedule(s) of the prevailing wage rates and prevailing hourly supplements for the project referenced above. A unique Prevailing Wage Case Number (PRC#) has been assigned to the schedule(s) for your project.

The schedule is effective from July 2023 through June 2024. All updates, corrections, posted on the 1st business day of each month, and future copies of the annual determination are available on the Department's website [www.labor.ny.gov](http://www.labor.ny.gov). Updated PDF copies of your schedule can be accessed by entering your assigned PRC# at the proper location on the website.

It is the responsibility of the contracting agency or its agent to annex and make part, the attached schedule, to the specifications for this project, when it is advertised for bids and /or to forward said schedules to the successful bidder(s), immediately upon receipt, in order to insure the proper payment of wages.

Please refer to the "General Provisions of Laws Covering Workers on Public Work Contracts" provided with this schedule, for the specific details relating to other responsibilities of the Department of Jurisdiction.

Upon completion or cancellation of this project, enter the required information and mail **OR** fax this form to the office shown at the bottom of this notice, **OR** fill out the electronic version via the NYSDOL website.

# General Provisions of Laws Covering Workers on Article 8 Public Work Contracts

## Introduction

The Labor Law requires public work contractors and subcontractors to pay laborers, workers, or mechanics employed in the performance of a public work contract not less than the prevailing rate of wage and supplements (fringe benefits) in the locality where the work is performed.

## Responsibilities of the Department of Jurisdiction

A Department of Jurisdiction (Contracting Agency) includes a state department, agency, board or commission; a county, city, town or village; a school district, board of education or board of cooperative educational services; a sewer, water, fire, improvement and other district corporation; a public benefit corporation; and a public authority awarding a public work contract.

The Department of Jurisdiction (Contracting Agency) awarding a public work contract MUST obtain a Prevailing Rate Schedule listing the hourly rates of wages and supplements due the workers to be employed on a public work project. This schedule may be obtained by completing and forwarding a "Request for wage and Supplement Information" form (PW 39) to the Bureau of Public Work. The Prevailing Rate Schedule MUST be included in the specifications for the contract to be awarded and is deemed part of the public work contract.

Upon the awarding of the contract, the law requires that the Department of Jurisdiction (Contracting Agency) furnish the following information to the Bureau: the name and address of the contractor, the date the contract was let and the approximate dollar value of the contract. To facilitate compliance with this provision of the Labor Law, a copy of the Department's "Notice of Contract Award" form (PW 16) is provided with the original Prevailing Rate Schedule.

The Department of Jurisdiction (Contracting Agency) is required to notify the Bureau of the completion or cancellation of any public work project. The Department's PW 200 form is provided for that purpose.

Both the PW 16 and PW 200 forms are available for completion [online](#).

## Hours

No laborer, worker, or mechanic in the employ of a contractor or subcontractor engaged in the performance of any public work project shall be permitted to work more than eight hours in any day or more than five days in any week, except in cases of extraordinary emergency. The contractor and the Department of Jurisdiction (Contracting Agency) may apply to the Bureau of Public Work for a dispensation permitting workers to work additional hours or days per week on a particular public work project.

There are very few exceptions to this rule. Complete information regarding these exceptions is available on the ["Request for a dispensation to work overtime" form \(PW30\)](#) and ["4 Day / 10 Hour Work Schedule" form \(PW 30.1\)](#).

## Wages and Supplements

The wages and supplements to be paid and/or provided to laborers, workers, and mechanics employed on a public work project shall be not less than those listed in the current Prevailing Rate Schedule for the locality where the work is performed. If a prime contractor on a public work project has not been provided with a Prevailing Rate Schedule, the contractor must notify the Department of Jurisdiction (Contracting Agency) who in turn must request an original Prevailing Rate Schedule form the Bureau of Public Work. Requests may be submitted by: mail to NYSDOL, Bureau of Public Work, State Office Bldg. Campus, Bldg. 12, Rm. 130, Albany, NY 12240; Fax to Bureau of Public Work (518) 485-1870; or electronically at the NYSDOL website [www.labor.ny.gov](http://www.labor.ny.gov).

Upon receiving the original schedule, the Department of Jurisdiction (Contracting Agency) is REQUIRED to provide complete copies to all prime contractors who in turn MUST, by law, provide copies of all applicable county schedules to each subcontractor and obtain from each subcontractor, an affidavit certifying such schedules were received. If the original schedule expired, the contractor may obtain a copy of the new annual determination from the NYSDOL website [www.labor.ny.gov](http://www.labor.ny.gov).

The Commissioner of Labor makes an annual determination of the prevailing rates. This determination is in effect from July 1st through June 30th of the following year. The annual determination is available on the NYSDOL website [www.labor.ny.gov](http://www.labor.ny.gov).

## Payrolls and Payroll Records

Every contractor and subcontractor MUST keep original payrolls or transcripts subscribed and affirmed as true under penalty of perjury. As per Article 6 of the Labor law, contractors and subcontractors are required to establish, maintain, and preserve for not less than six (6) years, contemporaneous, true, and accurate payroll records. At a minimum, payrolls must show the following information for each person employed on a public work project: Name, Address, Last 4 Digits of Social Security Number, Classification(s) in which the worker was employed, Hourly wage rate(s) paid, Supplements paid

or provided, and Daily and weekly number of hours worked in each classification.

The filing of payrolls to the Department of Jurisdiction is a condition of payment. Every contractor and subcontractor shall submit to the Department of Jurisdiction (Contracting Agency), within thirty (30) days after issuance of its first payroll and every thirty (30) days thereafter, a transcript of the original payrolls, subscribed and affirmed as true under penalty of perjury. The Department of Jurisdiction (Contracting Agency) shall collect, review for facial validity, and maintain such payrolls.

In addition, the Commissioner of Labor may require contractors to furnish, with ten (10) days of a request, payroll records sworn to as their validity and accuracy for public work and private work. Payroll records include, but are not limited to time cards, work description sheets, proof that supplements were provided, cancelled payroll checks and payrolls. Failure to provide the requested information within the allotted ten (10) days will result in the withholding of up to 25% of the contract, not to exceed \$100,000.00. If the contractor or subcontractor does not maintain a place of business in New York State and the amount of the contract exceeds \$25,000.00, payroll records and certifications must be kept on the project worksite.

The prime contractor is responsible for any underpayments of prevailing wages or supplements by any subcontractor.

All contractors or their subcontractors shall provide to their subcontractors a copy of the Prevailing Rate Schedule specified in the public work contract as well as any subsequently issued schedules. A failure to provide these schedules by a contractor or subcontractor is a violation of Article 8, Section 220-a of the Labor Law.

All subcontractors engaged by a public work project contractor or its subcontractor, upon receipt of the original schedule and any subsequently issued schedules, shall provide to such contractor a verified statement attesting that the subcontractor has received the Prevailing Rate Schedule and will pay or provide the applicable rates of wages and supplements specified therein. (See NYS Labor Laws, Article 8 . Section 220-a).

### **Determination of Prevailing Wage and Supplement Rate Updates Applicable to All Counties**

The wages and supplements contained in the annual determination become effective July 1st whether or not the new determination has been received by a given contractor. Care should be taken to review the rates for obvious errors. Any corrections should be brought to the Department's attention immediately. It is the responsibility of the public work contractor to use the proper rates. If there is a question on the proper classification to be used, please call the district office located nearest the project. Any errors in the annual determination will be corrected and posted to the NYSDOL website on the first business day of each month. Contractors are responsible for paying these updated rates as well, retroactive to July 1st.

When you review the schedule for a particular occupation, your attention should be directed to the dates above the column of rates. These are the dates for which a given set of rates is effective. To the extent possible, the Department posts rates in its possession that cover periods of time beyond the July 1st to June 30th time frame covered by a particular annual determination. Rates that extend beyond that instant time period are informational ONLY and may be updated in future annual determinations that actually cover the then appropriate July 1st to June 30th time period.

### **Withholding of Payments**

When a complaint is filed with the Commissioner of Labor alleging the failure of a contractor or subcontractor to pay or provide the prevailing wages or supplements, or when the Commissioner of Labor believes that unpaid wages or supplements may be due, payments on the public work contract shall be withheld from the prime contractor in a sufficient amount to satisfy the alleged unpaid wages and supplements, including interest and civil penalty, pending a final determination.

When the Bureau of Public Work finds that a contractor or subcontractor on a public work project failed to pay or provide the requisite prevailing wages or supplements, the Bureau is authorized by Sections 220-b and 235.2 of the Labor Law to so notify the financial officer of the Department of Jurisdiction (Contracting Agency) that awarded the public work contract. Such officer MUST then withhold or cause to be withheld from any payment due the prime contractor on account of such contract the amount indicated by the Bureau as sufficient to satisfy the unpaid wages and supplements, including interest and any civil penalty that may be assessed by the Commissioner of Labor. The withholding continues until there is a final determination of the underpayment by the Commissioner of Labor or by the court in the event a legal proceeding is instituted for review of the determination of the Commissioner of Labor.

The Department of Jurisdiction (Contracting Agency) shall comply with this order of the Commissioner of Labor or of the court with respect to the release of the funds so withheld.

### **Summary of Notice Posting Requirements**

The current Prevailing Rate Schedule must be posted in a prominent and accessible place on the site of the public work project. The prevailing wage schedule must be encased in, or constructed of, materials capable of withstanding adverse weather conditions and be titled "PREVAILING RATE OF WAGES" in letters no smaller than two (2) inches by two (2) inches.

The "Public Work Project" notice must be posted at the beginning of the performance of every public work contract, on each job site.

Every employer providing workers' compensation insurance and disability benefits must post notices of such coverage in the format prescribed by the Workers' Compensation Board in a conspicuous place on the jobsite.

Every employer subject to the NYS Human Rights Law must conspicuously post at its offices, places of employment, or employment training centers, notices furnished by the State Division of Human Rights.

Employers liable for contributions under the Unemployment Insurance Law must conspicuously post on the jobsite notices furnished by the NYS Department of Labor.

## **Apprentices**

Employees cannot be paid apprentice rates unless they are individually registered in a program registered with the NYS Commissioner of Labor. The allowable ratio of apprentices to journeyworkers in any craft classification can be no greater than the statewide building trade ratios promulgated by the Department of Labor and included with the Prevailing Rate Schedule. An employee listed on a payroll as an apprentice who is not registered as above or is performing work outside the classification of work for which the apprentice is indentured, must be paid the prevailing journeyworker's wage rate for the classification of work the employee is actually performing.

NYSDOL Labor Law, Article 8, Section 220-3, require that only apprentices individually registered with the NYS Department of Labor may be paid apprenticeship rates on a public work project. No other Federal or State Agency of office registers apprentices in New York State.

Persons wishing to verify the apprentice registration of any person must do so in writing by mail, to the NYSDOL Office of Employability Development / Apprenticeship Training, State Office Bldg. Campus, Bldg. 12, Albany, NY 12240 or by Fax to NYSDOL Apprenticeship Training (518) 457-7154. All requests for verification must include the name and social security number of the person for whom the information is requested.

The only conclusive proof of individual apprentice registration is written verification from the NYSDOL Apprenticeship Training Albany Central office. Neither Federal nor State Apprenticeship Training offices outside of Albany can provide conclusive registration information.

It should be noted that the existence of a registered apprenticeship program is not conclusive proof that any person is registered in that program. Furthermore, the existence or possession of wallet cards, identification cards, or copies of state forms is not conclusive proof of the registration of any person as an apprentice.

## **Interest and Penalties**

In the event that an underpayment of wages and/or supplements is found:

- Interest shall be assessed at the rate then in effect as prescribed by the Superintendent of Banks pursuant to section 14-a of the Banking Law, per annum from the date of underpayment to the date restitution is made.
- A Civil Penalty may also be assessed, not to exceed 25% of the total of wages, supplements, and interest due.

## **Debarment**

Any contractor or subcontractor and/or its successor shall be ineligible to submit a bid on or be awarded any public work contract or subcontract with any state, municipal corporation or public body for a period of five (5) years when:

- Two (2) willful determinations have been rendered against that contractor or subcontractor and/or its successor within any consecutive six (6) year period.
- There is any willful determination that involves the falsification of payroll records or the kickback of wages or supplements.

## **Criminal Sanctions**

Willful violations of the Prevailing Wage Law (Article 8 of the Labor Law) may be a felony punishable by fine or imprisonment of up to 15 years, or both.

## **Discrimination**

No employee or applicant for employment may be discriminated against on account of age, race, creed, color, national origin, sex, disability or marital status.

No contractor, subcontractor nor any person acting on its behalf, shall by reason of race, creed, color, disability, sex or national origin discriminate against any citizen of the State of New York who is qualified and available to perform the work to which the employment relates (NYS Labor Law, Article 8, Section 220-e(a)).

No contractor, subcontractor, nor any person acting on its behalf, shall in any manner, discriminate against or intimidate any employee on account of race, creed, color, disability, sex, or national origin (NYS Labor Law, Article 8, Section 220-e(b) ).

The Human Rights Law also prohibits discrimination in employment because of age, marital status, or religion.

There may be deducted from the amount payable to the contractor under the contract a penalty of \$50.00 for each calendar day during which such person was discriminated against or intimidated in violation of the provision of the contract (NYS Labor Law, Article 8, Section 220-e(c) ).

The contract may be cancelled or terminated by the State or municipality. All monies due or to become due thereunder may be forfeited for a second or any subsequent violation of the terms or conditions of the anti-discrimination sections of the contract (NYS Labor Law, Article 8, Section 220-e(d) ).

Every employer subject to the New York State Human Rights Law must conspicuously post at its offices, places of employment, or employment training centers notices furnished by the State Division of Human Rights.

### **Workers' Compensation**

In accordance with Section 142 of the State Finance Law, the contractor shall maintain coverage during the life of the contract for the benefit of such employees as required by the provisions of the New York State Workers' Compensation Law.

A contractor who is awarded a public work contract must provide proof of workers' compensation coverage prior to being allowed to begin work.

The insurance policy must be issued by a company authorized to provide workers' compensation coverage in New York State. Proof of coverage must be on form C-105.2 (Certificate of Workers' Compensation Insurance) and must name this agency as a certificate holder.

If New York State coverage is added to an existing out-of-state policy, it can only be added to a policy from a company authorized to write workers' compensation coverage in this state. The coverage must be listed under item 3A of the information page.

The contractor must maintain proof that subcontractors doing work covered under this contract secured and maintained a workers' compensation policy for all employees working in New York State.

Every employer providing worker's compensation insurance and disability benefits must post notices of such coverage in the format prescribed by the Workers' Compensation Board in a conspicuous place on the jobsite.

### **Unemployment Insurance**

Employers liable for contributions under the Unemployment Insurance Law must conspicuously post on the jobsite notices furnished by the New York State Department of Labor.

## **Social Security Numbers on Certified Payrolls:**

The Department of Labor is cognizant of the concerns of the potential for misuse or inadvertent disclosure of social security numbers. Identity theft is a growing problem and we are sympathetic to contractors' concern regarding inclusion of this information on payrolls if another identifier will suffice.

For these reasons, the substitution of the use of the last four digits of the social security number on certified payrolls submitted to contracting agencies on public work projects is now acceptable to the Department of Labor. This change does not affect the Department's ability to request and receive the entire social security number from employers during its public work/ prevailing wage investigations.

## **Construction Industry Fair Play Act: Required Posting for Labor Law Article 25-B § 861-d**

Construction industry employers must post the "Construction Industry Fair Play Act" notice in a prominent and accessible place on the job site. Failure to post the notice can result in penalties of up to \$1,500 for a first offense and up to \$5,000 for a second offense. The posting is included as part of this wage schedule. Additional copies may be obtained from the NYS DOL website, <https://dol.ny.gov/public-work-and-prevailing-wage>

If you have any questions concerning the Fair Play Act, please call the State Labor Department toll-free at 1-866-435-1499 or email us at: [dol.misclassified@labor.ny.gov](mailto:dol.misclassified@labor.ny.gov) .

## **Worker Notification: (Labor Law §220, paragraph a of subdivision 3-a)**

### **Effective June 23, 2020**

This provision is an addition to the existing wage rate law, Labor Law §220, paragraph a of subdivision 3-a. It requires contractors and subcontractors to provide written notice to all laborers, workers or mechanics of the *prevailing wage and supplement rate* for their particular job classification *on each pay stub*\*. It also requires contractors and subcontractors to *post a notice* at the beginning of the performance of every public work contract *on each job site* that includes the telephone number and address for the Department of Labor and a statement informing laborers, workers or mechanics of their right to contact the Department of Labor if he/she is not receiving the proper prevailing rate of wages and/or supplements for his/her job classification. The required notification will be provided with each wage schedule, may be downloaded from our website [www.labor.ny.gov](http://www.labor.ny.gov) or be made available upon request by contacting the Bureau of Public Work at 518-457-5589. \*In the event the required information will not fit on the pay stub, an accompanying sheet or attachment of the information will suffice.

(12.20)

**To all State Departments, Agency Heads and Public Benefit Corporations  
IMPORTANT NOTICE REGARDING PUBLIC WORK ENFORCEMENT FUND**

## **Budget Policy & Reporting Manual**

# **B-610**

### **Public Work Enforcement Fund**

*effective date December 7, 2005*

---

#### **1. Purpose and Scope:**

This Item describes the Public Work Enforcement Fund (the Fund, PWEF) and its relevance to State agencies and public benefit corporations engaged in construction or reconstruction contracts, maintenance and repair, and announces the recently-enacted increase to the percentage of the dollar value of such contracts that must be deposited into the Fund. This item also describes the roles of the following entities with respect to the Fund:

- New York State Department of Labor (DOL),
- The Office of the State of Comptroller (OSC), and
- State agencies and public benefit corporations.

#### **2. Background and Statutory References:**

DOL uses the Fund to enforce the State's Labor Law as it relates to contracts for construction or reconstruction, maintenance and repair, as defined in subdivision two of Section 220 of the Labor Law. State agencies and public benefit corporations participating in such contracts are required to make payments to the Fund.

Chapter 511 of the Laws of 1995 (as amended by Chapter 513 of the Laws of 1997, Chapter 655 of the Laws of 1999, Chapter 376 of the Laws of 2003 and Chapter 407 of the Laws of 2005) established the Fund.

#### **3. Procedures and Agency Responsibilities:**

The Fund is supported by transfers and deposits based on the value of contracts for construction and reconstruction, maintenance and repair, as defined in subdivision two of Section 220 of the Labor Law, into which all State agencies and public benefit corporations enter.

Chapter 407 of the Laws of 2005 increased the amount required to be provided to this fund to .10 of one-percent of the total cost of each such contract, to be calculated at the time agencies or public benefit corporations enter into a new contract or if a contract is amended. The provisions of this bill became effective August 2, 2005.

**To all State Departments, Agency Heads and Public Benefit Corporations  
IMPORTANT NOTICE REGARDING PUBLIC WORK ENFORCEMENT FUND**

OSC will report to DOL on all construction-related ("D") contracts approved during the month, including contract amendments, and then DOL will bill agencies the appropriate assessment monthly. An agency may then make a determination if any of the billed contracts are exempt and so note on the bill submitted back to DOL. For any instance where an agency is unsure if a contract is or is not exempt, they can call the Bureau of Public Work at the number noted below for a determination. Payment by check or journal voucher is due to DOL within thirty days from the date of the billing. DOL will verify the amounts and forward them to OSC for processing.

For those contracts which are not approved or administered by the Comptroller, monthly reports and payments for deposit into the Public Work Enforcement Fund must be provided to the Administrative Finance Bureau at the DOL within 30 days of the end of each month or on a payment schedule mutually agreed upon with DOL.

Reports should contain the following information:

- Name and billing address of State agency or public benefit corporation;
- State agency or public benefit corporation contact and phone number;
- Name and address of contractor receiving the award;
- Contract number and effective dates;
- Contract amount and PWEF assessment charge (if contract amount has been amended, reflect increase or decrease to original contract and the adjustment in the PWEF charge); and
- Brief description of the work to be performed under each contract.

Checks and Journal Vouchers, payable to the "New York State Department of Labor" should be sent to:

Department of Labor  
Administrative Finance Bureau-PWEF Unit  
Building 12, Room 464  
State Office Campus  
Albany, NY 12240

Any questions regarding billing should be directed to NYSDOL's Administrative Finance Bureau-PWEF Unit at (518) 457-3624 and any questions regarding Public Work Contracts should be directed to the Bureau of Public Work at (518) 457-5589.

Required Notice under Article 25-B of the Labor Law

**Attention All Employees, Contractors and Subcontractors:  
You are Covered by the Construction Industry Fair Play Act**

**The law says that you are an employee unless:**

- You are free from direction and control in performing your job, **and**
- You perform work that is not part of the usual work done by the business that hired you, **and**
- You have an independently established business.

Your employer cannot consider you to be an independent contractor unless all three of these facts apply to your work.

**It is against the law for an employer to misclassify employees as independent contractors or pay employees off the books.**

**Employee Rights:** If you are an employee, you are entitled to state and federal worker protections. These include:

- Unemployment Insurance benefits, if you are unemployed through no fault of your own, able to work, and otherwise qualified,
- Workers' compensation benefits for on-the-job injuries,
- Payment for wages earned, minimum wage, and overtime (under certain conditions),
- Prevailing wages on public work projects,
- The provisions of the National Labor Relations Act, and
- A safe work environment.

It is a violation of this law for employers to retaliate against anyone who asserts their rights under the law. Retaliation subjects an employer to civil penalties, a private lawsuit or both.

**Independent Contractors:** If you are an independent contractor, **you must pay all taxes and Unemployment Insurance contributions required by New York State and Federal Law.**

**Penalties** for paying workers off the books or improperly treating employees as independent contractors:

- **Civil Penalty**                      First offense: Up to \$2,500 per employee  
    Subsequent offense(s): Up to \$5,000 per employee
- **Criminal Penalty**                First offense: Misdemeanor - up to 30 days in jail, up to a \$25,000 fine and debarment from performing public work for up to one year.  
    Subsequent offense(s): Misdemeanor - up to 60 days in jail or up to a \$50,000 fine and debarment from performing public work for up to 5 years.

**If you have questions about your employment status or believe that your employer may have violated your rights and you want to file a complaint, call the Department of Labor at (866) 435-1499 or send an email to [dol.misclassified@labor.ny.gov](mailto:dol.misclassified@labor.ny.gov). All complaints of fraud and violations are taken seriously. You can remain anonymous.**

**Employer Name:**

## Requirements for OSHA 10 Compliance

Article 8 §220-h requires that when the advertised specifications, for every contract for public work, is \$250,000.00 or more the contract must contain a provision requiring that every worker employed in the performance of a public work contract shall be certified as having completed an OSHA 10 safety training course. The clear intent of this provision is to require that all employees of public work contractors, required to be paid prevailing rates, receive such training "prior to the performing any work on the project."

### The Bureau will enforce the statute as follows:

All contractors and sub contractors must attach a copy of proof of completion of the OSHA 10 course to the first certified payroll submitted to the contracting agency and on each succeeding payroll where any new or additional employee is first listed.

Proof of completion may include but is not limited to:

- Copies of bona fide course completion card (*Note: Completion cards do not have an expiration date.*)
- Training roster, attendance record or other documentation from the certified trainer pending the issuance of the card.
- Other valid proof

\*\*A certification by the employer attesting that all employees have completed such a course is not sufficient proof that the course has been completed.

Any questions regarding this statute may be directed to the New York State Department of Labor, Bureau of Public Work at 518-457-5589.

## WICKS

Public work projects are subject to the Wicks Law requiring separate specifications and bidding for the plumbing, heating and electrical work, when the total project's threshold is \$3 million in Bronx, Kings, New York, Queens and, Richmond counties; \$1.5 million in Nassau, Suffolk and Westchester counties; and \$500,000 in all other counties.

For projects below the monetary threshold, bidders must submit a sealed list naming each subcontractor for the plumbing, HVAC and electrical and the amount to be paid to each. The list may not be changed unless the public owner finds a legitimate construction need, including a change in specifications or costs or the use of a Project Labor Agreement (PLA), and must be open to public inspection.

Allows the state and local agencies and authorities to waive the Wicks Law and use a PLA if it will provide the best work at the lowest possible price. If a PLA is used, all contractors shall participate in apprentice training programs in the trades of work it employs that have been approved by the Department of Labor (DOL) for not less than three years. They shall also have at least one graduate in the last three years and use affirmative efforts to retain minority apprentices. PLA's would be exempt from Wicks, but deemed to be public work subject to prevailing wage enforcement.

The Commissioner of Labor shall have the power to enforce separate specification requirements on projects, and may issue stop-bid orders against public owners for non-compliance.

Other new monetary thresholds, and similar sealed bidding for non-Wicks projects, would apply to certain public authorities including municipal housing authorities, NYC Construction Fund, Yonkers Educational Construction Fund, NYC Municipal Water Finance Authority, Buffalo Municipal Water Finance Authority, Westchester County Health Care Association, Nassau County Health Care Corp., Clifton-Fine Health Care Corp., Erie County Medical Center Corp., NYC Solid Waste Management Facilities, and the Dormitory Authority.

Contractors must pay subcontractors within a 7 days period.

(07.19)

## Introduction to the Prevailing Rate Schedule

### Information About Prevailing Rate Schedule

This information is provided to assist you in the interpretation of particular requirements for each classification of worker contained in the attached Schedule of Prevailing Rates.

#### Classification

It is the duty of the Commissioner of Labor to make the proper classification of workers taking into account whether the work is heavy and highway, building, sewer and water, tunnel work, or residential, and to make a determination of wages and supplements to be paid or provided. It is the responsibility of the public work contractor to use the proper rate. If there is a question on the proper classification to be used, please call the district office located nearest the project. District office locations and phone numbers are listed below.

Prevailing Wage Schedules are issued separately for "General Construction Projects" and "Residential Construction Projects" on a county-by-county basis.

General Construction Rates apply to projects such as: Buildings, Heavy & Highway, and Tunnel and Water & Sewer rates.

Residential Construction Rates generally apply to construction, reconstruction, repair, alteration, or demolition of one family, two family, row housing, or rental type units intended for residential use.

Some rates listed in the Residential Construction Rate Schedule have a very limited applicability listed along with the rate. Rates for occupations or locations not shown on the residential schedule must be obtained from the General Construction Rate Schedule. Please contact the local Bureau of Public Work office before using Residential Rate Schedules, to ensure that the project meets the required criteria.

#### Payrolls and Payroll Records

Contractors and subcontractors are required to establish, maintain, and preserve for not less than six (6) years, contemporaneous, true, and accurate payroll records.

Every contractor and subcontractor shall submit to the Department of Jurisdiction (Contracting Agency), within thirty (30) days after issuance of its first payroll and every thirty (30) days thereafter, a transcript of the original payrolls, subscribed and affirmed as true under penalty of perjury.

#### Paid Holidays

Paid Holidays are days for which an eligible employee receives a regular day's pay, but is not required to perform work. If an employee works on a day listed as a paid holiday, this remuneration is in addition to payment of the required prevailing rate for the work actually performed.

#### Overtime

At a minimum, all work performed on a public work project in excess of eight hours in any one day or more than five days in any workweek is overtime. However, the specific overtime requirements for each trade or occupation on a public work project may differ. Specific overtime requirements for each trade or occupation are contained in the prevailing rate schedules.

Overtime holiday pay is the premium pay that is required for work performed on specified holidays. It is only required where the employee actually performs work on such holidays.

The applicable holidays are listed under HOLIDAYS: OVERTIME. The required rate of pay for these covered holidays can be found in the OVERTIME PAY section listings for each classification.

#### Supplemental Benefits

Particular attention should be given to the supplemental benefit requirements. Although in most cases the payment or provision of supplements is straight time for all hours worked, some classifications require the payment or provision of supplements, or a portion of the supplements, to be paid or provided at a premium rate for premium hours worked. Supplements may also be required to be paid or provided on paid holidays, regardless of whether the day is worked. The Overtime Codes and Notes listed on the particular wage classification will indicate these conditions as required.

#### Effective Dates

When you review the schedule for a particular occupation, your attention should be directed to the dates above the column of rates. These are the dates for which a given set of rates is effective. The rate listed is valid until the next effective rate change or until the new annual determination which takes effect on July 1 of each year. All contractors and subcontractors are required to pay the current prevailing rates of wages and supplements. If you have any questions please contact the Bureau of Public Work or visit the New York State Department of Labor website ([www.labor.ny.gov](http://www.labor.ny.gov)) for current wage rate information.

#### Apprentice Training Ratios

The following are the allowable ratios of registered Apprentices to Journey-workers.

For example, the ratio 1:1,1:3 indicates the allowable initial ratio is one Apprentice to one Journeyworker. The Journeyworker must be in place on the project before an Apprentice is allowed. Then three additional Journeyworkers are needed before a second Apprentice is allowed. The last ratio repeats indefinitely. Therefore, three more Journeyworkers must be present before a third Apprentice can be hired, and so on.

Please call Apprentice Training Central Office at (518) 457-6820 if you have any questions.

Title (Trade)	Ratio
Boilermaker (Construction)	1:1,1:4
Boilermaker (Shop)	1:1,1:3
Carpenter (Bldg.,H&H, Pile Driver/Dockbuilder)	1:1,1:4
Carpenter (Residential)	1:1,1:3

- ( W ) Time and one half for benefits on all overtime hours.
- ( X ) Benefits payable on Paid Holiday at straight time. If worked, additional benefit amount will be required for worked hours. (Refer to other codes listed.)

## Holiday Codes

### PAID Holidays:

Paid Holidays are days for which an eligible employee receives a regular day's pay, but is not required to perform work. If an employee works on a day listed as a paid holiday, this remuneration is in addition to payment of the required prevailing rate for the work actually performed.

### OVERTIME Holiday Pay:

Overtime holiday pay is the premium pay that is required for work performed on specified holidays. It is only required where the employee actually performs work on such holidays. The applicable holidays are listed under HOLIDAYS: OVERTIME. The required rate of pay for these covered holidays can be found in the OVERTIME PAY section listings for each classification.

Following is an explanation of the code(s) listed in the HOLIDAY section of each classification contained in the attached schedule. The Holidays as listed below are to be paid at the wage rates at which the employee is normally classified.

- ( 1 ) None
- ( 2 ) Labor Day
- ( 3 ) Memorial Day and Labor Day
- ( 4 ) Memorial Day and July 4th
- ( 5 ) Memorial Day, July 4th, and Labor Day
- ( 6 ) New Year's, Thanksgiving, and Christmas
- ( 7 ) Lincoln's Birthday, Washington's Birthday, and Veterans Day
- ( 8 ) Good Friday
- ( 9 ) Lincoln's Birthday
- ( 10 ) Washington's Birthday
- ( 11 ) Columbus Day
- ( 12 ) Election Day
- ( 13 ) Presidential Election Day
- ( 14 ) 1/2 Day on Presidential Election Day
- ( 15 ) Veterans Day
- ( 16 ) Day after Thanksgiving
- ( 17 ) July 4th
- ( 18 ) 1/2 Day before Christmas
- ( 19 ) 1/2 Day before New Years
- ( 20 ) Thanksgiving
- ( 21 ) New Year's Day
- ( 22 ) Christmas
- ( 23 ) Day before Christmas
- ( 24 ) Day before New Year's
- ( 25 ) Presidents' Day
- ( 26 ) Martin Luther King, Jr. Day
- ( 27 ) Memorial Day
- ( 28 ) Easter Sunday

( 29 )      Juneteenth

NEW YORK STATE DEPARTMENT OF LABOR  
Bureau of Public Work - Debarment List

**LIST OF EMPLOYERS INELIGIBLE TO BID ON OR BE  
AWARDED ANY PUBLIC WORK CONTRACT**

Under Article 8 and Article 9 of the NYS Labor Law, a contractor, sub-contractor and/or its successor shall be debarred and ineligible to submit a bid on or be awarded any public work or public building service contract/sub-contract with the state, any municipal corporation or public body for a period of five (5) years from the date of debarment when:

- Two (2) final determinations have been rendered within any consecutive six-year (6) period determining that such contractor, sub-contractor and/or its successor has WILLFULLY failed to pay the prevailing wage and/or supplements;
- One (1) final determination involves falsification of payroll records or the kickback of wages and/or supplements.

The agency issuing the determination and providing the information, is denoted under the heading 'Fiscal Officer'. DOL = New York State Department of Labor; NYC = New York City Comptroller's Office; AG = New York State Attorney General's Office; DA = County District Attorney's Office.

**Debarment Database:** To search for contractors, sub-contractors and/or their successors debarred from bidding or being awarded any public work contract or subcontract under NYS Labor Law Articles 8 and 9, or under NYS Workers' Compensation Law Section 141-b, access the database at this link: <https://applications.labor.ny.gov/EDList/searchPage.do>

**For inquiries where WCB is listed as the "Agency", please call 1-866-546-9322**

"General Decision Number: NY20210007 04/16/2021

Superseded General Decision Number: NY20200007

State: New York

Construction Types: Building, Heavy and Highway

Counties: Dutchess, Orange, Sullivan and Ulster Counties in New York.

BUILDING CONSTRUCTION PROJECTS FOR ALL COUNTIES EXCEPT SULLIVAN (does not include single family homes and apartment up to and including 4 stories), HEAVY AND HIGHWAY CONSTRUCTION PROJECTS

Note: Under Executive Order (EO) 13658, an hourly minimum wage of \$10.95 for calendar year 2021 applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2015. If this contract is covered by the EO, the contractor must pay all workers in any classification listed on this wage determination at least \$10.95 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in calendar year 2021. If this contract is covered by the EO and a classification considered necessary for performance of work on the contract does not appear on this wage determination, the contractor must pay workers in that classification at least the wage rate determined through the conformance process set forth in 29 CFR 5.5(a)(1)(ii) (or the EO minimum wage rate, if it is higher than the conformed wage rate). The EO minimum wage rate will be adjusted annually. Please note that this EO applies to the above-mentioned types of contracts entered into by the federal government that are subject to the Davis-Bacon Act itself, but it does not apply to contracts subject only to the Davis-Bacon Related Acts, including those set forth at 29 CFR 5.1(a)(2)-(60). Additional information on contractor requirements and worker protections under the EO is available at www.dol.gov/whd/govcontracts.

POWER EQUIPMENT OPERATORS CLASSIFICATION

GROUP 1-A: Carrier- trailer horse; concret-portable hoist;  
crane & hoist engineer-steel (concrete, material, super  
structure sub- structure); derrick (stone-steel); elevator  
& cage; hoist- single/double or triple drum; hoist-portable  
mobile unit; hoist engineer-concert (crane-derrick-mine  
hoist); hoist engineer- material; overhead crane; power  
house plant; telephies (cableway); whirly; maintenance  
engineer; Lull hilit or similar; hydraulic crane 25 ton  
and over; cherry picker 25 tons and over; backhoe Oliver  
88; fordson; dynahoe; dual purpose and similar machines;  
Barber Green Loader-euclid loader or similar type; conway  
or similar mucking macking machines; dragline; gradall;  
shovel; backhoe etc. (crawler or truck); front end loaders;  
hydraulic boom; jersey spreader; lift slab console;  
letournequ or tounapull (scrapers over 20 yds struck);  
mucking machines; pavement breaker (air ram); paver  
(concrete); road boring machine; road mix machines; ross  
carrier and similar machines; post hole digger; shovel  
(tunnels); side boom; spreader (asphalt);  
scoopmobile-tractor-shovel over 1 1/2 yds. trenching  
machines vermeer concrete saw trencher and similar; tractor  
type demolition equipment; winch truck (a frame); hydraulic  
crane over 10 ton up to 25 ton); cherry picker over 10 ton  
up to 25 ton)

GROUP 1-B: Compressor (steel erection); pulse meter and push  
button buzz box; elevator; mechanic (outside) all types;  
welder; scrapers 20 yds struck and under; machine pulling  
sheep's foot roller; vibratory rollers; roller 4 tons and  
over.

GROUP 2-A: Compactor self-propelled; grader; bulldoze D7 and  
similar tractors with a draw bar horsepower of 100 or over;  
bulldozer D6 and under; welder; scraper 20 yds struck and  
under; machine pulling sheep's foot roller; vibratory  
rollers.

GROUP 3-A: Asphalt plant; boiler (high pressure); concrete  
mixing plants; concrete pump; firemen; forklift; forklift  
(electric); joy drill or similar tractor drilling machine;  
loader - 1 1/2 yards and under; locomotive (all sizes);  
mixer concrete - 21E and over; portable asphalt plant;  
portable batch plant; portable crusher; quarry master;  
stone crusher; well drilling machine and well point system;  
cherry picker under 10 tons; hydraulic crane under 10 tons;  
concert buffy; one yard an up ride on dumper (benford or  
similar).

GROUP 3-B: Compressor over 125 cu. feet; conveyor belt  
machine regardless of size; lighting unit (portable &  
generator); welding machine (steel erection and  
excavation); and compressor plant; stud machine; ladder  
hoist.

GROUP 4-A: Air tractor drill; batch plant; bending machine;  
concrete breaker; concrete spreader; curb cutter machine;  
farm tractor (all types); finishing machine-concrete;

hepavac clean air machine (all similar types: removal of asbestos etc.); material hopper-sand-stone-cement; mixer-concrete-under 21E; mulching grass spreader; pump-gypsum, etc., pump-plaster-grout -fireproofing; shop mechanic (not employed on job site); roller under 4 ton; spreading and fine grading machine; steel cutting machine; syphon pump-air-steam; tar joint machine; turbo jet burner or similar equipment; vibrator (1 to 5); fine grading machine; roof hoist (tugger hoist); television cameras-water- sewer-gas-etc.

GROUP 4-B: Compressor to 125 feet; dust; dust collector; heater all types; pump; pump station (water and sewer); steam jenny; sweeper; chipper; mulcher.

GROUP 5: Motorized roller (walk behind)

GROUP 5-A: Master Mechanic

GROUP 5-B: Utility Man

GROUP 6: Warehouse Man

GROUP 2: Asbestos abatement work, toxic and hazardous abatement, lead abatement work, environmental work.

## LABORERS HEAVY AND HIGHWAY CLASSIFICATIONS

## GROUP 1: Flagperson, gateperson

GROUP 2: General laborers, chuck tender, handling and distributing drinking water, distributing all tools and supplies of laborers, nipper, powder carrier, magazine tender, warehouse laborers, concrete man, vibrator man, mason tender, mortar man, spraying, brushing and covering of concrete for curing and preservative purposes, traffic striper, scaffold builder, concrete curb and sidewalk form setter; permanent traffic striping and reflective devices, placing and maintenance of all flares, cones, lights, signs, barricades, traffic patterns, and all temporary reflective type materials for traffic control, custodial work, traffic directors, temporary heat or light tenders, tool room, dewatering pump men, pitman, dumpmen, snow removal and firewatch, asphalt man, joint setter, signal person, pipelayer, pipelining and relining, wellpoints, conduit and duct layer, wire puller rip rap and dry stone layer, steel rod carrier, core drill, rock splitter, Hilti gun air or electric, jackhammer, bush hammer, pavement breaker, chipping hammer, wagon drill, air track, jib rig, joy drill, gunite and sand blasting, coal passer and other machine operators, power tool operator, sprayer and nozzle man on mulching and seeding machine, all guard rail and fence, all seeding and sod laying, all landscape work, grade checker, all bridge work, walk behind self-propelled power saw, grinder, groover or similar type machine, walk behind tamper and roller of all types, salvage, stripping, wrecking and dismantling laborer (including barman, cutting torch and burner man), sheeting and shoring coming under laborers jurisdiction, bit grinder, operator of form pin puller and drivers, sandblasting, joint and jet sealer, filling and wiring baskets for gabion walls, permanent sign man, median barrier, sta-wall or similar type product, chain saw operator, railroad track laborer, waterproofer, pre-stressed and pre-cast concrete brick, block and stone pavers, power tools used to perform work usually done by laborers, power buggy and pumpcrete operator, fireproof, plaster and acoustic pump, asbestos, toxic, bio-remediation, phyto-remediation, lead or hazardous materials abatement when protective clothing and equipment is not required, power brush cutter, retention liners, artificial turf, retaining walls, walk behind surface planer, welding related to laborers work, remote controlled equipment normally operated by laborers, all technician work including but not limited to stitching, seaming, heat welding, fireproof sprayer, mortar mixer, concrete finisher, form setter for concrete curbs and flatwork. Gunite nozzle man, stone cutters, granite stone layer, manhole, catch basin or inlet installing, lase men. Ground man on milling machine.

GROUP 3: Ingersoll Rand heavy duty crawler master type HCMZ any drill using 4" or larger bit, asbestos, toxic, bio-remediation, phyto-remediation, lead or hazardous material abatement when protective clothing and equipment is required, all working foremen including grade, pipe, concrete, clearing, blacktop, drill, paving and blaster etc., Hydraulic drill or similar, forklift for masonry only, Blaster and asphalt screedman.

GROUP 4: Asbestos, toxic, lead or hazardous material abatement foreman.

## HEAVY &amp; HIGHWAY CLASSIFICATIONS

GROUP 1: Asbestos, toxic, bio-remediation,

phyto-remediation, lead or hazardous material abatement; when protective equipment and clothing are not required.

GROUP 2: Asbestos toxic, bio-remediation, phyto-remediation, lead or hazardous material abatement when protective clothing and equipment is required.

=====  
Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at [www.dol.gov/whd/govcontracts](http://www.dol.gov/whd/govcontracts).

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

-----  
The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of "identifiers" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than "SU" or "UAVG" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

#### Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

---

#### WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- \* an existing published wage determination
- \* a survey underlying a wage determination
- \* a Wage and Hour Division letter setting forth a position on a wage determination matter
- \* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations  
Wage and Hour Division  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

=====

END OF GENERAL DECISION"

Re: Geotechnical Engineering Evaluation  
Port Ewen Fire Station  
Town Hall Way  
Town of Esopus  
Ulster County, New York

Dear Mr. Amrod:

Keystone Associates Architects, Engineers, and Surveyors, LLC (Keystone) completed a subsurface investigation and geotechnical engineering evaluation pertaining to the above project. The following geotechnical report describes the results of our evaluation and provides recommendations regarding the design and construction of the proposed fire station.

If you have any questions, or need additional information, please do not hesitate to contact our office.

Very truly yours,

Keystone Associates  
Architects, Engineers and Surveyors, LLC

## **APPENDICES**

### APPENDIX A - DRAWINGS

Figure No. 1 - Site Location Map

Figure No. 2 - Boring Location Plan

### APPENDIX B - SUBSURFACE LOGS

## **1.0 Introduction**

Keystone Associates Architects, Engineers and Surveyors, LLC (Keystone) was retained by Delaware Engineering, D.P.C. to provide geotechnical engineering services in accordance with a signed contract dated October 26, 2021, executed by Mr. John Brust., Partner of Delaware Engineering, D.P.C. on November 15, 2021.

This report presents the results of a subsurface investigation and geotechnical engineering evaluation related to the construction of a new fire station located on Tax Map No. 56.75-2-24 on Town Hall Way in the Town of Esopus, Ulster County, New York (Refer to Appendix A, Figure No. 1 – Site Location Map).

## **2.0 Proposed Construction**

The project consists of the construction of a new building to be used as a fire station for the Hamlet of Port Ewen. The new building is planned to be located south of the existing Town Hall and is an approximate 15,800 square feet (sf) two-story CMU block building with a concrete slab-on-grade and a finish floor elevation of  $\pm 192.5$ . The project will also include new parking areas, concrete sidewalks, a grinder pump station, a stormwater detention system, and other new utility connections. Maximum loads on interior column footings are anticipated to be 325 kilo-pounds (kips) and maximum loads on wall footings are anticipated to be 2.8 kips per linear foot (klf).

## **3.0 Method of Investigation**

### **3.1 Subsurface Investigation**

The nature of the subsurface conditions was explored by advancing four (4) test borings at the locations shown on Figure No. 2 – Boring Location Plan in Appendix A. The boring locations were selected by Delaware Engineering, D.P.C. as shown on Sheet C-103 “Site Grading Plan” dated March 7, 2022. The boring locations were staked in the field using a handheld GPS device by Mr. Denver Tyler, Jr. from Keystone Material Testing, LLC. The borings were advanced by a drilling crew from Lyon Drilling, Co. under the supervision of Mr. Tyler on June 16 and 17, 2022. The boring elevations were interpolated using topographic information provided by Keystone.

One (1) boring was performed near the northeastern corner of the proposed building and the other three (3) were located within the surrounding pavement area. Three (3) borings were planned for a depth of 20.0 feet from the ground surface and the fourth boring was planned for a depth of 50.0 feet from the ground surface. Auger refusal was encountered in each of the four (4) borings prior to reaching the planned boring depths, which ranged from a depth of 4.7 to 13.7 feet from the ground surface. Borings B-1, B-2, and B-3 were offset at least once upon reaching auger refusal in an attempt to move beyond the obstruction causing the refusal.

The borings were advanced using a Central Mine Equipment Model 45B rotary drill rig mounted on a track carrier equipped with 3.25-inch I.D. hollow stem augers. Representative samples of the overburden were obtained by driving a 2-inch O.D. split spoon sampler into the soil, through and beneath the augers using a 140-pound hammer free-falling 30 inches in general conformance with ASTM D 1586. Continuous sampling was performed from the ground surface to a depth of 12.0 feet or to auger refusal. The nature of the refusal was investigated in boring B-4 by performing a 5.0-foot rock core using a double-tube swivel type core barrel and NWD4 size cores were recovered in general conformance with ASTM D2113. The coring operation used water as the flushing medium. Upon completion of the boring, the boreholes were backfilled with auger cuttings to the ground surface.

A Subsurface Log for each test boring was prepared based on the classifications in the field by Mr. Tyler and the driller's observations. The visual classifications are based primarily on a combination of the Unified Soil Classification (ASTM D2487) and a classification system developed by D.M. Burmister, which are further described in the General Information and Key to Subsurface Logs in Appendix B. The recovered soil samples from the test borings were returned to our office and the field classifications were reviewed by Mr. Tyler R. Lozzi, E.I.T., Designer of Keystone. The Subsurface Logs are attached in Appendix B.

#### 4.0 Site Description

##### 4.1 Surface Conditions

The site is located south of the existing Town Hall on Tax Map No. 56.75-2-24 on the south side of the Town Hall access drive known as Town Hall Way. The site of the proposed fire station is currently undeveloped and is wooded. The site is bordered to the east by residential properties along Route 9W, to the north and west by the existing Town Hall property, and south by more woodland and a suburban area thereafter. The site generally slopes towards the center of the proposed building from the east and west where a channel appears to have developed, which flows southwest towards the southern property line.

##### 4.2 Subsurface Conditions

The site is mapped by the Surficial Geologic Map of New York – Lower Hudson Sheet as bedrock consisting of coarse to fine gravel and sand. The Geologic Map of New York – Lower Hudson Sheet shows the bedrock mapped as Graywacke and Shale belonging to the Austin Glen Formation of the Trenton Group and Metamorphic Equivalents. The site is mapped by the Web Soil Survey as Riverhead fine sandy loam.

The subsurface investigation identified a soils profile consisting of loose fine sand or fine sand and silt overlying firm to very compact sand and gravel, and shale bedrock. Topsoil was encountered in borings B-1, B-2, and B-4 and was 0.1 to 0.6 feet in thickness.

Boring B-1 encountered loose fine sand with trace to little silt and trace amounts of medium to coarse sand and gravel to a depth of 3.0 feet from the ground surface. Underlying the fine sand layer was a firm to compact sand and fine gravel deposit with trace amounts of silt to the boring termination depth of 10.0 feet.

Boring B-2 encountered loose fine sand and silt with trace medium sand and roots to a depth of 4.5 feet from the ground surface. This layer was slightly mottled indicating the presence of a seasonal high groundwater table or perched water. Underlying the fine sand and silt was a compact layer of sand and gravel with trace amounts of silt to the boring termination depth of 7.0 feet.

Boring B-3 encountered loose fine sand and silt with trace medium to coarse sand and fine gravel to a depth of 3.0 feet from the ground surface. Underlying the fine sand and silt was a compact to very compact sand and gravel deposit with trace to little amounts of silt to the boring termination depth of 9.7 feet.

Boring B-4 encountered loose fine sand with some amounts of silt and trace amounts of medium to coarse sand to a depth of 2.5 feet from the ground surface. Underlying the fine sand was a loose to compact sand and gravel deposit with trace to little amounts of silt to a depth of 13.7 feet from the ground surface. Bedrock was encountered at a depth of 13.7 feet from the ground surface, which consisted of gray medium hard, very weathered to weathered, and laminated to thick bedded

shale. The rock core run extended from 13.7 to 18.7 feet from the ground surface and 92% of the core run was recovered with a Rock Quality Designation (RQD) of 73.75%.

Groundwater was encountered in B-4, but the presence of the water is due to the coring operation. Groundwater was not encountered in any of the other borings. No expansive soils were encountered.

## 5.0 Conclusions and Recommendations

### 5.1 Site Preparation

The existing topsoil should be stripped and either removed from the site or stockpiled for future use. All trees and vegetation must be removed from within the footprint of the proposed building, asphalt, and fill area.

As described above, the subsurface conditions of the site consist of 2.5 to 4.5 feet of loose fine sand and silt overlying firm to very compact sand and gravel. For the building finish floor to be constructed at an elevation of 192.5, the site is planned to be filled between approximately 1.8 feet to 9.1 feet. Based on the proposed finish floor elevation and the elevation at the existing ground surface of the borings, the proposed building foundation will be supported by the native sand and gravel and the fill. At borings B-2 and B-4, the foundation footings should be approximately 4.0 feet and 1.0 foot respectively above the loose fine sand and silt layer. We have analyzed the effective stress distribution through the loose fine sand and silt layer due to both the surcharge loading and building loads based on the subsurface conditions in B-2 and B-4. Based on our analysis, we found that excessive settlement will result within the fine sand and silt layer due to the building load even after the surcharge load from the fill operation has been completed. Therefore, we recommend that the site within the building footprint be cut to elevation 185.5 and then be rough graded to the top of subgrade elevation. This remove and replace will apply a greater surcharge and reduce settlement to any remaining loose soils.

The site contains fine sand and silt soils overlying sand and gravel soils, in which the sand and gravel soils are suitable to be used as fill if they can be properly placed as recommended in this report. These soils shall meet the material and gradation requirements of Item 733-11 Select Granular Fill of the NYSDOT Standard Specifications, Construction and Materials. The maximum aggregate size per lift shall be 2/3 the lift thickness within 2.0 feet of the finished subgrade elevation. We recommend maintaining a moisture content of  $\pm 2$  percent of the material's optimum value to ensure proper placement. Fine sand and silt soils are unsuitable to use as fill as they typically have lower strength properties due to the lack of coarse grained soil particles and they contain high percentages of fine-grained particles, which may prove to be difficult in achieving proper compaction.

We recommend any imported structural fill be a well graded sand and gravel meeting the material and gradation requirements of Item 304.12 or 304.14 subbase course, Type 2 or Type 4 material of the NYSDOT Standard Specifications, Construction and Materials. Each lift of structural fill should be placed in near level lifts not exceeding 8 to 12 inches in thickness. The structural fill should be compacted to at least 95 percent of the maximum dry density attainable through the Modified Proctor compaction test (ASTM D 1557).

Once the site has been prepared as described above, the exposed subgrade shall then be proof rolled with at least a 10-ton smooth drum roller capable of operating in both static and vibratory modes or a fully loaded ten-wheel dump truck. The proof rolling will identify any loose or unstable soils, which if encountered must be removed to firm soil and replaced with structural fill as

recommended in this report. Proof rolling must not be conducted during or immediately following inclement weather.

After the site has been proof rolled, the excavation for the new building foundation may begin. We recommend the foundation bearing grade be inspected to verify that the excavations are extended to the proper depth, have reached the proper soil material, and that the soil materials are adequate to achieve the allowable bearing capacity as recommended in this report. See Section 5.6 “Construction Monitoring” for more information.

Groundwater is not anticipated to be encountered in foundation excavations. Surface runoff during construction should be controlled and directed away from the excavations to avoid disturbance to the prepared subgrade. Any water that enters the excavation must be immediately removed prior to placement of any foundation. If the foundation bearing surface becomes destroyed or it does not meet the allowable bearing capacity, the bottom of the excavation must be undercut 1.0 foot in depth and replaced with structural fill as described in this report. The bottom width of any undercut shall be the footing width plus the depth of the undercut. For example, if the footing width is 2.0 feet and the depth of the undercut is 1.0 foot, then the bottom width of the excavation will be 3.0 feet.

## 5.2 Foundation Recommendations

The site is suitable to support the proposed building on conventional spread foundations supported by both the natural sand and gravel and structural fill. All exterior foundations should be embedded at least 4.0 feet below the lowest adjacent grade for frost protection. Interior foundations should be embedded at least 2.0 feet below the floor slab if the building is heated during the winter, otherwise the interior foundations should be embedded 4.0 feet below the floor slab. All continuous wall foundations should have a minimum width of 1.5 feet and isolated column foundations should have a minimum width of 2.0 feet.

We recommend the spread foundations be designed for an allowable bearing capacity of 3,000 psf. If the site is prepared as described in this report, we estimate that the maximum total and differential settlement to be about 1/2 inch. Post construction total and differential settlement will be negligible.

All excavations should be performed in accordance to the latest OSHA standards. The natural sand and gravel soils and structural fill are classified as a Type C material with maximum side slopes of 1.5 horizontal to 1 vertical (1.5H:1V). Any excavation with water seeping into the excavation via groundwater is considered a Type C material.

## 5.3 Laterally Loaded Foundation Recommendations

Design of laterally loaded foundations should be based on the following recommendations. For unrestrained foundations with level backfill behind the foundation, we recommend that the walls be designed using an active lateral earth pressure of 45.0 pcf. For restrained walls, we recommend the wall be designed for an at rest lateral earth pressure of 70.0 pcf. A passive lateral earth pressure of 270.0 pcf is recommended for foundations supported on structural fill or native sand and gravel and incorporates a safety factor of 2.0, since full passive resistance is generally not mobilized. Sliding along the base should be analyzed using a friction factor of 0.55. Any surcharge load on the wall, such as traffic, floor slab live loads and construction equipment loads, should be based on a coefficient of lateral earth pressure of 0.5 over the full wall height. The maximum edge pressure of laterally loaded foundations should not exceed the recommended allowable bearing capacity of 3,000 psf.

5.4 Slab On Grade Recommendations

The finished floor of the proposed building can be constructed as a slab on grade floor provided the site is prepared according to the site preparation recommendations noted above. We recommend that the subbase course be at least 6.0 inches thick and be a well-graded sand and gravel meeting the material and gradation requirements of Item 304.12 or 304.14 subbase course, Type 2 or Type 4 material of the NYSDOT Standard Specifications, Construction and Materials. The subbase course should be compacted to at least 95 percent of the maximum dry density attainable through the Modified Proctor compaction test (ASTM D 1557). Provided that the base course is prepared as recommended, the slab on grades can be designed based on a subgrade modulus of 150 tons per cubic foot.

5.5 Seismic Recommendations

Based on our subsurface data, auger refusal was encountered in each boring and bedrock was encountered in boring B-4 at a depth of 13.7 feet. We believe the nature of the auger refusal to have been bedrock. For a site to be considered a Class A Seismic Design Site Classification, the subsurface profile within the top 100 feet would need to consist of hard bedrock with a shear wave velocity of greater than 5,000 feet per second (fps). Since soil shear wave velocity testing was not performed for this project, it is uncertain as to whether the bedrock would meet this requirement. Therefore, we recommend the site be considered a Class B Seismic Design Site Classification. Based on the 2020 New York State Building Code, the spectral response accelerations are  $S_s = 0.174g$  and  $S_1 = 0.064g$  for the site. Therefore, the  $SDS = 0.116g$  and the  $SDI = 0.042g$ .

5.6 Construction Monitoring

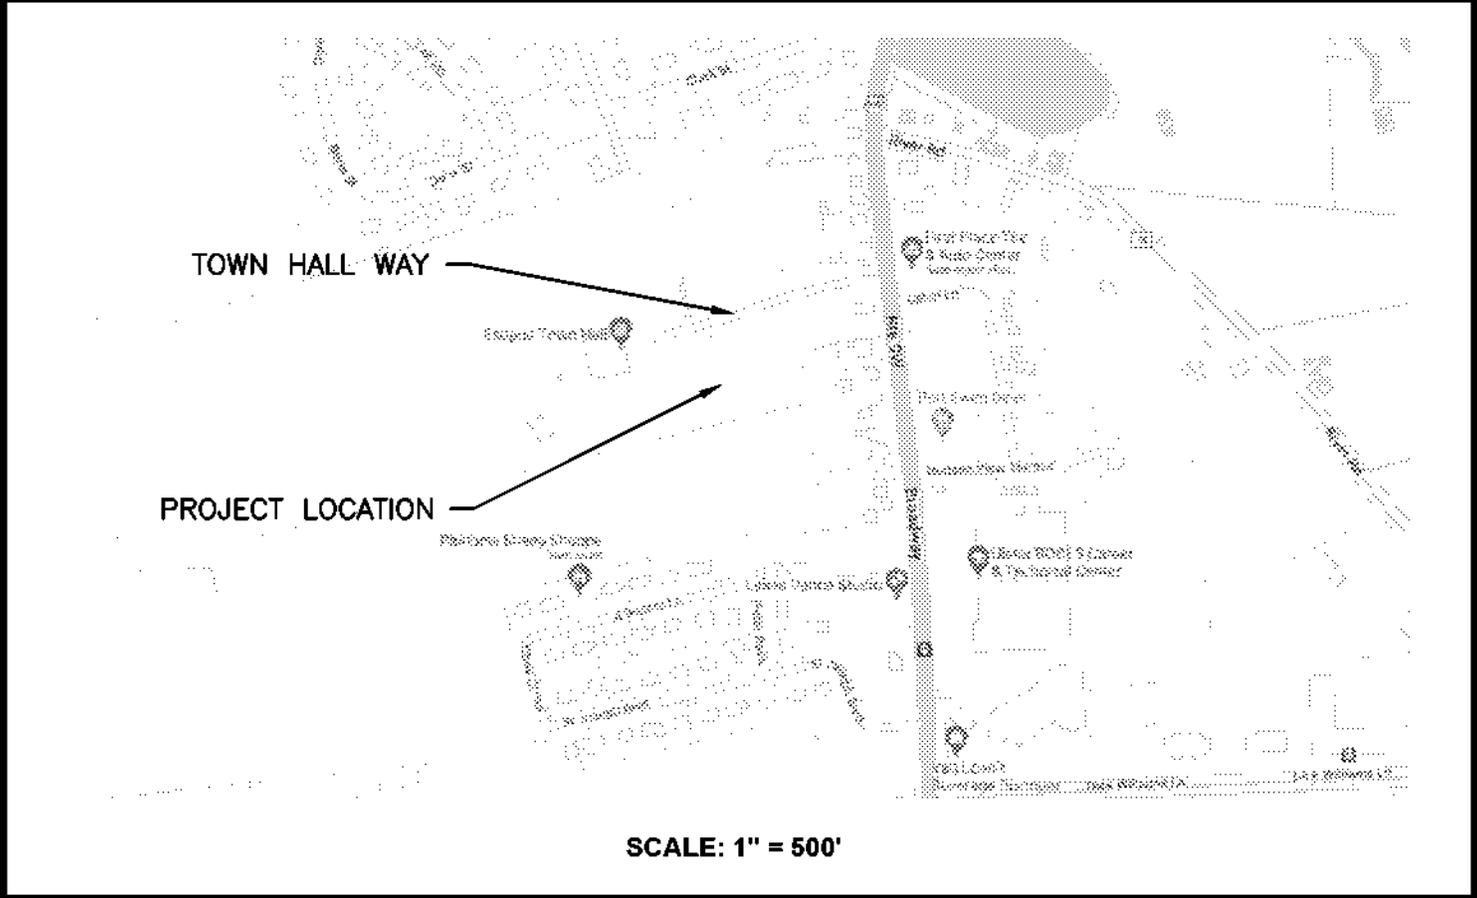

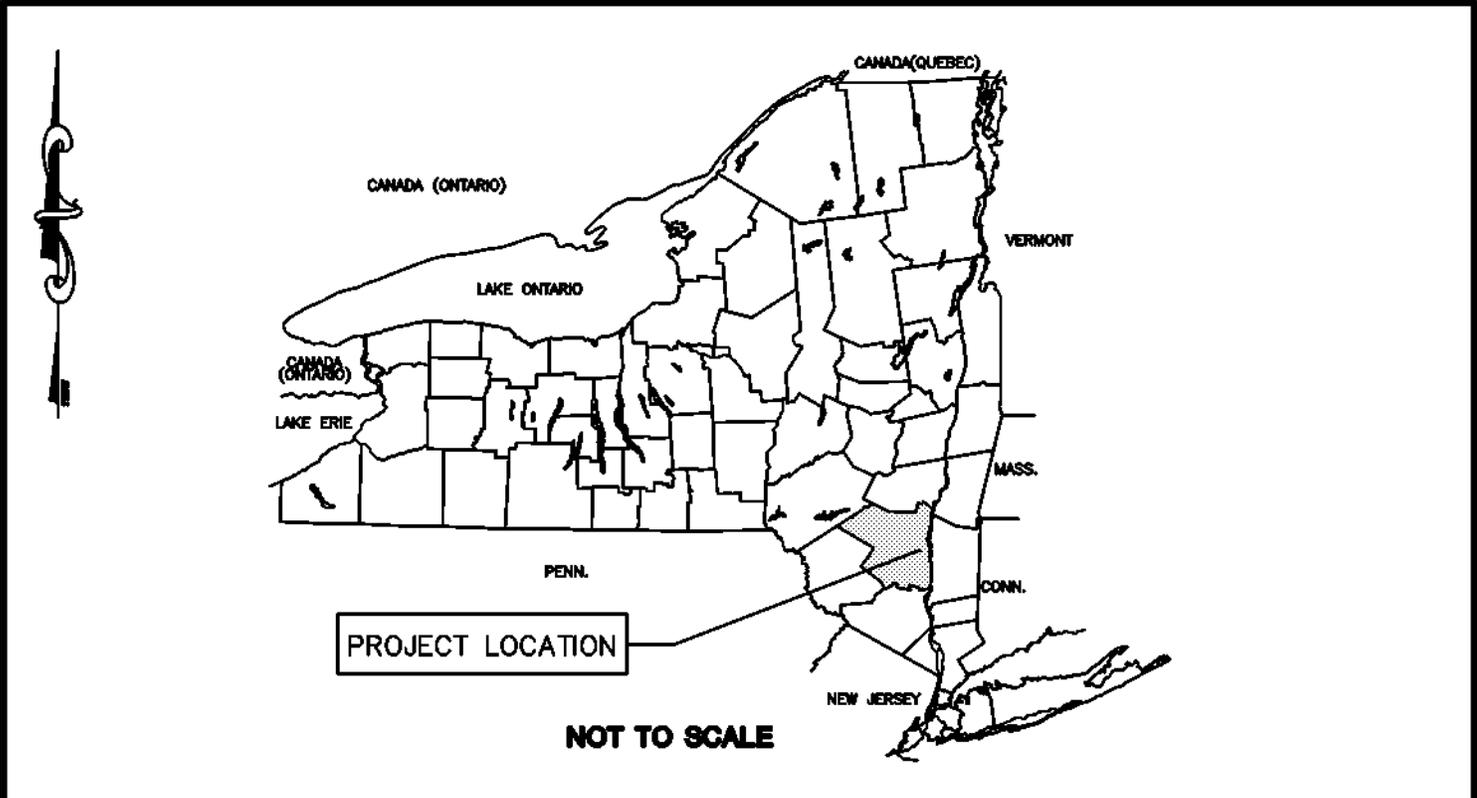

We recommend we be afforded the opportunity to review the plans and specifications as they relate to the foundation construction to ensure our recommendations have been properly interpreted and incorporated. Construction monitoring should include the inspection of the foundation bearing grades, observation of the proof rolling and any undercutting and backfilling, and review of in-place density testing.

The inspection of the foundation bearing grade and observation of any undercutting and backfill should be conducted by a geotechnical engineer or interim engineer with relevant experience and familiarity with the project. In-place density testing should be conducted by an engineering technician to document that the degree of compaction of fill and backfill is at least 95% of the maximum dry density attainable through the Modified Proctor compaction test (ASTM D1557).

These items should be included as required inspections or tests in the project Statement of Special Inspection and Testing in accordance with Chapter 17: Structural Tests and Special Inspections of the latest version of the International Building Code. As previously mentioned in this report, other items that should be included in the project Statement of Special Inspections should be to verify that the excavations are extended to the proper depth, excavations have reached the proper soil material, and that the soil materials are adequate to achieve the allowable bearing capacity.

## **APPENDIX B – SUBSURFACE LOGS**

<b>KEYSTONE ASSOCIATES, LLC.</b> 58 Exchange Street Binghamton, New York 13901 (607) 722-1100 Fax (607) 722-2515						<b>SUBSURFACE LOG</b>			Boring No.: B-1 Project No.: 93001 Date Started: 12/31/93 Date Completed: 12/31/93 Sheet 1 of 1	
Project: Location:						Surface Elevation: 100.0 Top of Well Elevation: 100.00				
Depth	Sample	Sample No.	Blows on Soil Sampler				N	Recovery	MATERIAL DESCRIPTION	REMARKS
			0.0-0.5'	0.5-1.0'	1.0-1.5'	1.5-2.0'				
1		1	2	2	3	5	2.0'	Topsoil - 0.3'	Water level at 2.0'	
								Brown SILT, Some fine-coarse Sand, trace clay (Moist - Loose)	with augers at 7.5'. At completion water level at 2.2'	
5								Grey SHALE, medium hard weathered, thin bedded, some fractures	with augers at 10.0'. Run #1: 3.0'-5.0' 95% Recovery, 50% RQD	

**TABLE I**

	Split Spoon Sample
	Shelby Tube Sample
	Auger or Test Pit Sample
	Rock Core

**TABLE II**

Identification of soil type is made on basis of an estimate of particle sizes, and in the case of fine grained soils also on basis of plasticity.

Soil Type	Soil Particle	
Boulder	> 12"	
Cobble	12" - 3"	
Gravel	- Coarse	3" - 3/4" Coarse Grained
	- Fine	3/4" - #4 (Granular)
Sand	- Coarse	#4 - #10
	- Medium	#10 - #40
	- Fine	#40 - #200
Silt-Non Plastic (Granular)		
Clay-Plastic (Cohesive)	< #200	Fine Grained

**TABLE III**

The following terms are used in classifying soils consisting of mixtures of two or more soil types. The estimate is based on weight of total sample.

Term	Percent of Total Sample
"and"	35 - 50
"some"	20 - 35
"little"	10 - 20
"trace"	1 - 10

(When sampling gravelly soils with a standard split spoon, the true percentage of gravel is often not recovered due to the relatively small sampler diameter.)

**TABLE IV**

The relative compactness or consistency is described in accord with the following terms.

Granular Soils		Cohesive Soils	
Term	Blows per Foot, N	Term	Blows per Foot, N
Loose	< 11	Very Soft	< 2
Firm	11 - 30	Soft	2 - 4
Compact	31 - 50	Medium	4 - 8
Very Compact	> 51	Stiff	8 - 15
		Very Stiff	15 - 30
		Hard	>30

(Large particles in the soils will often significantly influence the blows per foot recorded during the Penetration Test.)

**TABLE V**

Stratified Soils - Alternating, thick, thin with:

Descriptive Term	Thickness
Parting	- 0" - 1/16"
Seam	- 1/16" - 1/2"
Layer	- 1/2" - 12"
Stratum	- >12"
Varved Clay	- Alternating seams or layers of sand, silt & clay
Pocket	- small, erratic deposit, usually <12"
Lens	- lenticular deposit
Occasional	- one or less per foot of thickness
Frequent	- more than one per foot of thickness

TABLE VI

Rock Classification Terms		Term	Meaning
Hardness	Soft	Scratched by fingernail	
	Medium Hard	Scratched easily by penknife	
	Hard	Scratched with difficulty by penknife	
	Very Hard	Cannot be scratched by penknife	
Weathering	Very Weathered	Judged from the relative amounts of disintegration iron staining, core recovery, clay seams, etc.	
	Weathered		
	Sound		
Bedding	Laminated	Natural breaks in Rock Layers	<1"
	Thin bedded		1"-4"
	Bedded		4"-12"
	Thick bedded		12"-36"
	Massive		>36"
(Fracturing refers to natural breaks in the rock oriented at some angle to the rock layers.)			

## GENERAL INFORMATION &amp; KEY TO SUBSURFACE LOGS

The information presented in the following defines some of the procedures and terms used on the Subsurface Logs to describe the conditions encountered.

- The figures in the Depth column defines the scale of the Subsurface Log.
- The sample column shows, graphically, the depth range from which a sample was recovered. See Table I for a description of the symbols used to signify the various types of samples.
- The Sample No. is used for identification on sample containers.
- Blows on Sampler - shows the results of the "Penetration Test", recording the number of blows required to drive a split spoon sampler into the soil. The number of blows required for each six inches of penetration is recorded. The first 6 inches of penetration is considered to be a seating drive. The number of blows required for the second and third 6 inches of penetration is termed the penetration resistance, N. The outside diameter of the sampler, the hammer weight and the length of drop are noted at the bottom of the Subsurface Log.
- Recovery shows the length of the recovered soil sample for the sample device noted.
- All recovered soil samples are reviewed in the office by a technical specialist, geologist or geotechnical engineer, unless noted otherwise. The visual descriptions are made on the basis of a combination of the field descriptions and observations and the sample as received in the office. The method of visual classification is based primarily on the Unified Soil Classification (ASTM D 2487-83) with regard to the particle size and plasticity. (See Table No. II) Additionally, the relative portion, by weight, of two or more soil types is described for granular soils in accordance with "Suggested Methods of Test for Identification of Soils" by D.M. Burnister, ASTM Special Technical Publication 479, June 1970. (See Table No. III) The description of the relative soil density or consistency is based upon the penetration records as defined on Table No. IV. The description of the soil moisture is based upon the relative wetness of the soil as recovered and is described as damp, moist, wet and saturated. Water introduced in the boring either naturally or during drilling may have affected the moisture condition of the recovered sample. Special terms are used as required to describe materials in greater detail; several such terms are listed in Table V. When sampling gravelly soils with a standard two inch diameter split spoon, the true percentage of gravel is often not recovered due to the relatively small sampler diameter. The presence of boulders and large gravel is sometimes, but not necessarily, detected by an evaluation of the casing/hollow stem augers and samplers blows or through the "action" of the drill rig.
- The description of the rock shown is based on the recovered rock core and the field observations. The terms frequently used in the description are included in Table VI.
- The stratification lines represent the approximate boundary between soil types and the transition may be gradual. Solid stratification lines are based on the field observations.
- Miscellaneous observations and procedures noted in the field are shown in this column, including water level observations. It is important to realize the reliability of the water level observations depends upon the soil type (water does not readily stabilize in a hole through fine grained soils), and that drill water used to advance the boring may have influenced the observations. The groundwater level typically will fluctuate seasonally. One or more perched or trapped water levels may exist in the ground seasonally. All the available readings should be evaluated. If definite conclusions cannot be made, it is often prudent to examine the conditions more thoroughly through test pit excavations or monitoring wells.
- The length of core run is defined as the length of penetration of the core barrel. Core recovery is the length of core recovered divided by the core run. The RQD (Rock Quality Designation) is the total pieces of NX core exceeding 4 inches in length divided by the core run. The size of the core barrel used is also noted.

The Subsurface Logs attached to this report present the observations and mechanical data collected at the site, supplemented by classification of material removed from the borings as determined through visual identification. It is cautioned that the materials removed from the borings represent only a fraction of the total volume of the deposits at the site and may not necessarily be representative of the subsurface conditions between adjacent borings or between the sampled intervals. The data presented on the Subsurface Logs together with the recovered samples will provide a basis for evaluating the character of the subsurface conditions relative to the project. The evaluation must consider all the recorded details and their significance relative to each other. Often analyses of boring data indicate the need for additional testing or sampling procedures to more accurately evaluate the subsurface conditions. Any evaluation of the contents of this report and the recovered samples must be performed by knowledgeable Professionals.
