NEWBURGH ENLARGED CITY SCHOOL DISTRICT
NEW CTE BUILDING

201 Fullerton Ave, Newburgh, NY 12550
ISSUED FOR BID: 4/15/2024

CSARCH - ARCHITECTS & M.E. ENGINEERS
ME ENGINEERING - PLUMBING & TECHNOLOGY ENGINEERS
PASSERO ASSOCIATES - CIVIL & STRUCTURAL ENGINEERS
FOOD SERVICE DESIGN STUDIOS - FOOD SERVICE DESIGNER
AVL DESIGNS,INC. - AUDIO VISUAL
JACOBS PROJECT MANAGEMENT CO. - PROJECT MANAGER

STATE EDUCATION DEPARTMENT PROJECT CONTROL NUMBER:
44-16-00-01-0-053-001

THE DESIGN OF THIS PROJECT CONFORMS TO APPLICABLE PROVISIONS OF THE NEW YORK STATE UNIFORM FIRE PREVENTION AND BUILDING CODE, THE NEW YORK STATE ENERGY CONSERVATION CONSTRUCTION CODE, AND THE MANUAL OF PLANNING STANDARDS OF THE NEW YORK STATE EDUCATION DEPARTMENT.

CSArch PROJECT NO. 108-2303

Sheet No.

CTE EG000

CONSTRUCTION DOCUMENTS

Autodesk Docs://NECSD - New CTE Bldg/108-2303 NECSD CTE - MEP.rvt

SHEET NOTES

A. UNLESS OTHERWISE NOTED, ALL UNDERGROUND LIGHTING CIRCUITS SHALL BE FED WITH 1"C – 2#10,1#10G.

B. SEE SITE CIVIL PLANS FOR EXTERIOR LIGHTING FIXTURE SCHEDULE AND DETAILS.

C. ALL SITE LIGHTING IS TO BE CONTROLLED VIA A PHOTOSENSOR WITH A TIMED OVERRIDE. PROVIDE PHOTOSENSOR AT ROOF OF BUILDING FACING NORTH, COORDINATE LOCATION IN–FIELD. PROVIDE OTHER RELATED CONTROL DEVICES ADJACENT TO PANELBOARD SERVING THE SITE LIGHTING (LRC–1).

KEY NOTES

ES1	NEW UTILITY–OWNED POLE. COORDINATE WITH CENTRAL HUDSON FOR EXACT LOCATION AND INSTALLATION REQUIREMENTS FOR RELATED CONDUIT. PRIMARY CABLING TO MAIN TRANSFORMER TO BE INSTALLED BY UTILITY.
ES2	PROVIDE A 2–SECTION HAND HOLE FOR FUTURE VEHICLE CHARGING STATION. COORDINATE LOCATION ON–SITE WITH OWNER PRIOR TO INSTALLATION.
ES3	PROVIDE A 2–SECTION HAND HOLE FOR FUTURE BUILDING SIGNAGE. COORDINATE LOCATION ON–SITE WITH OWNER PRIOR TO INSTALLATION.
ES4	PROVIDE (2) EMPTY 2"C WITH PULL CORDS. STUB UP AND CAP CONDUIT WITHIN THE BUILDING AT THE LOCATION INDICATED, AND LABEL CONDUIT FOR ITS FUTURE USE.
ES5	EXISTING UTILITY–OWNED POLE. COORDINATE WITH CENTRAL HUDSON FOR EXACT LOCATION AND INSTALLATION REQUIREMENTS FOR RELATED CONDUIT. COORDINATE WITH TECHNOLOGY DRAWINGS FOR FIBER DETAILS.
ES6	PROVIDE (2) 4"C W/ PULLCORD BETWEEN UTILITY–OWNED POLE AND UTILITY–OWNED TRANSFORMER. COORDINATE WITH UTILITY FOR ROUTING. UTILITY TO PROVIDE WIRING.
ES7	PROVIDE (2) 3"C W/ PULLCORD BETWEEN UTILITY–OWNED POLE AND MDF ROOM LOCATED ON THE SECOND FLOOR. COORDINATE WITH TECHNOLOGY DRAWINGS FOR FIBER DETAILS.
ES8	FLAGPOLE LIGHTING (TYPICAL OF THREE). PROVIDE FIXTURES WITH ON/OFF CONTROL INDEPENDENT OF OTHER SITE LIGHTING FIXTURES.

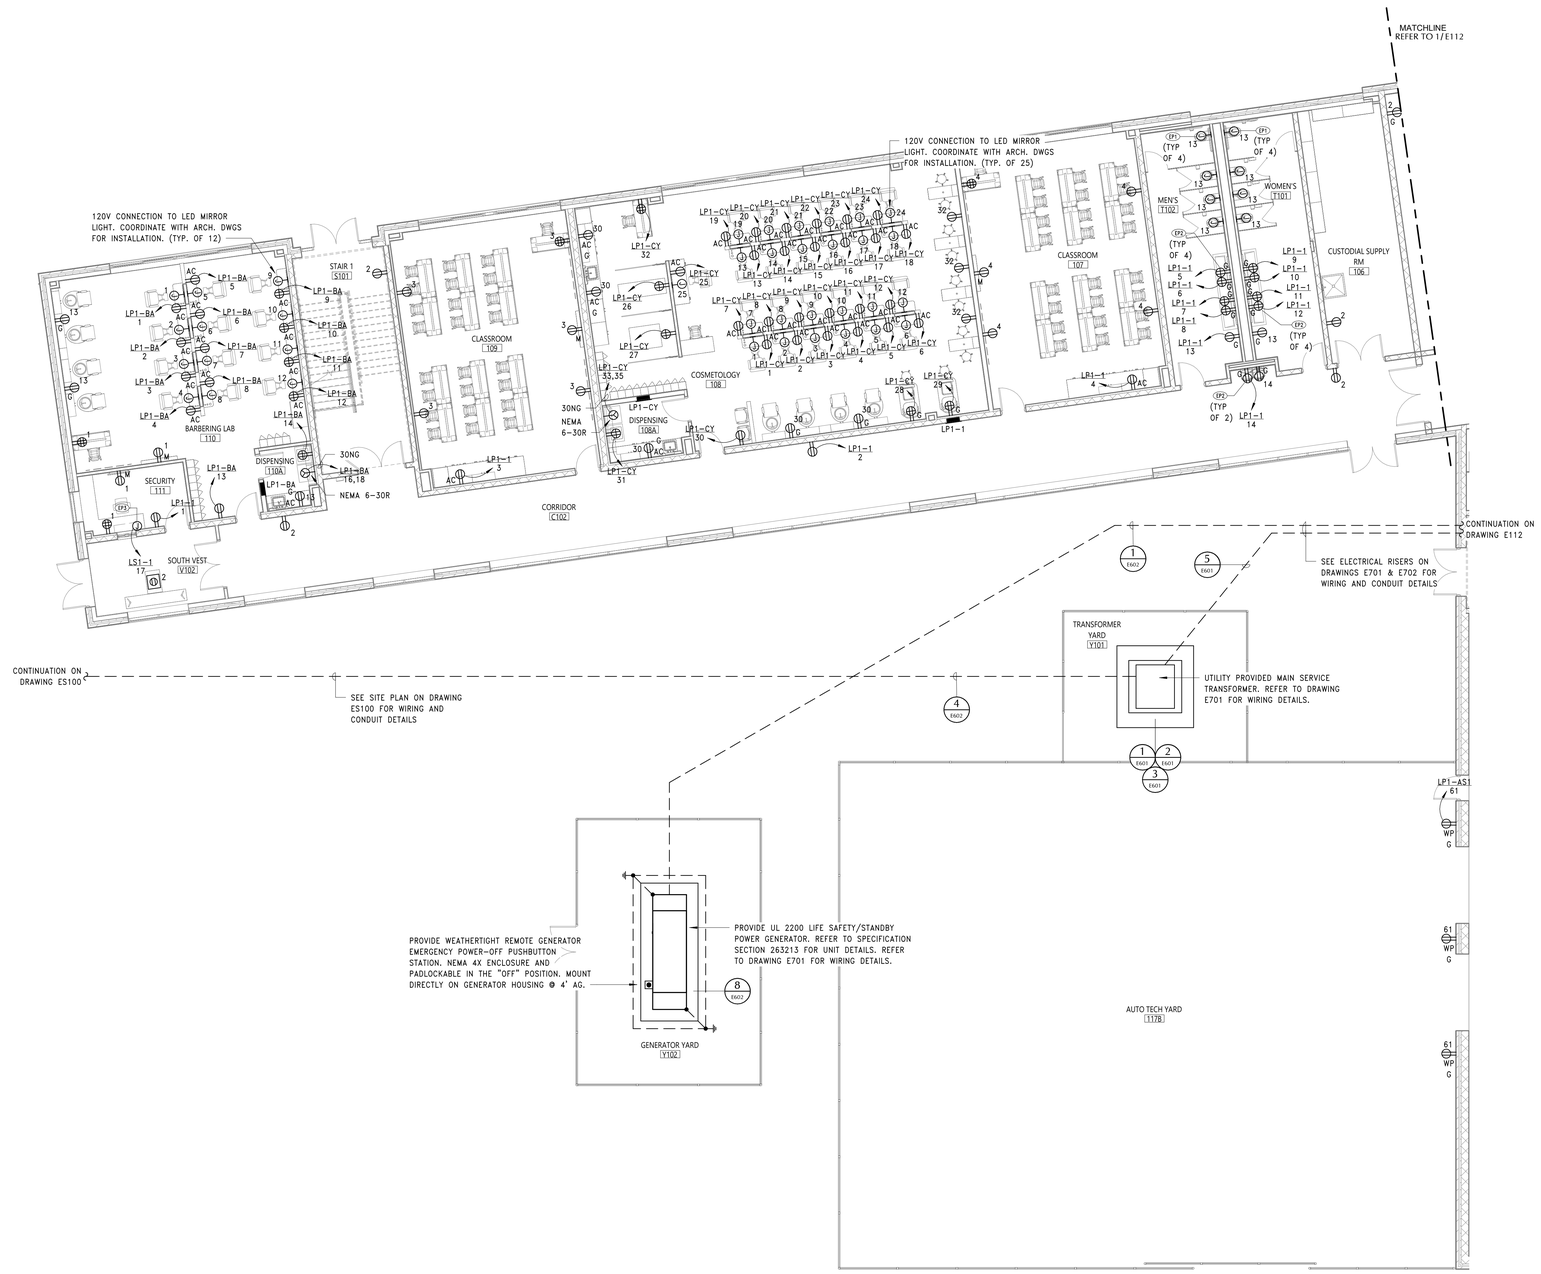
ELECTRICAL SITE PLAN

Sheet No.

CTE ES100

CONSTRUCTION DOCUMENTS

Autodesk Docs://NECSD - New CTE Bldg/108-2303 NECSD CTE - MEP.rvt



SHEET NOTES

A. FIELD COORDINATE ROUTING OF ALL FEEDERS AND BRANCH CIRCUITS WITH ALL TRADES. MAJORITY OF SPACES ARE OPEN CEILING, COORDINATE HARDPIPE ROUTING WITH COORDINATED MODEL PRIOR TO INSTALLATION.

B. ALL PENETRATIONS THROUGH FIRE RATED WALLS AND FLOORS SHALL BE PROPERLY FIRE-STOPPED.

C. COORDINATE ALL RECEPTACLE LOCATIONS WITH ARCHITECTURAL CASEWORK AND FURNITURE PLANS.

D. REFER TO E701 FOR POWER RISERS AND WIRING SCHEDULES.

E. REFER TO E900 SERIES DRAWINGS FOR EQUIPMENT AND PANELBOARD SCHEDULES.

KEY NOTES

EP1	FLUSHOMETER. COORDINATE WIRING REQUIREMENTS WITH PLUMBING DRAWINGS.
EP2	COORDINATE INSTALLATION OF RECEPTACLE BEHIND FIXTURE WITH PLUMBING DRAWINGS. RECEPTACLE INSTALLATION MUST BE COMPLETED ALLOWING FOR EASE OF ACCESSIBILITY.
EP3	FIRE SHUTTER. COORDINATE WITH ARCHITECTURAL DRAWING FOR CONTROL REQUIREMENTS. PROVIDE CONDUIT, CABLING, AND/OR BACKBOXES AS REQUIRED, AND CONNECT TO LOCAL SMOKE DETECTOR.

KEY PLAN

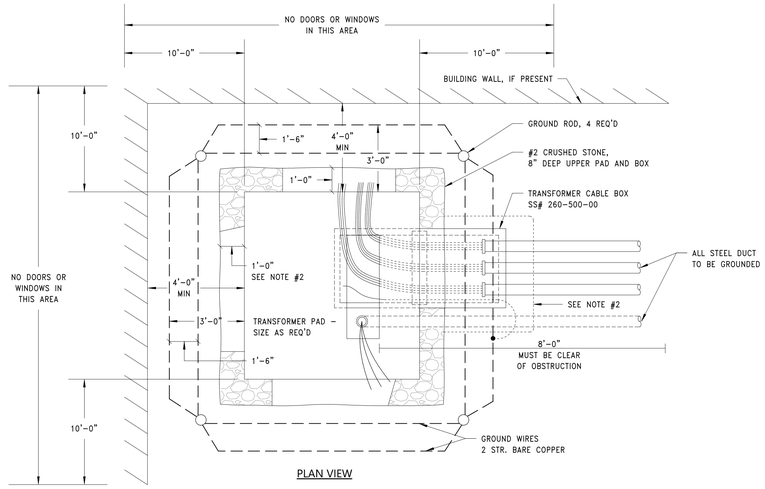
* USED FOR CONVERSION OF SUBMERSIBLE TRANSFORMER INSTALLATION TO A PADMOUNTED INSTALLATION. THIS UNIT IS 4" THICK NOT 6".

** 750KVA WILL FIT ON BOTH THIS PAD AND SS# 262-781-00. USE THE LARGER PAD WHERE TRANSFORMER SIZE MAY BE INCREASED IN THE FUTURE.

NOTES:
1. REINFORCE WITH GRADE 60 #4 BARS ON 6" CENTERS BOTH WAYS
2. 4000 PSI CONCRETE AT 28 DAYS
3. TOP AND BOTTOM TO BE SMOOTH FINISH

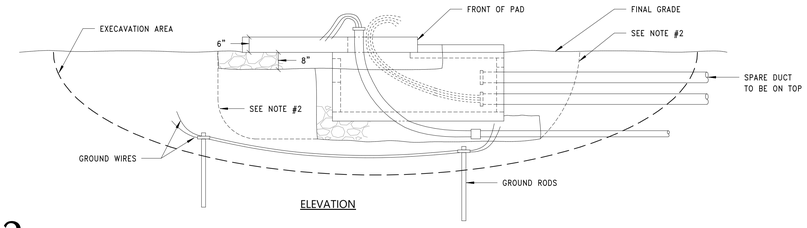
3 UTILITY PADS-SIZING THREE PHASE TRANSFORMERS
E601 NTS



PLAN VIEW

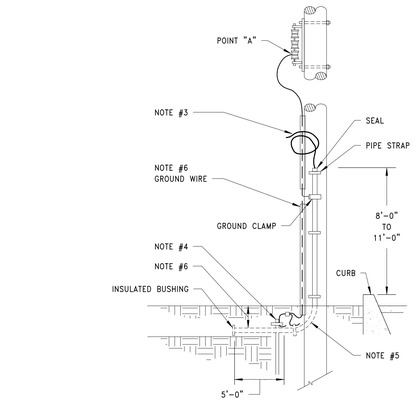
1. USE STEEL AND CONCRETE BUMPER PROTECTORS WHEN IN TRAFFIC AREAS.

2. IF PAD LOCATION IS 4' TO 10' FROM BUILDING, THE #2 STONE SHALL BE INSTALLED 3' DEEP, AS A SUMP TO COLLECT AN OIL SPILL. THIS SUMP SHALL HAVE PROPER DRAINAGE.



ELEVATION

2 UTILITY PADMOUNTED TRANSFORMER INSTALLATION
E601 NTS



1. ALL INSTALLATIONS SHALL BE IN ACCORDANCE WITH THE NEC AND ALL APPLICABLE CODES AND STANDARDS.

2. ALL INSTALLATIONS SHALL BE INSPECTED BY THE AUTHORITY HAVING JURISDICTION.

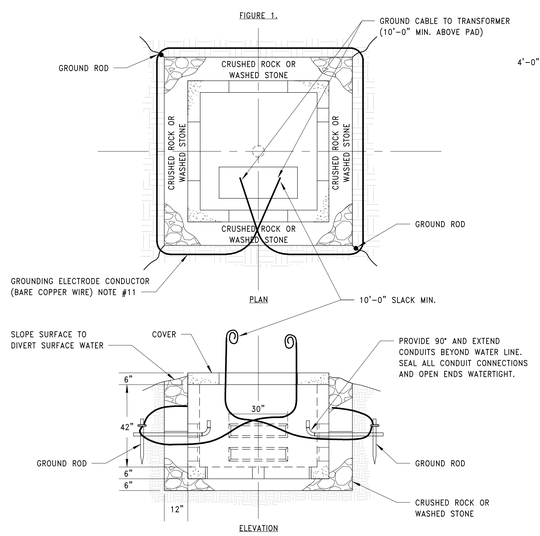
3. UTILITY PROVIDED CABLE. COORDINATE WITH UTILITY FOR DETAILS.

4. PROVIDE AND INSTALL A GROUND ROD AND GROUND WIRE OF SUFFICIENT LENGTH TO EXTEND 4" ABOVE POINT "A". INSTALL GROUND CLAMPS. (1) BELOW GRADE. (1) ABOVE GRADE, AS SHOWN. GROUND WIRE TO BE INSTALLED IN SERVICE CONDUIT OR SHALL BE PROTECTED BY PLASTIC MOLDING. UTILITY TO MAKE GROUND CONNECTION AT POINT "A". ADDITIONAL GROUND ROD (REQUIRED FOR PRIMARY RISERS) TO BE CONNECTED WITH CONTINUOUS WIRE LOOPED THROUGH ROD CONNECTORS AT A MINIMUM DISTANCE OF 6 FEET FROM FIRST GROUND ROD.

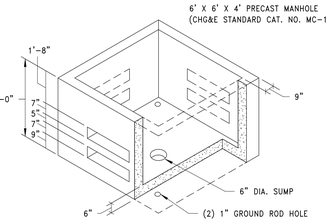
5. MIN. 2" GALV. STEEL SCH. 80 PVC CONDUIT WITH 90° LONG RADIUS BEND. TO BE FURNISHED AND INSTALLED UNDER CONTRACT. ADEQUATE DRAINAGE SHALL BE PROVIDED AT BOTTOM OF THE BEND. RISERS ON POLES ALONG ROADWAYS MUST BE GALV. STEEL, AND MUST BE INSTALLED UNDER CONTRACT ON THE FIELD SIDE OF THE POLE AWAY FROM APPROACHING TRAFFIC. ALL RISERS INSTALLED ON POLES IN EXCESS OF 12' FROM ROADWAYS SHALL HAVE STAND-OFF BRACKETS SUITED TO PIPE SIZE AND TYPE AND FIRMLY LAG-BOLTED TO POLE. STAND-OFF BRACKETS SHALL BE INSTALLED AT INTERVALS OF 8 FEET MINIMUM.

6. ALL UNDERGROUND CABLE INSTALLATION REQUIREMENTS, INCLUDING COVER REQUIREMENTS. GROUNDING, AND PROTECTION FROM DAMAGE SHALL BE IN ACCORDANCE WITH ARTICLE 300 OF THE NEC.

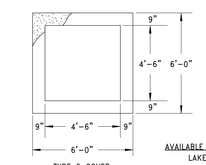
4 UNDERGROUND SERVICE FROM OVERHEAD LINE DETAIL
E601 NTS



ELEVATION

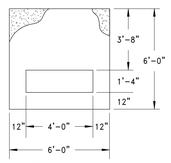


NOTES:
1. REINFORCED CONCRETE.
2. KNOCKOUTS - 7" X 30", 2 PER SIDE, FOUR SIDES.
WEIGHT:
BOX - 7899 LBS.
COVER - 2370 LBS.

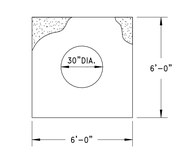


TYPE 2 COVER
(CHG&E STANDARD CAT. NO. MC - 102)

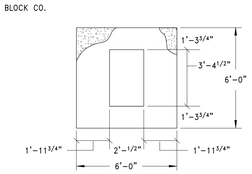
AVAILABLE MANUFACTURERS:
LAKELANDS H.V.
WOODARDS CONCRETE
LHV PRECAST INC.
CRANESVILLE BLOCK CO.



750 - 2000 KVA
(CHG&E STANDARD NO. MC - 101M)



TYPE 1 MANHOLE COVER
(CHG&E STANDARD CAT. NO. MC - 103)



TYPE 4 COVER
(CHG&E STANDARD CAT. NO. MC - 102M)

1. PROVIDE THE PAD FOR THREE PHASE PAD-MOUNTED TRANSFORMERS. THE STANDARD IS INTENDED AS A GUIDE FOR PROVIDING THE SPECIFICATIONS FOR PAD INSTALLATIONS APPLICABLE TO PAD-MOUNTED TRANSFORMERS OF VARIOUS KVA SIZE AND DIMENSIONS. THE STANDARD INSTALLATION USES A PRE-CAST CONCRETE BASE AND COVER. THE CONCRETE BASE IS OF UNIFORM SIZE AND UTILIZES COVERS WITH DIFFERENT SIZED WINDOW OPENINGS TO ACCOMMODATE THE KVA SIZE OF THE PAD-MOUNTED TRANSFORMER. DETAILED SPECIFICATIONS AND INSTALLATION REQUIREMENTS ARE PROVIDED IN PAGES 1 TO 3 OF THIS STANDARD.

2. THE SIDES AND REAR OF THE PAD SHALL BE A MINIMUM OF TEN (10) FEET FROM THE WINDOWS AND FIRE ESCAPES AND A MINIMUM OF THREE (3) FEET (10 FEET PREFERRED) FROM ALL BUILDINGS, FENCES, OR OTHER OBSTRUCTIONS WHICH WILL IMPEDE THE FREE FLOW OF COOLING AIR AROUND THE TRANSFORMER. THE FRONT OF THE PAD (WINDOW SIDE) SHALL HAVE A MINIMUM OF TEN (10) FEET OF UNOBSTRUCTED WORKING SPACE.

3. ACCESS TO PAD AREA BY VEHICLE MUST BE POSSIBLE AT ALL TIMES TO INSURE PROPER OPERATION AND MAINTENANCE FUNCTIONS.

4. STONE FOR BASE AND SIDES OF THE BOX PAD SHALL BE 3/4" MINIMUM TO 1-1/2" MAXIMUM CRUSHED ROCK OR WASHED STONE. 1/2" CRUSHED ROCK OR WASHED STONE MAY BE USED FOR TOP 6" IN LOCATIONS WHERE WINDOW BREAKAGE MAY BE A PROBLEM. FOR THE BASE, STONE SHALL BE PLACED ON UNDISTURBED OR WELL TAMPED EARTH.

5. AREA AROUND THE BOX PAD SHALL BE GRADED SO THAT SURFACE WATER WILL DRAIN AWAY FROM CRUSHED STONE OIL CONTAINMENT.

6. THE BOX PAD SHALL BE INSTALLED SUCH THAT THE TOP SURFACE IS LEVEL TO WITHIN 1/4" HIGH TO LOW.

7. IN GENERAL. 5" CONDUIT SHOULD BE USED FOR BOTH PRIMARY AND SECONDARY CONDUCTORS. HOWEVER THE SECONDARY CONDUIT SHOULD BE SIZED ACCORDING TO THE SECONDARY CONDUCTORS BEING INSTALLED.

8. PERMANENT SUPPORT SHALL BE PROVIDED FOR THE SECONDARY CONDUCTORS SUCH THAT THE TOTAL WEIGHT SUPPORTED BY EACH TRANSFORMER BUSHING SHALL NOT EXCEED TEN (10) POUNDS. THUS SINGLE RUNS OF 500 MCM COPPER AND LARGER, 1000 MCM AL AND LARGER AND PRACTICALLY ALL MULTIPLE CONDUCTOR RUNS NEED TO BE SUPPORTED TO LIMIT THE STRESS ON THE BUSHINGS.

9. THE UTILITY RESERVES THE RIGHT TO REQUIRE SUITABLE BARRIERS IN TRAFFIC AREAS TO REDUCE THE PROBABILITY OF DAMAGE DUE TO TRUCKS, AUTOMOBILES, CONSTRUCTION EQUIPMENT, AND THE LIKE. SUITABLE BARRIERS MIGHT BE 4" (MINIMUM) STEEL PIPE, FILLED WITH CONCRETE, SET FOUR (4) FEET DEEP AND EXTENDING 3 TO 4 FEET ABOVE GROUND. BARRIERS SHOULD BE SET BEYOND THE OIL CONTAINMENT IN LOCATIONS WHICH WILL INTERCEPT VEHICLES YET NOT INTERFERE WITH THE INSTALLATION OR REMOVAL OF THE TRANSFORMER.

10. ALL GROUNDING MUST BE IN ACCORDANCE WITH COMPANY SPECIFICATIONS.

11. SIZE THE GROUNDING ELECTRODE CONDUCTOR AS FOLLOWS:
A) 200A AND SMALLER SECONDARY SERVICES: #4 AWG COPPER
B) 400A SECONDARY SERVICES: #1/0 AWG COPPER
C) LARGER THAN 400A SECONDARY SERVICES: #3/0 AWG COPPER

WIRING SCHEDULE NOTES:

1. SUITABLE FOR NEC RACEWAY TYPES: RMC, EMT, FMC, LFMC, AND PVC SCHEDULE 40. VALUES SHOWN ARE BASED ON NEC CHAPTER 9 TABLES 4 (ABOVE RACEWAY TYPES) AND 5 (THHN/THWN/THWN-2 INSULATION), 40% MAXIMUM CONDUIT FILL, AND JAMMING RATIO > 3.2 (RIGID CONDUIT TYPES ONLY). ADJUST SIZE FOR OTHER RACEWAY TYPES REQUIRED FOR A GIVEN APPLICATION IN ACCORDANCE WITH THE PROJECT DRAWINGS AND SPECIFICATIONS.
2. BASED ON NEC TABLE 310.16 (75oC CONDUCTOR TEMPERATURE RATING), WITH AMPACITY OF PHASE/NEUTRAL CONDUCTORS EQUAL TO OR GREATER THAN OCPD RATING.
3. FROM NEC TABLE 250.122.

SHOPS SCHEDULE NOTES:
1. FOR EACH DIRECT CONNECTION UNIT, PROVIDE LOCAL DISCONNECT WITHIN SITE OF UNIT. COORDINATE LOCATION IN-FIELD WITH ARCHITECT.
2. FOR PAINT BOOTH UNITS, PROVIDE FIRE ALARM RELAY TO SHUTDOWN PAINT BOOTH IN THE EVENT OF AN ALARM.
3. A038.1 SHALL BE PROVIDED WITH ITS OWN UNIT MOUNTED DISCONNECT.

LIGHTING FIXTURE SCHEDULE NOTES:
1. PROVIDE FIXTURE WITH BRANCH CIRCUITY FROM BOTH A NORMAL AND LIFE SAFETY POWER SOURCE. EMERGENCY CIRCUIT INDICATED ON DRAWINGS. SOURCE NORMAL POWER FROM LOCAL LIGHTING CIRCUIT.
2. COORDINATE INSTALLATION OF LIGHTING FIXTURE WITH ARCHITECTURAL GRID SYSTEM. PROVIDE INSTALLATION UNDER SUPERVISION OF GENERAL CONTRACTOR.
3. COORDINATE LENGTHS OF FIXTURES WITH CONTRACT DRAWINGS.

LIGHTING SEQUENCE OF OPERATION

SEQUENCE – TYPICAL CLASSROOM
1. VACANCY SENSOR(S) FOR AUTO-OFF OF ALL FIXTURES AFTER 30 MIN. TIME DELAY.
2. DAYLIGHT SENSOR(S) TO ACTUATE PRESET DIMMING LEVEL FOR GENERAL ILLUMINATION FIXTURES ONLY, BASED ON DAYLIGHT AVAILABLE IN SPACE, WITH DIM-TO-OFF FUNCTIONALITY.
3. (2) 3 BUTTON WALL STATION:
   BUTTON 1-1: ON/OFF CONTROL OF GENERAL ILLUMINATION FIXTURES.
   BUTTON 1-2: DIM UP OF GENERAL ILLUMINATION FIXTURES.
   BUTTON 1-3: DIM DOWN OF GENERAL ILLUMINATION FIXTURES.
   BUTTON 2-1: ON/OFF CONTROL OF TEACHER'S LIGHT FIXTURE (4' SEGMENT).
   BUTTON 2-2: DIM UP CONTROL OF TEACHER'S LIGHT FIXTURE (4' SEGMENT).
   BUTTON 2-3: DIM DOWN CONTROL OF TEACHER'S LIGHT FIXTURE (4' SEGMENT).

SEQUENCE – TYPICAL OFFICE
1. OCCUPANCY SENSOR(S) FOR AUTO-ON/OFF OF ALL FIXTURES AFTER 30 MIN. TIME DELAY.
2. (2) 3 BUTTON WALL STATION:
   BUTTON 1: ON/OFF CONTROL OF GENERAL ILLUMINATION FIXTURES.
   BUTTON 2: DIM UP OF GENERAL ILLUMINATION FIXTURES.
   BUTTON 3: DIM DOWN OF GENERAL ILLUMINATION FIXTURES.

SEQUENCE – TYPICAL CORRIDOR/BATHROOM/KITCHEN/SHOPS/LOCKER ROOMS/CULINARY
1. (2) DIGITAL KEY SWITCHES, ONE LABELED 'EMERGENCY':
   SWITCH 1: ON/OFF CONTROL OF GENERAL ILLUMINATION FIXTURES.
   SWITCH 2: ON/OFF CONTROL OF EMERGENCY ILLUMINATION FIXTURES.

SEQUENCE – TYPICAL STORAGE
1. OCCUPANCY SENSOR(S) FOR AUTO-ON/OFF OF ALL FIXTURES AFTER 15 MIN. TIME DELAY.
2. (1) 2 BUTTON WALL STATION:
   BUTTON 1: ON CONTROL OF GENERAL ILLUMINATION FIXTURES.
   BUTTON 2: OFF CONTROL OF GENERAL ILLUMINATION FIXTURES.

SEQUENCE – TYPICAL ELECTRICAL/MECHANICAL SPACE
1. (1) 2 BUTTON WALL STATION:
   BUTTON 1: ON/OFF CONTROL OF GENERAL ILLUMINATION FIXTURES.
   BUTTON 2: ON/OFF CONTROL OF EMERGENCY ILLUMINATION FIXTURES.

SEQUENCE – BARBERING, COSMETOLOGY, FASHION LAB
1. VACANCY SENSOR(S) FOR AUTO-OFF OF ALL FIXTURES AFTER 30 MIN. TIME DELAY .
2. DAYLIGHT SENSOR(S) TO ACTUATE PRESET DIMMING LEVEL FOR GENERAL ILLUMINATION FIXTURES ONLY, BASED ON DAYLIGHT AVAILABLE IN SPACE, WITH DIM-TO-OFF FUNCTIONALITY .
3. 3 BUTTON WALL STATION:
   BUTTON 1: ON/OFF CONTROL OF GENERAL ILLUMINATION FIXTURES.
   BUTTON 2: DIM UP OF GENERAL ILLUMINATION FIXTURES.
   BUTTON 3: DIM DOWN OF GENERAL ILLUMINATION FIXTURES.
4. PROVIDE ADDITIONAL 2 BUTTON STATION(S) FOR ON/OFF CONTROL OF TRACK LIGHTING. COORDINATE WITH OWNER FOR COUNT AND ZONING.

SEQUENCE – CAFETERIA
1. OCCUPANCY SENSOR(S) FOR AUTO-ON/OFF OF ALL FIXTURES AFTER 30 MIN. TIME DELAY.
2. GRAPHIC WALL PANEL CONTROLLER:
   PROVIDE FOUR ZONES OF LIGHTING CONTROL FOR GENERAL & EMERGENCY FIXTURES.
3. (2) DIGITAL KEY SWITCHES, ONE LABELED 'EMERGENCY':
   SWITCH 1: ON/OFF CONTROL OF GENERAL ILLUMINATION FIXTURES.
   SWITCH 2: ON/OFF CONTROL OF EMERGENCY ILLUMINATION FIXTURES.

GENERAL NOTES:
- ALL EMERGENCY WALL SWITCHES MUST BE PROPERLY IDENTIFIED AS 'EMERGENCY LIGHTING CONTROL' ON THE SWITCHES WALLPLATES.
- ALL EMERGENCY POWER PACKS/ROOM CONTROL MUST BE UL924 LISTED.

CONSTRUCTION DOCUMENTS

Autodesk Docs://NECSD - New CTE Bldg/108-2303.NECSD.CTE - MEP.rvt

FIRE ALARM SYSTEM NOTES

1. ALL WIRING, POWER, CONDUCTORS, CONDUITS ETC. SHALL MEET THE 2014 NATIONAL ELECTRICAL CODE AND 2013 NFPA 72.
2. ALL FIRE ALARM CIRCUITS SHALL BE SIZED TO A MAXIMUM OF 80% OF CAPACITY.
3. ALL FIRE ALARM CIRCUITS SHALL BE WIRED NFPA STYLE 4/Y/B (CLASS B) WITH THE EXCEPTION OF THE NETWORK CIRCUIT WHICH SHALL BE NFPA STYLE 7 (CLASS A WITH ISOLATION). DUAL CLASS B NETWORKING IS NOT STYLE 7 AND WILL NOT BE APPROVED. ALL AUDIBLE AND VISUAL CIRCUITS SHALL BE STYLE Y/CLASS B.
4. CONDUITS MAY NOT ENTER THE TOP OF ANY FIRE ALARM EQUIPMENT CABINET.
5. ALL FIRE ALARM EQUIPMENT SHALL BE INSTALLED WITH AESTHETICS IN MIND. CABINETS SHALL BE SEMI FLUSH MOUNTED AND CABLE TRAYS SHALL BE HIDDEN.
6. ALL FIRE ALARM CABINETS AND JUNCTION BOXES SHALL BE PAINTED FIRE DEPARTMENT RED. ALL FIRE ALARM CABINETS SHALL BE CLEARLY LABELED WITH A LAMINATE ENGRAVED LABEL.
7. ALL FIRE ALARM WIRE SHALL BE CLEARLY LABELED IN JUNCTION BOXES AND CABINETS. ALL TERMINALS SHALL BE NUMBERED AND LABELED. ALL CONNECTIONS SHALL BE EITHER SOLDERED, APPROVED TERMINAL STRIPS OR SCOTCH LOCKS.
8. ALL LOW VOLTAGE FIRE ALARM CONDUCTORS SHALL BE PROTECTED BY EITHER BUILDING CONSTRUCTION OR CONDUIT TO 8 FEET ABOVE THE FINISHED FLOOR. LOADING DOCKS, GARAGES, SUPPRESSION AND EXTINGUISHING SYSTEM WIRING, MECHANICAL AND ELECTRICAL ROOMS AND OTHER LOCATIONS SUBJECT TO MECHANICAL DAMAGE SHALL BE IN FULL RIGID CONDUIT. IN ALL OTHER AREAS, 2-HOUR RATED FIRE ALARM WIRE MAY BE RUN WITHOUT CONDUIT ABOVE 8 FT.
9. FIRE ALARM CABLES SHALL NOT BE MIXED WITH NON FIRE ALARM CABLING. LOW VOLTAGE FIRE ALARM CABLING SHALL NOT BE MIXED OR WIRED NEAR ANY AC CIRCUIT.
10. ALL LOW VOLTAGE WIRING SHALL BE FPLP 150 DEGREE C UL LISTED FIRE ALARM WIRE. ALL NOTIFICATION CIRCUITS SHALL BE A MINIMUM OF 14 AWG AND ALL OTHER LOW VOLTAGE FIRE ALARM CIRCUITS SHALL BE 16 AWG MINIMUM.
11. POLARITY SHALL BE OBSERVED ON ALL CIRCUITS. T-TAPPING SHALL NOT BE ALLOWED ON ANY NOTIFICATION CIRCUITS (HORN, STROBE OR SPEAKER). T-TAPPING SHALL NOT BE PERMITTED ON ADDRESSABLE CIRCUITS WITHOUT THE EXPRESS PERMISSION OF THE ENGINEER.
12. ALL WIRING SHALL BE INSPECTED TO ASSURE THERE ARE NO OPENS, SHORTS OR EARTH GROUNDS.
13. SHIELDED CONDUCTORS OR RUNNING IN SEPARATE RACEWAY SHALL BE AS INSTRUCTED BY THE FIRE ALARM MANUFACTURER'S DOCUMENTATION. ALL NON-POWER LIMITED WIRING, INCLUDING CIRCUITS FOR CENTRALIZED AMPLIFIERS SHALL BE RUN IN A SEPARATE RACEWAY (NOTE: CENTRALIZED AMPLIFIERS, ARE NOT PERMITTED ON NEW SYSTEMS).
14. A CENTRAL STATION DIALER AND TWO DEDICATED PHONE LINES SHALL BE PROVIDED. THE DIALER SHALL BE CAPABLE OF SENDING THE FOLLOWING EVENTS: ALARM, MANUAL STATION, WATERFLOW, SUPERVISORY, CARBON MONOXIDE, TROUBLE, PUMP RUNNING AND PUMP TROUBLE.
15. ALL AREA OR DUCT SMOKE DETECTORS SHALL BE PHOTO-ELECTRIC TYPE.
16. SMOKE DETECTORS MUST BE MOUNTED AT LEAST 3 FT AWAY FROM ANY AIR REGISTER.
17. ALL CEILING MOUNT DEVICES MUST BE SECURELY FASTENED TO BUILDING CONSTRUCTION.
18. DEVICE LOCATIONS MUST BE READILY ACCESSIBLE TO ALLOW FOR MAINTENANCE AND REPAIR.
19. DUCT MOUNTED SMOKE DETECTORS SHALL BE MOUNTED ON THE DUCTWORK IN STRICT ACCORDANCE WITH THE MANUFACTURERS INSTRUCTIONS. ALL DUCT DETECTORS SHALL BE PROVIDED WITH A REMOTE LED.
20. MANUAL PULL STATIONS SHALL BE MOUNTED 48 INCHES ABOVE THE FINISHED FLOOR TO THE HANDLE OF THE STATION AND SHALL BE PAINTED FIRE DEPARTMENT RED. ALL MANUAL STATION SHALL BE INSTALLED SO THAT THEY ARE KEPT UN-OBSTRUCTED AT ALL TIMES.
21. ALL STROBE LIGHTS SHALL BE UL-1971 APPROVED/LISTED. THE MINIMUM CANDELA IS 30 UNLESS OTHERWISE NOTED.
22. NOTIFICATION DEVICES THAT INCLUDE A STROBE SHALL BE MOUNTED 80 INCHES OFF THE FINISHED FLOOR TO THE BOTTOM OF THE STROBE, NOT NECESSARILY THE ELECTRICAL BOX.
23. ALL AUXILIARY RELAYS FOR FAN SHUTDOWN, DOOR RELEASE, DAMPER CONTROL, ELEVATOR CONTROL, ETC SHALL BE WIRED A MAXIMUM OF 3 FT FROM THE CONTROLLED DEVICE. THE AUXILIARY RELAY SHALL FUNCTION WITHIN THE REQUIRED VOLTAGE AND CURRENT OF THE CONTROLLED DEVICE. SLAVE OR INTERPOSING RELAYS SHALL BE INCLUDED AND POWERED BY THE FIRE ALARM CONTROL PANEL IN A FAIL-SAFE (FIRE FUNCTION) POSITION. POWER TO THE INTERPOSING RELAY SHALL BE MONITORED BY THE FIRE ALARM SYSTEM.
24. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REMOVING ANY AND ALL ABANDONED FIRE ALARM CABINETS, DEVICES, AND WIRE. PAINT, PATCH AND CLEANUP SHALL ALSO BE INCLUDED.
25. FOR APPLICATIONS REQUIRING A FIRE ALARM SYSTEM REPLACEMENT (FCC, FACP, OR SCP, SSCP ETC), THE CONTRACTOR SHALL BE RESPONSIBLE FOR INTERFACING THE NEW SYSTEM WITH THE OLD SYSTEM SO THAT THEY ACT AS ONE. ONCE SYSTEM APPROVAL IS GRANTED, THE CONTRACTOR SHALL THEN BE RESPONSIBLE FOR REMOVING THE OLD SYSTEM INCLUDING REMOVING OLD WIRE AND CONDUIT, PATCH, PAINT, AND CLEANUP. FIRE WATCH, IF NECESSARY, SHALL BE THE CONTRACTOR'S RESPONSIBILITY.
26. CARBON MONOXIDE (CO) AND COMBINATION SMOKE AND CO DETECTORS SHALL BE FULLY ADDRESSABLE AND INCLUDE A SOUNDER BASE. MANUFACTURERS THAT DO NOT OFFER AN ADDRESSABLE CO OR SMOKE/CO TYPE DEVICE SHALL INCLUDE SEPARATE CO AND SMOKE DETECTORS, EACH WITH AN INTERNAL SYNCHRONIZED TEMPORAL 3 AND 4 SOUNDERS, AND THE NECESSARY MONITORING DEVICES SO THAT THE FIRE ALARM SYSTEM MAY MONITOR BOTH TYPES SEPARATELY. IF POWERED SEPARATELY (24VDC), POWER TO THE DEVICE SHALL ALSO BE SUPERVISED.
27. BOOSTER POWER SUPPLIES SHALL BE PROVIDED AS NECESSARY FOR STROBE CIRCUIT DRAW AND LENGTHY STROBE CIRCUIT RUNS. PROVIDE A SEPARATE 120V POWER FEED FOR EACH BOOSTER AS WELL AS A SMOKE DETECTOR MOUNTED DIRECTLY ABOVE IT.
28. ALL REMOTE FIRE ALARM CONTROL CABINETS (DATA GATHERING PANELS, TTBS ETC) SHALL INCLUDE AN INTERNAL TAMPER SWITCH. EACH SHALL ALSO INCLUDE A SMOKE DETECTOR MOUNTED ON THE CEILING DIRECTLY ABOVE IT SHOULD ONE OR MORE NOT ALREADY BE SHOWN ON THE PLANS IN THE ROOM THE PANEL IS MOUNTED IN.
29. REFER TO HVAC, FIRE PROTECTION, SECURITY AND FIRE ALARM FLOOR PLANS FOR EXACT QUANTITIES AND LOCATIONS OF ALL FIRE ALARM DEVICES.
30. CONTRACTOR'S RESPONSIBILITY TO SHOW ALL WIRING, ZONING, ETC... IN SHOP DRAWINGS. CONTRACTOR TO COORDINATE WITH ARCHITECTURAL DRAWING FOR ELEVATIONS, SECTIONS, MOUNTING HEIGHTS AND DETAILS. AS WELL AS COMPLY WITH CODE.
31. ELECTRICAL CONTRACTOR SHALL FURNISH AND INSTALL A COMPLETE AND OPERABLE ADDRESSABLE, MULTIPLEXED FIRE ALARM SYSTEM COMPLETE WITH ALL REQUIRED REMOTE TRANSPONDERS, BATTERIES AND POWER SUPPLIES.
32. ELECTRICAL CONTRACTOR SHALL INCLUDE IN HIS BID TWO DAYS FOR FIRE DEPARTMENT ACCEPTANCE AND TWO DAYS FOR OWNER ACCEPTANCE FOR EACH PHASE OF THIS PROJECT (COORDINATE WITH CONSTRUCTION MANAGER).
33. SUBMIT COMPLETE SHOP DRAWINGS FOR THE SYSTEM, INCLUDING WIRING DIAGRAMS, CATALOG CUTS OF ALL DEVICES, AND SYSTEM RISER DIAGRAM, BATTERY CALCULATION.
34. ELECTRICAL CONTRACTOR SHALL PERFORM ALL NECESSARY FIRE DEPARTMENT FILING. WORK SHALL NOT BE CONSIDERED COMPLETE UNLESS ALL NECESSARY FILING, TESTS, AND INSPECTIONS ARE COMPLETED AND APPROVED.
35. ELECTRICAL CONTRACTOR SHALL FIRE STOP ALL CONDUIT PENETRATIONS THROUGH FIRE RATED PARTITIONS AND SLABS.
36. PROVIDE A SIGN AT THE ENTRANCE TO THE BUILDING & ENTRANCE INDICATING THE LOCATION OF THE MAIN FIRE ALARM CONTROL PANEL.
37. COORDINATE LOCATIONS OF ALL DEVICES AND CONDUIT ROUTING WITH ARCHITECT PRIOR TO ANY WORK AND INSTALLATION.
38. ALL COMBINATION AUDIBLE/VISUAL ALARM UNITS AND VISUAL(STROBE UNITS) SHALL BE WALL MOUNTED AT NO HIGHER THAN 80" A.F.F. ALL STROBE LIGHTS WITHIN A COMMON VISUAL ZONE SHALL BE SYNCHRONIZED. ALL MANUAL PULL STATIONS, BEAM DETECTORS, SOUNDING AND VISUAL ALARM DEVICES AND FIRE ALARM PANEL SHALL BE KEPT UNOBSTRUCTED ALL ALL TIMES.
39. CONTRACTOR SHALL BE RESPONSIBLE FOR PROVIDING ALL PROGRAMMING, WIRE AND DEVICES REQUIRED TO INTERFACE SPRINKLER, HVAC, ELEVATOR AND SECURITY SYSTEMS WITH ADDRESSABLE COMPONENTS OF THE FIRE ALARM SYSTEM.
40. PROVIDE QUANTITY OF ADDRESSABLE LOOPS REQUIRED TO NOT EXCEED THE NUMBER OF ADDRESSABLE DEVICES PER APPLICABLE CODE OR MANUFACTURER'S STANDARDS.
41. REFER TO ELECTRICAL DRAWINGS FOR POWER SUPPLY TO THE FIRE ALARM SYSTEM.
42. PROVIDE FINAL AS PER INSTALLATION WIRING DIAGRAM & INSTRUCTIONS OF THE FIRE ALARM SYSTEM MOUNTED SECURELY INSIDE THE FIRE ALARM CONTROL PANEL.
43. CONNECT TO GENERATOR (IF PRESENT) FOR STATUS MONITORING AND BATTERY STATUS.
44. CONTRACTOR TO REVIEW HVAC, SECURITY, AND OTHER CONSULTANT DRAWINGS, THESE INCLUDES BUT NOT LIMITED TO SMOKE DAMPERS, FIRE SMOKE DAMPERS, ELEVATOR CONTROLS, FIRE DOORS HARDWARE AND CONTROLS, MOTORIZED DOOR & WINDOWS, ETC.. THEY SHALL CONTROL AND RECEIVE STATUS INDICATION (OPEN & CLOSED) FOR EACH ASSOCIATED CONTROL CIRCUITS. INTERFACE WITH THE FIRE ALARM SYSTEM AS REQUIRED BY CODE AND PROVIDE RELAYS/CONTROL MODULES FOR FIRE ALARM SYSTEM CONTROL FOR THE STARTING AND STOPPING OF ALL LIFE SAFETY RELATED SMOKE EXHAUST, SMOKE PURGE AND CONTROLLING FANS/MOTORS WITH EACH ASSOCIATED CONTROL WIRING.
45. PROVIDE 20A, 1P, 120V CIRCUIT TO ALL FIRE SMOKE DAMPERS FROM EMERGENCY SOURCE PANEL AND SHALL BE TIE-IN WITH FIRE ALARM SYSTEM. CONTRACTOR SHALL COORDINATE QUANTITY AND LOCATIONS OF ALL FIRE SMOKE DAMPERS (FSD's) WITH HVAC DRAWINGS. REFER TO ELECTRICAL DRAWING FOR FSD'S CIRCUITRY. THE CONTRACTOR SHALL REVIEW HVAC DRAWINGS AND SCHEDULES FOR ALL DUCT SIZES. IF DUCT SIZE REQUIRES MORE THAN ONE DETECTORS OR LONGER SAMPLING TUBE, THEY SHALL PROVIDE ADDITIONAL DEVICES OR LONGER SAMPLING TUBES TO SATISFY NFPA AND BUILDING CODE REQUIREMENTS. THIS SHALL BE PROVIDED AS PART OF BASE BID FOR A COMPLETE CODE COMPLIANT SYSTEM.
46. ALL OUTDOOR FIRE ALARM DEVICES SHALL BE WEATHERPROOF TYPE.
47. ALL FIRE ALARM EQUIPMENT SHALL BE KEPT UNOBSTRUCTED ALL TIMES.
48. ALL FIRE ALARM CABLING SHALL BE 2 HOUR FIRE RATED.

FIRE ALARM SEQUENCE OF OPERATION

A. ACTIVATION OF A MANUAL PULL STATION WILL DO THE FOLLOWING:
   a. ANNUNCIATE THE DEVICE IN ALARM ON AN ENGLISH LANGUAGE DISPLAY AT THE FIRE ALARM PANEL.
   b. SHUTDOWN ALL FANS GREATER THAN 1000 C.F.M. AND CLOSE ASSOCIATED FIRE SMOKE DAMPERS AND SMOKE DAMPERS.
   c. ACTIVATE HORN AND STROBES.
   d. SOUND AN AUDIBLE ALARM TONE WITHIN ZONE CONTAINING INITIATING FIRE ALARM SIGNAL.
   e. SEND A PULL STATION ALARM SIGNAL TO CENTRAL OFFICE.

B. ACTIVATION OF AN AREA SMOKE DETECTOR OR DUCT DETECTOR WILL DO THE FOLLOWING:
   a. ANNUNCIATE THE DEVICE IN ALARM ON AN ENGLISH LANGUAGE DISPLAY AT THE FIRE ALARM PANEL.
   b. SHUTDOWN ALL FANS GREATER THAN 1000 C.F.M. AND CLOSE ASSOCIATED FIRE SMOKE DAMPERS AND SMOKE DAMPERS.
   c. ACTIVATE HORN AND STROBES.
   d. SOUND AN AUDIBLE ALARM TONE WITHIN ZONE CONTAINING INITIATING FIRE ALARM SIGNAL.
   e. SEND A SMOKE ALARM SIGNAL TO CENTRAL OFFICE.
   f. SEND SIGNAL TO BMS SYSTEM TO BEGIN SMOKE EXHAUST SEQUENCE.
   g. OPERATE ALL DOOR RELEASES AT EGRESS DOORS.

C. ACTIVATION OF A WATERFLOW SWITCH WILL DO THE FOLLOWING:
   a. ANNUNCIATE THE DEVICE IN ALARM ON AN ENGLISH LANGUAGE DISPLAY AT THE FIRE ALARM PANEL
   b. SHUTDOWN ALL FANS GREATER THAN 1000 C.F.M. AND CLOSE ASSOCIATED FIRE SMOKE DAMPERS AND SMOKE DAMPERS.
   c. ACTIVATE HORN AND STROBES.
   d. SOUND AN AUDIBLE ALARM TONE WITHIN ZONE CONTAINING INITIATING FIRE ALARM SIGNAL.
   e. SEND A WATERFLOW ALARM SIGNAL TO CENTRAL OFFICE
   f. OPERATE ALL DOOR RELEASES AT EGRESS DOORS.

D. ACTIVATION OF A TAMPER SWITCH WILL DO THE FOLLOWING:
   a. ANNUNCIATE THE DEVICE IN ALARM ON AN ENGLISH LANGUAGE DISPLAY AT THE FIRE ALARM PANEL
   b. SEND A SUPERVISORY SIGNAL TO CENTRAL OFFICE.

E. OPERATION OF A KITCHEN HOOD EXHAUST SYSTEM MONITORING DEVICE WILL DO THE FOLLOWING:
   a. ANNUNCIATE THE DEVICE IN ALARM ON AN ENGLISH LANGUAGE DISPLAY AT THE FIRE ALARM PANEL.
   b. ACTIVATE AUDIBLE ALARM TONE WITHIN ZONE CONTAINING INITIATING FIRE ALARM SIGNAL.
   c. SEND A SMOKE ALARM SIGNAL TO CENTRAL OFFICE.
   d. SEND SIGNAL TO BMS SYSTEM AND/OR KITCHEN HOOD CONTROL PANEL TO BEGIN SMOKE EXHAUST SEQUENCE.
   e. OPERATE ALL DOOR RELEASES AT EGRESS DOORS.

F. ACTIVATION OF A CARBON MONOXIDE DETECTOR WILL DO THE FOLLOWING:
   a. INITIATE A DISTINCT CARBON MONOXIDE DETECTOR SUPERVISORY SIGNAL FOR CORRESPONDING DETECTOR ON AN ENGLISH LANGUAGE DISPLAY AT THE FIRE ALARM PANEL.
   b. ACTIVATE DISTINCT LOCAL CARBON MONOXIDE DETECTOR HORN/STROBE DEVICES FOR ASSOCIATED DETECTOR IN ALARM CONDITION.
   c. ACTIVATE CARBON DETECTOR SOUND BASE (IF PRESENT).
   d. SEND A DISTINCT CARBON MONOXIDE DETECTOR SUPERVISORY SIGNAL TO CENTRAL OFFICE.

G. A CARBON MONOXIDE DETECTOR IN A TROUBLE CONDITION WILL DO THE FOLLOWING:
   a. INITIATE A DISTINCT CARBON MONOXIDE DETECTOR TROUBLE SIGNAL FOR CORRESPONDING DETECTOR ON AN ENGLISH LANGUAGE DISPLAY AT THE FIRE ALARM PANEL.
   b. SEND A DISTINCT CARBON MONOXIDE DETECTOR TROUBLE SIGNAL TO CENTRAL OFFICE.

GENERAL NOTES:

1. NEW FIRE ALARM DEVICES TO MATCH EXISTING FIRE ALARM DEVICES. COORDINATE REQUIREMENTS WITH FIRE ALARM VENDOR FOR BUILDING.
2. PROVIDE BOOSTERS, POWER EXTENDERS AND END OF LINE RESISTORS AS NEEDED.
3. REMOTE POWER SUPPLIES SHOULD BE ACCESSIBLE AND LOCATED IN ELECTRICAL ROOMS OR CLOSETS.
4. REFER TO POWER DRAWINGS FOR POWER CONNECTION TO FIRE ALARM PANELS AND EQUIPMENT.
5. FIRE ALARM RISER DIAGRAM ONLY INDICATES QUANTITIES OF NEW AND/OR RELOCATED FIRE ALARM DEVICES EFFECTED AS PART OF THIS SCOPE OF WORK. EXISTING TO REMAIN DEVICES SHOWN ONLY FOR REFERENCE PURPOSES.

CTE FA133

CONSTRUCTION DOCUMENTS

Autodesk Docs://NECSD - New CTE Bldg/108-2303 NECSD CTE - MEP.rvt

GENERAL DEFINITIONS:

A. INDICATE: THE TERM "INDICATE" REFERS TO GRAPHIC REPRESENTATIONS, OR SCHEDULES ON THE DRAWINGS, OTHER PARAGRAPHS OR SCHEDULES IN THE SPECIFICATIONS, AND SIMILAR REQUIREMENTS IN THE CONTRACT DOCUMENTS. WHERE SUCH AS "SHOWN", "NOTED", "SCHEDULED", AND "SPECIFIED" ARE USED, IT IS TO HELP THE READER LOCATE THE REFERENCE, NO LIMITATION ON LOCATION IS INTENDED.

B. DESCRIBED: TERMS SUCH AS "DIRECTED", "REQUESTED", "AUTHORIZED", "SELECTED", "APPROVED", "REQUIRED", AND "PERMITTED" MEAN "DIRECTED BY THE ENGINEER", "REQUESTED BY THE ENGINEER", AND SIMILAR PHRASES.

C. APPROVE: THE TERM "APPROVED", WHERE USED IN CONJUNCTION WITH THE ENGINEER'S ACTION ON THE CONTRACTOR'S SUBMITTALS, APPLICATIONS, AND REQUESTS, IS LIMITED TO THE ENGINEER'S DUTIES AND RESPONSIBILITIES AS STATED IN GENERAL AND SUPPLEMENTARY CONDITIONS.

D. FURNISH: THE TERM "FURNISH" IS USED TO MEAN "SUPPLY AND DELIVER TO THE PROJECT SITE, READY FOR UNLOADING, UNPACKING, ASSEMBLY, INSTALLATION, AND SIMILAR OPERATIONS."

E. INSTALL: THE TERM "INSTALL IS USED TO DESCRIBE OPERATIONS AT PROJECT SITE INCLUDING THE ACTUAL "UNLOADING, UNPACKING, ASSEMBLY, ERECTION, PLACING, ANCHORING, APPLYING, WORKING TO DIMENSION, FINISHING, CURING, PROTECTING, CLEANING, AND SIMILAR OPERATIONS."

F. PROVIDE: THE TERM "PROVIDE" MEANS "TO FURNISH AND INSTALL COMPLETE AND READY FOR THE INTENDED USE."

G. INSTALLER: AN "INSTALLER" IS THE CONTRACTOR OR AN ENTITY ENGAGED BY THE CONTRACTOR, EITHER AS AN EMPLOYEE, SUBCONTRACTOR, OR SUB-SUBCONTRACTOR, FOR PERFORMANCE OF A PARTICULAR CONSTRUCTION ACTIVITY, INCLUDING INSTALLATION, ERECTION, APPLICATION, AND SIMILAR OPERATIONS. INSTALLERS ARE REQUIRED TO BE EXPERIENCED IN THE OPERATIONS THEY ARE ENGAGED TO PERFORM.

H. ELECTRONIC SYSTEMS: THE TERM "ELECTRONIC SYSTEMS" IS USED TO DESCRIBE ALL LOW VOLTAGE SYSTEMS GENERALLY REFERRED TO AS "SPECIAL SYSTEMS." THESE SYSTEMS INCLUDE BUT NOT NECESSARILY LIMITED TO ALL SYSTEMS WHICH UTILIZE VOLTAGES OF LESS THAN 71 VOLTS SUCH AS SOUND SYSTEMS, VIDEO SYSTEMS, TV SYSTEMS, SECURITY SYSTEMS, VOICE AND DATA CABLING SYSTEMS, ETC.

GENERAL NOTES (APPLY TO ALL DRAWINGS):

A. ALL ELECTRICAL WORK SHALL BE DONE IN ACCORDANCE WITH THE LATEST ADOPTED N.E.C./NFPA 70 CODE.

B. THE CONTRACTOR SHALL PERFORM HIS WORK BY COORDINATING WITH THE FACILITY REPRESENTATIVE REGARDING SUCH THINGS AS NOISE, WORK AREA LIMITATIONS, ALLOWABLE WORKING HOURS, UTILITY INTERRUPTIONS, ETC.

C. THE CONTRACTOR SHALL INSTALL TEMPORARY FACILITIES/PRECAUTIONS TO GUARD AGAINST WORK THAT IS AN INFECTION CONTROL HAZARD OR NUISANCE (SUCH AS NOISE, DUST, OPERATIONS INTERRUPTION, ETC.). THE CONTRACTOR SHALL COMPLY WITH FACILITY REPRESENTATIVE'S FOR THE COORDINATION, LOCATION, AND QUALITY OF THESE TEMPORARY PROVISIONS.

D. ALL WORK AREAS SHALL BE KEPT CLEAN AND ORDERLY AT ALL TIMES. OPEN-ENDED ITEMS SUCH AS CONDUITS SHALL ALWAYS BE COVERED AND PROTECTED TO PROHIBIT ACCUMULATION OF CONSTRUCTION DUST/DEBRIS.

E. ALL COMMUNICATION AND DATA CABLE ARE TO BE INSTALLED IN CONDUIT WHERE INSTALLED EXPOSED AT AREAS W/O CEILINGS OR ABOVE IN CONCEALED CEILINGS. CABLES CAN BE INSTALLED EXPOSED ABOVE ACCESSIBLE CEILINGS. ALL EXPOSED CABLES ARE TO BE ANCHORED TO WALL OR ROOF STRUCTURE IN BRIDLE RINGS AT MINIMUM 3'-0" O.C. OR IN CABLE TRAY.

F. PROVIDE CONDUIT BODY FOR ALL DATA AND SIGNAL CABLES TO BE INSTALLED EXPOSED AT AREAS W/O CEILINGS OR ABOVE INACCESSIBLE CEILINGS. CABLES CAN BE INSTALLED EXPOSED ABOVE ACCESSIBLE CEILINGS AND THEREFORE DO NOT REQUIRE CONDUIT.

G. CONDUIT RUNS ARE SCHEMATIC ONLY. ALL CONDUIT RUNS SHOULD TAKE THE SHORTEST MOST DIRECT ROUTE POSSIBLE. CONDUIT RUNS MAY HAVE A MAXIMUM OF (3) 90° BENDS. IF ADDITIONAL BENDS ARE REQUIRED, PROVIDE PULLBOX.

H. CABLE TRAY SHALL BE PAINTED AS DIRECTED BY THE ARCHITECT. CABLE TRAY SHALL BE PAINTED BEFORE ANY CABLES ARE INSTALLED AS PAINT COULD DAMAGE UTP CABLE JACKETING.

I. WHERE CABLE TRAY IS SHOWN PENETRATING A FIRE WALL, TERMINATE CABLE TRAY ON EITHER SIDE OF THE WALL AND PROVIDE FOUR (4)"f EMT CONDUIT SLEEVES IN FIRE WALL. SEAL CONDUIT PENETRATIONS AS DIRECTED BY THE SPECIFICATIONS.

J. ALL CABLE TRAY SHALL BE MOUNTED 9'-0" AFF WHERE ALLOWED BY FIELD CONDITIONS. IF FIELD CONDITIONS DO NOT ALLOW FOR 9'-0" MOUNTING HEIGHT, CONTRACTOR SHALL PROVIDE ALTERNATE ROUTING TO BE APPROVED BY EOR.

K. ALL CABLE NOT INSTALLED IN CABLE TRAY SHALL BE SUPPORTED VIA J-HOOKS OR ROUTED THROUGH CONDUIT.

L. CONTRACTOR SHALL PROVIDE BACKBOX AND CONDUIT ROUTED TO NEAREST CABLE TRAY FOR ALL WALL MOUNTED DEVICES. CONDUIT SHALL BE SIZED TO ACCOMMODATE QUANTITY OF DEVICES BEING FED TO EACH DEVICE. CONDUIT SHALL BE 3/4" MINIMUM.

M. COORDINATE WORK WITH ALL OTHER TRADES.

N. CONTRACTOR TO INSTALL ALL DEVICES INCLUDING, BUT NOT LIMITED TO CAMERAS, WALL PHONES, WAPS, VAPE DETECTORS, SPEAKERS, CLOCKS, DATA RECEPTACLES, AND NETWORK ELECTRONICS (PROVIDED BY OTHERS).
   a. WHEN INSTALLING NETWORK ELECTRONICS:
      - ALL PATCH CORDS ARE TO BE UNIQUELY LABELED AT EACH END AT APPROXIMATELY 2 INCHES FROM THE TERMINATION POINT.
      - CONTRACTOR IS REQUIRED TO INCLUDE WITH HIS PROPOSAL SUFFICIENT TIME AND MATERIALS TO INSTALL CUSTOMER PROVIDED NETWORK SWITCHES.
      - CONTRACTOR SHALL RECEIVE DEVICES FROM THE CLIENT AND INSTALL. MOUNTING POSITIONS SHALL BE REVIEWED WITH CUSTOMER IT PERSONNEL PRIOR TO INSTALL.
      - CONTRACTOR SHALL ASSUME SIX (6) NETWORK SWITCHES PER TELECOMMUNICATIONS CLOSET.
      - CONTRACTOR IS REQUIRED TO INCLUDE WITH HIS PROPOSAL SUFFICIENT TIME AND MATERIALS TO INSTALL CUSTOMER PROVIDED NETWORK EQUIPMENT.
   b. WHEN INSTALLING WAPs:
      - CONTRACTOR IS REQUIRED TO INCLUDE WITH HIS PROPOSAL TIME AND MATERIALS TO INSTALLED CUSTOMER PROVIDED WAPS FOR DATA.
      - THIS INCLUDES BOTH INTERIOR AND EXTERIOR WAPS.
      - CUSTOMER SHALL PROGRAM AND TEST ALL ACCESS POINTS.
      - CONTRACTOR SHALL RECEIVE AND INSTALL DEVICES IN POSITIONS SHOWN ON DRAWINGS. ALL MOUNTING HARDWARE SHALL BE PROVIDED BY CONTRACTOR.
      - CONTRACTOR SHALL COORDINATE ALL POSITIONS AND MOUNTING HEIGHTS WITH ARCHITECT AND CUSTOMER IT PERSONNEL.

GENERAL NOTES:

A. ALL LOW VOLTAGE CONNECTIONS AND CABLES SHOWN ON THIS PLAN SHALL BE CONNECTED TO THE MDF ON THE SECOND FLOOR.

B. ALL CAMERAS SHALL BE PENDANT MOUNTED UNLESS THEY CAN BE INSTALLED IN A DROP CEILING OR WALL MOUNTED AS CONDITIONS ALLOW. COORDINATE WITH CAMERA SPECIFICATIONS. IF PENDANT MOUNTED, COORDINATE MOUNTING HEIGHT WITH OTHER CEILING MOUNTED DEVICES INCLUDING BUT NOT LIMITED TO, LIGHTING, HVAC DUCTWORK, PIPING, ETC. SO THAT THERE ARE NO OBSTRUCTIONS TO CAMERA VIEW.

C. ALL EXTERIOR CAMERAS MOUNTED AT 10' UNLESS OTHERWISE NOTED.

D. UNLESS PREVENTED BY FIELD CONDITIONS, CABLE TRAY SHALL BE WALL MOUNTED. IF WALL MOUNTING IS NOT POSSIBLE, CABLE TRAY SHALL BE PENDANT MOUNTED.

DRAWING NOTES:

1. PROVIDE THREE (3) FOUR INCH CONDUITS BETWEEN SECOND FLOOR DATA CLOSET AND FIRST FLOOR CUSTODIAL ROOM TO ROUTE DATA CABLES BETWEEN FLOORS.

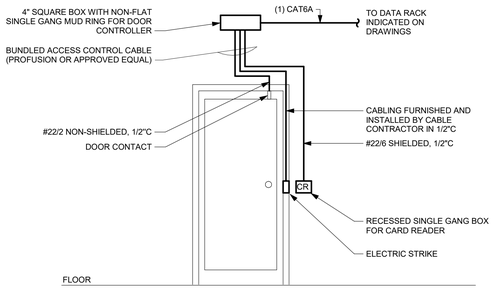
CTE T133

CONSTRUCTION DOCUMENTS

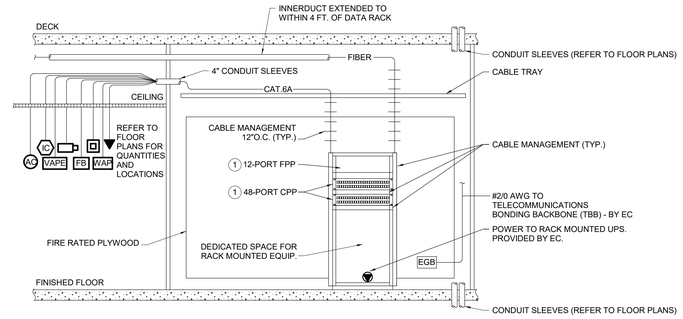
Autodesk Docs://NECSD - New CTE Bldg/233139_NECSD_CTE_ELEC_CENTRAL_R22.rvt



DETAIL GENERAL NOTES:

A. TERMINATIONS AND TESTING BY CABLE CONTRACTOR.
B. COORDINATE ALL WORK WITH THE GENERAL CONTRACTOR AND DOOR INSTALLER.
C. REFER TO FLOOR PLANS FOR ADDITIONAL INFORMATION AND REQUIREMENTS.

1 ACCESS CONTROL DETAIL
T500 NO SCALE



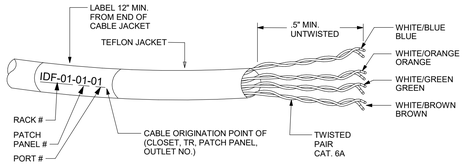
DETAIL GENERAL NOTES:

A. PROVIDE DEDICATED 4" CONDUIT SLEEVES IN WALLS, FLOORS, AND CEILINGS FOR HORIZONTAL AND VERTICAL CABLING. SIZE SLEEVES FOR NO MORE THAN 40% FILL AND LABEL CABLES AT SLEEVE FOR THE SYSTEM THEY SERVE. CAMERA AND NETWORK CABLING SHALL HAVE SEPARATE DEDICATED SLEEVES.

DETAIL SPECIFIC NOTES:

(1) QUANTITY OF PATCH PANELS SHALL BE AS REQUIRED TO ACCOMODATE NUMBER OF CABLES PLUS 25% FUTURE CAPACITY.

2 TYPICAL RACK DETAIL
T500 NO SCALE

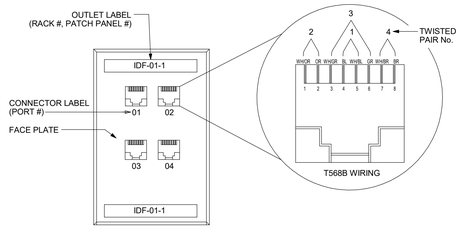


DETAIL GENERAL NOTES:

A. PROVIDE HORIZONTAL CABLE LABELING 12" FROM EACH END OF THE CABLE JACKET WITH AN IDENTIFIER AND BE VISIBLE ON THE EXPOSED PART OF THE CABLE JACKET. THIS SHALL INCLUDE EACH CABLE IN THE TELECOMMUNICATION CLOSET OR RACK. AS A MINIMUM, THE FOLLOWING MUST BE REFLECTED IN THE LABEL - "RACK #" IDENTIFYING THE RACK DESIGNATION, "PATCH PANEL #" IDENTIFYING THE PATCH PANEL DESIGNATION AND "PORT #" IDENTIFYING THE PORT ON THE PATCH PANEL.

B. MAINTAIN THE WIRE PAIR TWISTS AS CLOSE AS POSSIBLE TO THE POINT OF TERMINATION, NO MORE THAN 0.5" OF WIRE SHALL BE UNTWISTED.

3 TYPICAL TELE/DATA CABLE DETAIL
T500 NO SCALE

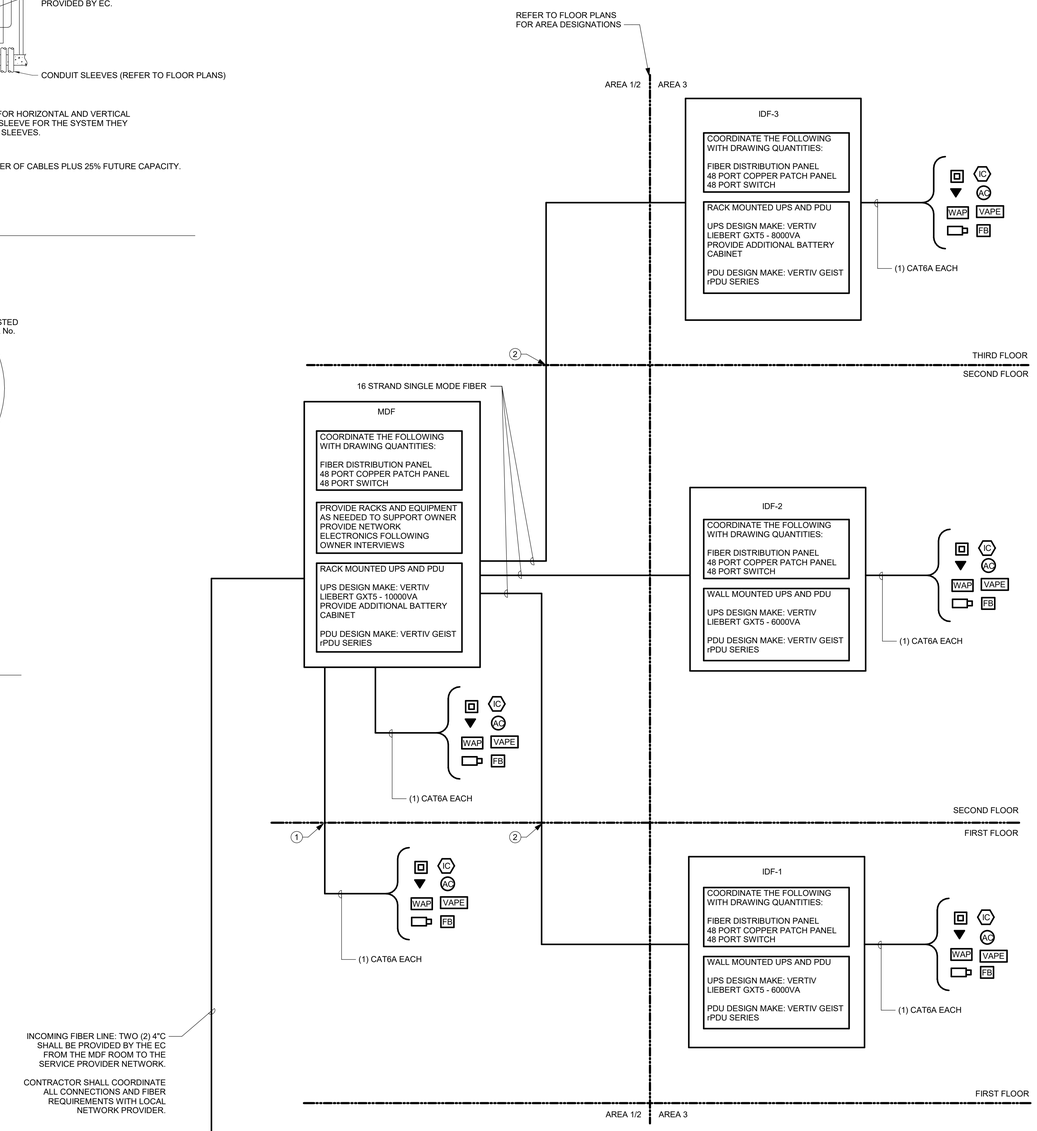


DETAIL GENERAL NOTES:

A. PROVIDE TELECOMMUNICATION LABELING AS PER TIA/EIA-606-A. ALL OUTLETS AND PATCH PANEL POSITIONS MUST BE LABELED AS TO THEIR FUNCTION AND IDENTIFIER CODE. ALL DEVICES, OUTLET LOCATIONS AND DESIGNATIONS MUST APPEAR ON SHOP DRAWINGS AND FINAL AS-BUILT DRAWINGS. AS A MINIMUM THE FOLLOWING MUST BE REFLECTED FOR THE CONNECTORS AND PANEL LABEL - "RACK #" IDENTIFYING THE RACK DESIGNATION, "PATCH PANEL #" IDENTIFYING THE PATCH PANEL DESIGNATION AND "PORT #" IDENTIFYING THE PORT ON THE PATCH PANEL.

B. LABEL EACH CONNECTOR LOCATION AS SPECIFIED IN A SEQUENCE AND PROCEEDING CLOCKWISE AROUND THE ROOM. ALSO IDENTIFY AND LABEL THE CONNECTOR FUNCTION OR DESIGNATION FOR "VOICE" OR "DATA". COLOR CODING CONNECTORS AND CABLING SHALL BE USED TO IDENTIFY VOICE OR DATA, COORDINATE WITH IT PERSONNEL.

4 TYPICAL TELE/DATA COVERPLATE DETAIL
T500 NO SCALE



GENERAL NOTES:

A. ALL DATA RACKS SHALL BE IN A LOCKED AND MONITORED IT CLOSET AND SHALL BE OPEN 4-POST RACKS BY APC OR APPROVED EQUAL.

B. ALL PDU'S SHALL BE PROVIDED WITH C-13/C-19 CONNECTIONS. ALL RACK MOUNTED EQUIPMENT SHALL BE PROVIDED WITH C-13/C-19 PLUGS. NETWORK EQUIPMENT PROVIDED BY OWNER. COORDINATE PLUG AND RECEPTACLE REQUIREMENTS WITH OWNER.

C. COORDINATE DATA RACK LAYOUTS BASED ON DRAWING QUANTITIES, REQUIREMENTS, AND FIELD CONDITIONS.

D. REFER TO SPECIFICATIONS FOR MORE INFORMATION.

E. REFER TO DRAWINGS FOR DEMISING LINES DICTATING WHICH DEVICES WILL BE CONNECTED TO WHICH IT CLOSET LOCATION.

F. ALL FIBER SHALL BE RUN IN INNERDUCT BETWEEN DATA RACKS AND ROUTED IN THE CABLE TRAY.

DRAWING NOTES:

1. PROVIDE THREE (3) FOUR INCH CONDUITS BETWEEN SECOND FLOOR DATA CLOSET AND FIRST FLOOR CUSTODIAL ROOM TO ROUTE DATA CABLES BETWEEN FLOORS.

2. PROVIDE CONDUIT SLEEVES FOR FIBER ROUTING BETWEEN THE FIRST, SECOND, AND THIRD FLOOR FOR FIBER ROUTING BETWEEN THE MDF AND IDF ROOMS. CONDUIT SHALL BE HIDDEN IN WALLS AND LABELED AS FIBER. PROVIDE CONDUIT ROUTING TO SUITE FIELD CONDITIONS. COORDINATE WITH ALL OTHER TRADES.

STUDIO LIGHTING SYSTEM UPPER LEVEL CONTROL PLAN - AREA '3'

Sheet No.
CTE TL302

CONSTRUCTION DOCUMENTS

NOTES:

The Cable Lengths Indicated In The Above Tables Are In Addition To All Required Hookup Cabling For The Initial Focus Plot. This List Is Intended To Be The Owner's Spare Portable Cabling Inventory That Can Be Used To Interface New Fixtures Into The Plot And/Or To Reconfigure/Combine Existing Fixtures Per Future Requirements.

For All Cabling Required For The Initial Fixture Plot Interconnects, Field Verify & Provide All Required Cabling In Order To Mount Fixtures Per Owner's Lighting Plot. Ensure That All Initial Plot Cable Lengths Are Of Sufficient Length For The Indicated Interconnection And Placement Of Devices. If Longer Cable Lengths Are Required To Reach Device Placements, Then Provide Longer Cables As Needed. All Cabling Should Have Sufficient Length To Reach The Next Indicated Device Without Stretching The Cable, Swagging The Cable Unsupported Through The Air Between Fixtures Or Stressing The Connectors. Typical Cable Dress Should Be From Device, Back Through Fixture Yoke, Neatly Wrapped Along Pipe To Next Device Location, Through Fixture Yoke And Then To The Indicated Device. No Cables Are To Be Stretched From Device To Device Through The Light Output Pattern Of A Fixture Or Across The Path Of Any Other Device. This Note DOES NOT Apply To Any Cables In The Spare Portable Equipment List. Provide Those Types Of Cables In The Lengths Indicated.

Every Portable Cable Shown Or Referenced On The TL Series Drawings Shall Have One 24" Piece Of Samson Black Braided Tie Line/Rip-Tie Hook & Loop Black Velcro (16" Tie Line For Portable Cables Under 8' In Overall Length) Choked Onto One End Approx. 1" From The Connector.

Terminate DMX Runs As Required. This Is To Ensure Constant Voltage Across All Units, To Maintain Data Signal Integrity & Full Fixture Functionality, To Reduce Line Loss And To Provide Data Signal Termination As Required And As Specified By Each Manufacturer.

LED Fixtures Shall Only Be Plugged Into Relay Controlled/Non-Dimmed Outlets. DO NOT Plug LED Fixtures Into Channels That Are Powered Via Dimmer Modules Or Irreparable Damage Could Be Done To The Fixtures.

The Physical Fixture Layout Locations Shown On This Drawing Are Not Intended To Be A Final Lighting Plot. The Actual Fixture Plot & Physical Fixture Layout Is TBD By The Owner During The Focus Plot Day(s) And Arranged As Such By The Installing Contractor. Fixtures Shown In Line With Other Fixtures, Even If They Appear Beyond The End Of A Connector Strip Or Other Related Device, Are Intended To Be Mounted On That Same Batten Or Device Together With The Others Next To Them.

NOTES - CONTINUED:

Gather All Bundled Cabling Together Every 12" With Black Cord-Lox Style Velcro Closed Loop Series Tie Wraps. Tie Wraps Shall Be Installed Snugly But Not Too Tightly.

The Studio Lighting Fixtures Shall Not Be Installed In This Space Until All Dust Creating Work, Paint Work, Drywall Work, Sanding Work Has Been Completed And All Dust/Debris Has Been Cleaned Up. If Fixtures Must Be Installed Prior To Completion Of This Work Or Cleanup, Then They Must Be Fully Wrapped In Heavy Duty Plastic Bags That Are Taped Shut. Fixtures May Not Be Powered On Or Even Plugged Into Power While Bagged.

Instruct The Owner On The Hazards Of Leaving Studio Fixtures On For Long Periods Of Time While Aimed Directly At Sensitive Items Such As Curtains, Backdrops, Etc. Fixtures Should Only Be On For The Duration Of Shoots, Etc. And Not Aimed At Or Focused On Full For Hours Onto Any Potentially Flammable Items Such As Those Noted Above, Even Though These Items May Have Flame Retardant Characteristics.

FIXTURE WARRANTY NOTE:

ANY FIXTURE SUBSTITUTED FOR THE SPECIFIED ETC LED FIXTURES PROVIDED AS PART OF THIS PROJECT SHALL FEATURE THE FOLLOWING WARRANTIES TO MATCH THE SPECIFIED MANUFACTURER'S STANDARD WARRANTY:

- 5 YEAR FULL FIXTURE WARRANTY
- 10 YEAR LED ARRAY WARRANTY

KEY TO FIXTURE SYMBOLS:

Symbol	Fixtures	Lamp
CYC	ETC ColorSource Cyc Fixture With Edison Connector. Set Up Each Fixture With Individually Addressed Units In 7-Channel DMX Operating Mode. Provide With All Power & Individual DMX Interconnect Cabling. Hanging Yoke With A C-Clamp & All Other Misc. Hardware Needed In Order To Assemble & Interconnect These Fixtures.	(42) Lumileds Luxeion C LED Emitters - (Included With Fixture)
P2000	Dracast LED 2000 Plus Series Panel Fixture With DMX Control & Edison Connector. Provide 3200K-5600K Bi-Color, Tunable White/Variable CCT With 4-Way Barn Doors, Softbox & Diffusion/CTO Semi-Rigid Filter Packs. Set Up With Individually Addressed Units In XX-Channel DMX Operating Mode. Provide With All Power & Individual Data Interconnect Cabling, Hanging Yoke With A Baby 5/8" Pin Spigot To C-Clamp Adapter & All Other Misc. Hardware Needed In Order To Assemble, Hang & Interconnect These Fixtures. CRI >95. 130W Power Draw.	(2,048) 5 mm LED Bulbs Per Cell (In 32 x 64 Grid Arrangement)
F2000	Dracast LED 2000 LED Fresnel Series Panel Fixture With DMX Control & Edison Connector. Provide 3200K-5600K Bi-Color, Tunable White/Variable CCT With 4-Way Barn Doors, Speed Ring For Chimera Softbox & Chimera Softbox. Set Up With Individually Addressed Units In XX-Channel DMX Operating Mode. Provide With All Power & Individual Data Interconnect Cabling, Hanging Yoke With A Baby 5/8" Pin Spigot To C-Clamp Adapter & All Other Misc. Hardware Needed In Order To Assemble, Hang & Interconnect These Fixtures. CRI >95. 200W Power Draw.	(48) Surface Mounted CREE LED Emitters (In 8 x 6 Arrangement)

Note: All Fixtures & Lamps Shall Be 120 Volt Versions.

Provide All Fixtures With Malleable Iron C-Clamp (And Required Adapters), 30" Black Safety Cable With 5/16" Spring Clip And 36" Long Power Cable.

Label Each Fixture, Data & Lighting Power Cable As To Type & Length At End With Self-Laminating Or Clear Heat Shrink Style Labels.

All Devices Have Been Located In Approx. Installation Locations; However, Obtain All Final Locations In Writing From The Owner Or Owner's Representative Prior To Locating Fixtures & Incorporating Into Overall Focus Plot (This Includes Locations For All Previously Removed Fixtures Being Incorporated Into New Focus Plot-None Of These Fixtures Have Been Shown On This Plan. Fixtures Shown Here Are New Fixtures Only).

Provide All Fixtures In This Symbols Key With All DMX Addressing & Setup, PowerCon & Network Cables, Etc. As Well As All Tie Lines, Yoke Markings, Etc. Uncrate, Assemble, Burn-In, Address, Group, Hang & Focus All Of These Fixtures Per The Owner's Instructions, Ready For Use. All Accessories, Markings, Etc. Noted Are Required For All Fixtures.

Label Each Fixture Yoke With Fixture Wattage, DMX Address, Etc. In Black Block Lettering On Safety Yellow Gaff Tape Or Other Durable Label.

PROVIDE THE FOLLOWING PORTABLE EQUIPMENT:

Equipment	Quantity
5' Portable Gender-Bender DMX Cables - M/M	2
5' Portable Gender-Bender DMX Cables - F/F	2
5' Portable DMX Cables	6
10' Portable DMX Cables	6
15' Portable DMX Cables	4
10' M/F Edison/Edison Jumpers, 12/3 SO	4
Cinelight Baby Pipe Clamp With 16mm Spigot Pin (Install On Pantograph Fixtures)	16

Note: Portable Equipment Schedule Is Spare Portable Cabling And All Cabling Is Intended To Be A Spare Inventory Of Cabling For The Owner's Use & For Interfacing Lighting Equipment.

The Portable Equipment Shown Are Not All Inclusive & Are In Addition To These Noted Elsewhere. Provide All Additional Cables As Necessary For A Complete & Fully Functioning Lighting System, Even If Those Cables Do Not Appear On This Or Other Schedules.

M/F - Stands For Male To Female.
M/M - Stands For Male To Male.
F/F - Stands For Female To Female.

Provide All DMX Style Interface Cables With The Pin Configuration Of The Furnished Fixtures (3 Pin Or 5 Pin). Provide Adapter Cables As Necessary.

Label Each Portable Cable As To Type & Length At Both Ends With Self-laminating Or Clear Heat Shrink Style Labels.

All Cables Listed Above Shall Be Provided In Black.

Provide ALL Required Adapters For Fixtures To Accommodate Spigots, C-Clamps, Pantographs, Etc. & Attachment To Grid & Manfrotto Sleds.

REFER TO DRAWINGS CTE TL60X FOR ALL LIGHTING RELATED REMOVAL NOTES, DRAWING NOTES, BUBBLE NOTES, KEYS, SCHEDULES, TABLES, ELECTRICAL RELATED NOTES AND OTHER INFORMATION THAT PERTAIN TO THE TL SERIES DRAWINGS.

Set Up With Individually Addressed Units In XX-Channel DMX Operating Mode. Provide With All Power & Individual Data Interconnect Cabling, Hanging Yoke With A Baby 5/8" Pin Spigot To C-Clamp Adapter & All Other Misc. Hardware Needed In Order To Assemble, Hang & Interconnect These Fixtures. CRI >95. 200W Power Draw.	(48) Surface Mounted CREE LED Emitters (In 8 x 6 Arrangement)

Note: All Fixtures & Lamps Shall Be 120 Volt Versions.

Provide All Fixtures With Malleable Iron C-Clamp (And Required Adapters), 30" Black Safety Cable With 5/16" Spring Clip And 36" Long Power Cable.

Label Each Fixture, Data & Lighting Power Cable As To Type & Length At End With Self-Laminating Or Clear Heat Shrink Style Labels.

All Devices Have Been Located In Approx. Installation Locations; However, Obtain All Final Locations In Writing From The Owner Or Owner's Representative Prior To Locating Fixtures & Incorporating Into Overall Focus Plot (This Includes Locations For All Previously Removed Fixtures Being Incorporated Into New Focus Plot-None Of These Fixtures Have Been Shown On This Plan. Fixtures Shown Here Are New Fixtures Only).

Provide All Fixtures In This Symbols Key With All DMX Addressing & Setup, PowerCon & Network Cables, Etc. As Well As All Tie Lines, Yoke Markings, Etc. Uncrate, Assemble, Burn-In, Address, Group, Hang & Focus All Of These Fixtures Per The Owner's Instructions, Ready For Use. All Accessories, Markings, Etc. Noted Are Required For All Fixtures.

Label Each Fixture Yoke With Fixture Wattage, DMX Address, Etc. In Black Block Lettering On Safety Yellow Gaff Tape Or Other Durable Label.

PROVIDE THE FOLLOWING PORTABLE EQUIPMENT:

Equipment	Quantity
5' Portable Gender-Bender DMX Cables - M/M	2
5' Portable Gender-Bender DMX Cables - F/F	2
5' Portable DMX Cables	18
10' Portable DMX Cables	12
15' Portable DMX Cables	16
10' M/F Edison/Edison Jumpers, 12/3 SO	16
Cinelight Baby Pipe Clamp With 16mm Spigot Pin (Install On Pantograph Fixtures)	16

Note: Portable Equipment Schedule Is Spare Portable Cabling And All Cabling Is Intended To Be A Spare Inventory Of Cabling For The Owner's Use & For Interfacing Lighting Equipment.

The Portable Equipment Shown Are Not All Inclusive & Are In Addition To Those Noted Elsewhere. Provide All Additional Cables As Necessary For A Complete & Fully Functioning Lighting System, Even If Those Cables Do Not Appear On This Or Other Schedules.

M/F - Stands For Male To Female.
M/M - Stands For Male To Male.
F/F - Stands For Female To Female.

Provide All DMX Style Interface Cables With The Pin Configuration Of The Furnished Fixtures (3 Pin Or 5 Pin). Provide Adapter Cables As Necessary.

Label Each Portable Cable As To Type & Length At Both Ends With Self-laminating Or Clear Heat Shrink Style Labels.

All Cables Listed Above Shall Be Provided In Black.

Provide ALL Required Adapters For Fixtures To Accommodate Spigots, C-Clamps, Pantographs, Etc. & Attachment To Grid & Manfrotto Sleds.

3/4" With (2) Belden 1583A

All Rack Mounted Devices Shall Be Properly Mounted On Rack Panels. Provide DIN Rail In Drawer Type Configuration. No Devices Or Related Wiring May Interfere With Front Rack Door Closing. All Internal Rack Wiring Shall Be Similar To Those Types Shown & As Per Manufacturer's Recommendations.

(CR) Communications Rack Shall Be A Mid Atlantic DWR Series Rack. Provide DWR-35-26 (Unless Larger Is Required):

Provide All Of The Following For The Designed System:ETC Echo System Brain, DMX Snapshot, Doug Fleenor Design DMX Merger(s), Opto D-Box, Misc. Power Supplies, Network Gear, Ethernet PoE Switch(es), Patch Panel(es), Rack Mount DMX Opto Splitters, Cable Management Panel(s), Brush Panel(s), One Four Space Mid Atlantic Locking Rack Drawer, Littlelight Rack Mount Panel Kit(s), DIN Rail Mount System, Blank & Vent Panels, Ethernet Patch Panel Legend On One Of The Blank Panels, Other Related & Necessary Misc. Equipment. Provide With Vent Panels In All Blank Spaces. Provide With Mid Atlantic UPS-2200R Rack Mounted Pure Sine-Wave Backup UPS With Mid Atlantic UPS-EBPR Expansion Battery Pack To Power All Lighting Control Equipment & Video Server Equipment And Entire Rack Backup Power Supply Located Within. (Size Rack Per Equipment Specified). Provide The Rack In A Depth That Is Deep Enough So All Gear & Related Cabling Fits And So That None Of The Gear Blocks Access To The Outlets In The MPR/PD Series Modules (At Least 26" Deep Model). Locate All Rack Rails So That Rack Door(s) May Be Closed Without Engaging Equipment. Provide All Devices With Required Power Supply Device(s). Provide Rack Mounted Power Distribution Equipment. Provide Additional Equipment As Is Necessary To Make A Complete & Fully Functioning System.

NOTE - PROVIDE SUFFICIENT POWER INJECTORS TO POWER ALL PORTS ON NETWORK SWITCH(ES) & LCD STATION.

Provide - Photo Lab Room:

(1) ETC ColorSource CS40AV Lighting Console

The Lights Are To Be Turned On/Off By An Operator Pushing The On/Off Buttons Of The 2 Button Station Located On The Sidewall Of The Control Booth Near The Countertop. Mount To OAL Device (Not Shown).

Do Not Bury On Air Light Inside Acoustical Panels Or Other Wall Features. Provide Required Extension Rings & Surface Mount For Maximum Visibility. Coordinate With Other Devices, Related Trades & Finishes, Etc. And Mount Per Available Space. VIF With Owner. Typical.

1 - 20 AMP NON-DIMMED RELAY CIRCUIT.

(ON AIR CIRCUIT: ER-1, #5)

Conduit Size, Wiring Type, Quantity, Etc. As Required.

ON AIR | ON AIR | ON AIR | ON AIR

(On Air Lights Shall Be On/Off ONLY. They Shall Not Flash)

Each "On Air" Light Shall Be A Sandies USA Model #343 Series 115VAC, 3 Sided Studio Warning Light With LED Lamps. Provide As Indicated & With All Manufacturer Required Hardware, Etc.

Conduit Size & Wire Types TBD Per NEC.

RELAY PANEL AC POWER: 5 Wire 3 Phase, 100 A, 120/208 VAC

G H

ER-1

ETC Unison Echo Relay Panel, ERP-24R1- 24B1, 120/208 VAC, Mains Fed Panel With (30) Individual Breakers/Relays, UL924 Card Mounted Shedding Control Module, Hinged Door, Main Breaker (MCB), UPS Control Backup & Wiring Kit, Ride Thru Option, All Required Electrical Tie-In For UPS, Etc.

Provide With All Required Options & Install MCB In Rack.

(fully populate with breakers, but all breakers may not be used - extra unused breakers shall be for spares/future)

Provide All Internal Network/DMX Style Wiring, Etc. Needed Inside The Relay Panel & All Required Interconnections & Feeds To External Equipment.

Individual Panel Contains All Load Breakers & Relays. See Manufacturers Data Sheets For Line/Load & Panel Wiring Details.

Control Hookup By Factory Technician.

For Relay Circuits Powering LED Fixtures, Set Dimmer Profile To Be On In All Cues, Etc. So That LED Fixtures Are Always Powered On During Performances. Relays Shall Be Set To Be Turned Off When System Is Not In Use To Prolong The Fixture's Electronics' Estimated Max Life Cycle. Perform This Function In The Architectural Control System Programming Software.

CONSTRUCTION DOCUMENTS

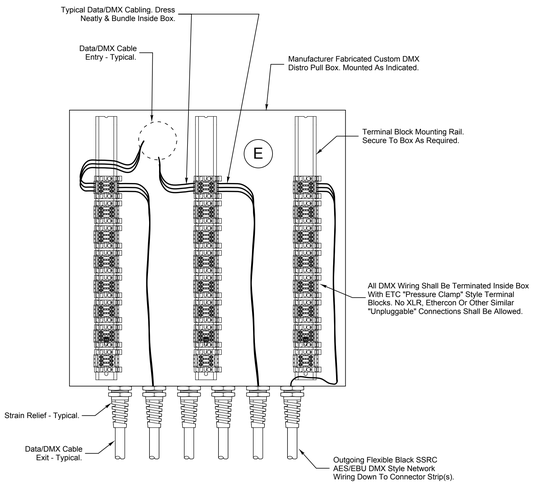
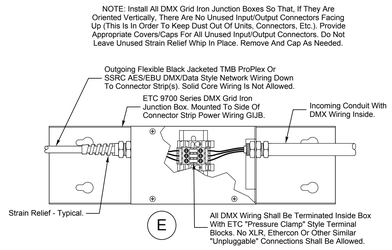
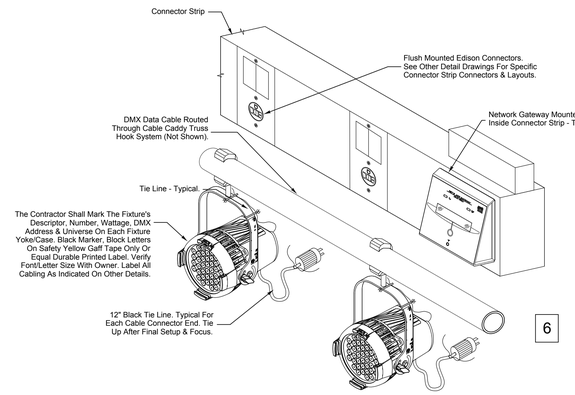
EACH DETAIL IS REQUIRED FOR EACH SPACE (STUDIO & PHOTO LAB).



1 DMX PULL BOX DETAIL
TL502 NONE



2 DMX GRID IRON JUNCTION BOX DETAILS
TL502 NONE



NOTE: The Intent Is For All Fixture & Data Cabling To Be Managed Well And Tied Up To The Battens In A Neat And Orderly Fashion.

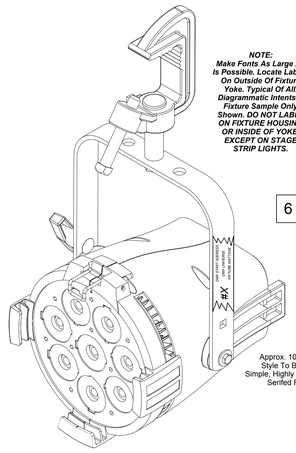
All Cords/Cables Shall Have An Approx. 24" Long Piece Of Black Tie Line Attached Near The End Of The Cord. After Final Fixture Setup & Field Focus With The Owner, The Contractor Shall Tie All Fixture Power Cords And DMX/Data/Network Cables To The Related Pipe Battens Pipes With Tie Line.

No Cabling Shall Be Allowed To Swag Below Or Loosely Between Fixtures Or To Connector Strip Outlets. All Cabling Shall Be Neatly Dressed & Tied To Pipe Battens In Such A Way So As Not To Become Tangled Or Caught In Any Related Or Adjacent Mechanisms.

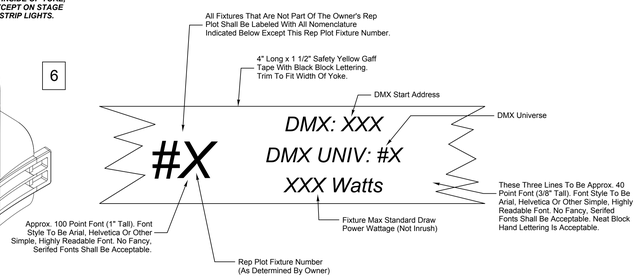
Any Tie Wraps Used Shall Be Black & Shall Be Cut Off Flush With No Protruding Ends.

NOTE: Fixtures & Connector Strips Shown Are Diagrammatic ONLY & Do Not Reflect The Actual Aiming Or Types Of Fixtures. Refer To Other Drawing Notes For Specific Aiming Instructions. Some Fixtures (i.e. Stage Wash LED's) Are Intended To Be Aimed Straight Down (Vertically).

3 CABLE MANAGEMENT DETAIL
TL502 NONE

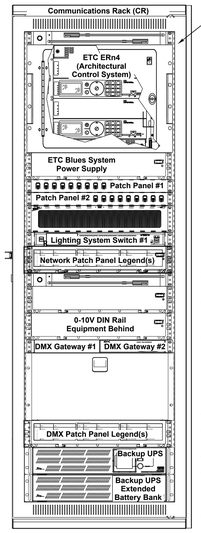


NOTE: Make Fonts As Large As Is Possible. Locate Labels On Outside Of Fixture Yoke. Typical Of All Diagrammatic Intents & Fixture Sample Only Shown. DO NOT LABEL ON FIXTURE HOUSING OR INSIDE OF YOKE, EXCEPT ON STAGE STRIP LIGHTS.



NOTE: Rep Plot Fixture Numbering Shall Be As Determined By Owner & This Numbering Shall Match On Fixtures & Battens. Do Not Restart Numbering Based Upon Installation Locations. Provide A Single Sequence Of Ascending Numbers For All Rep Plot Fixtures. Provide The Owner With (2) Legal Sized, Laminated Copies Of Rep Plot Fixtures With Numbering, Locations, DMX Start Address, DMX Universe & Wattage For Reference.

4 FIXTURE LABELING INTENTS DETAIL
TL502 3/4" =NONE1'-0"



Rack Equipment Labeling Intents. All Equipment Is To Be Labeled In English As To What It Is And Similar To What Is Shown (I.E. ETC ERn4-Architectural Control System, ETC Blues Power Supply, Etc.). Do Not Use Some Keyed Or Obscure Naming Code Or Other Nomenclatures. It Is Acceptable To Use Commonly Understood Nomenclature Abbreviations. Typical.

NOTE:

All Naming Nomenclature Shown Is Diagrammatic & Intended Only As A Guide To The Type Of Information Required For Each Piece Of Equipment. Tailor Device Labeling Per Location & Type.

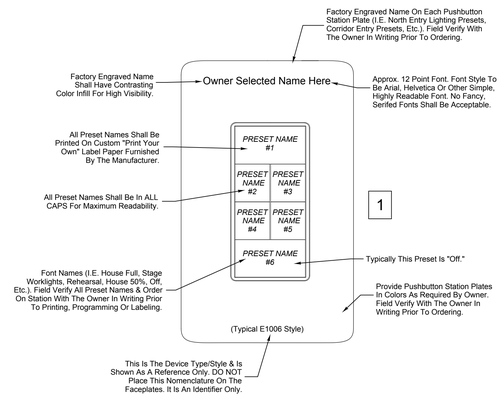
Do Not Block Any Vents Or Cover Any Screens, Screws, Etc. With Labels.

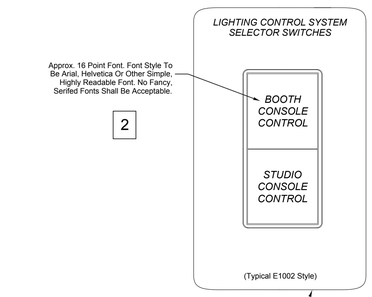
Size Labels/Fonts To Fit Equipment. Font Size Should Large Enough To Be Easily Readable When Looking At Equipment From A Standard Distance Of Approx. 4'. (E.G. "Communications Rack" Shall Be 60 Pt. Font Minimum; All Other Rack Equipment Nomenclature Shall Be 32 Pt. Font Minimum).

Do Not Label Unimportant Items Such As Blank Or Vent Panels.

All Labels Shall Be White-On-Black Or Black-On-White Or Similar Self-Adhesive. Labels Must Not Easily Peel Off Over Time. Labels That Peel Off Within The First 12 Months Shall Be Completely Replaced By The Contractor At His Own Cost.

5 RACK & DEVICE LABELING INTENTS
TL502 NONE





ARCHITECTURAL CONTROLS PROGRAMMING REQUIREMENTS (PUSHBUTTON/FADER STATIONS) :

1. Stations shall control various preset "looks" (i.e. walk-in, rehearsal, control booth only, studio only). The preset "looks" (via the preset buttons) shall be as directed by the owner or owner's representative. The last button shall be OFF.

[All pushbutton stations shall be programmed so that, when no presets are selected and no lights are on, there is an LED or button on each station that is lit so that the stations are readily visible in the dark. All pushbutton stations and LCD screens MUST have the capability to recall ANY preset look the owner wishes, including conventional theatrical, houselighting and LED color mixing fixtures. All pushbutton stations shall be programmed so that presets are triggered in a mutually exclusive hierarchy (turning the previous preset off as it engages the selected preset). NO pile-on style presets shall be allowed. All faders shall be programmed per owner's instructions (typically faders control groups of similar fixtures and/or fixtures in similar locations as a group).].

Program the architectural lighting system so that, once ANY preset is engaged or recalled, ALL system relay channels in ALL dimmer racks are powered ON.

Typical presets are as follows - some may not apply to all projects. Program each station with presets as required by owner, which may be different from station to station. Obtain actual settings from owner if these are not desired. Program all presets into P-LCD controls:

1. Control Booth 100%
2. Control Booth 50%
3. Studio 100%
4. Studio 50%
5. Control Booth Desk (White)
6. Control Booth Desk (Color)
7. Control Booth Desk (Color)
8. Rehearsal
9. All On
10. + (owner selected)

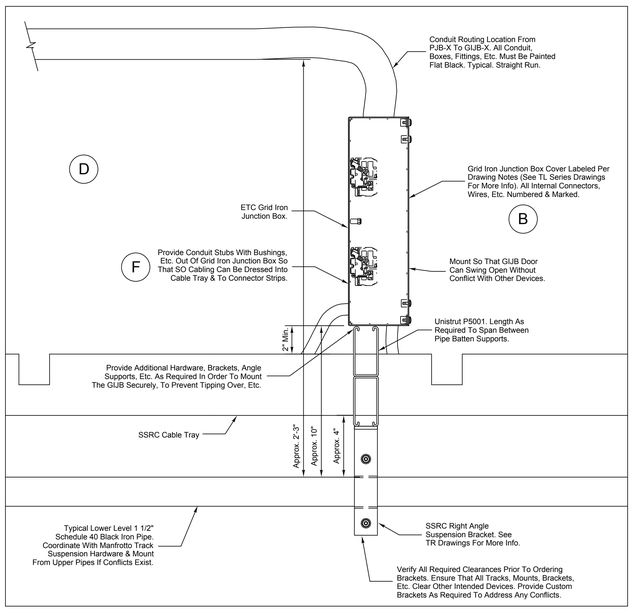
NOTE:
All Naming Nomenclature Shown Is Diagrammatic & Intended Only As A Guide To The Type Of Information Required On Each Conduit Label. Tailor Conduit, Device & Plate Labeling Per Location & Type Of Cabling Located Inside Conduit Or Type Of Device Being Fed/Controlled.

2 CONDUIT & BOX LABELING DETAILS
TL503 NONE



3 GRID IRON JUNCTION BOX MOUNTING DETAIL
TL503 3" = 1'-0"

NOTE FOR ALL SUSPENSION/BRACING/MOUNTING DETAILS IN THE STUDIOS:

ALL HARDWARE TO BE 3/8" OR 1/2" (AS NOTED) DIAMETER GRADE 5 OR HIGHER (BOLTS, WASHERS, NUTS, ETC.).

ALL THREADS MUST BE TREATED WITH VIBRATITE AND USED IN SUCH A WAY AS TO BE VISIBLE UPON INSPECTION.

ALL PAINTING SHALL BE PERFORMED IN A PROFESSIONAL MANNER. THIS INCLUDES UTILIZING PROPER PRIMING AND FINISH COATING TECHNIQUES AS REQUIRED AND THE PROPER MASKING OF ADJACENT AREAS.

PAINT SHALL BE SPRAY APPLIED WHERE POSSIBLE BEFORE SUSPENSION AND SHALL BE MULTI-COAT AND NEAT. NO DRIPS, RUNS, MOTTLED FINISHES, ETC. SHALL BE ALLOWED.

PAINT ALL ATTACHMENT HARDWARE, ETC. FLAT BLACK (IF NOT INHERENTLY FLAT BLACK).

NO BRIGHT, SHINY, BARE METAL COLORED OR OTHERWISE CONFLICTING COLORED METAL OR HARDWARE ITEMS SHALL BE ALLOWED.

ALL STRUT SHALL BE UNISTRUT OR EQUAL. NO NON-LOAD RATED CHANNELS SHALL BE ACCEPTABLE. VERIFY LOADING REQUIREMENTS, DEFLECTION LIMITATIONS, ETC. WITH UNISTRUT PUBLISHED TABLES FOR UNIFORM AND POINT LOADING IN DETERMINING ALTERNATE PRODUCT EQUIVALENCY.

USE SPRING LOADED UNISTRUT CHANNEL NUTS, LOCKNUTS AND HARDWARE WHEN ATTACHING ANY UNISTRUT CHANNEL, BRACKETS OR CLAMPS DIRECTLY TO OTHER UNISTRUT CHANNEL OR OTHER BRACKETS, ITEMS, ETC.

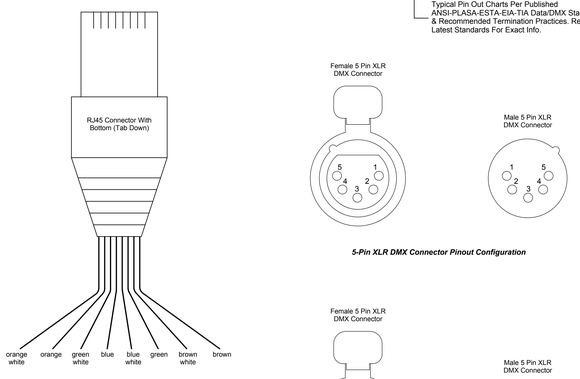
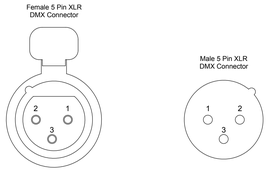
	Metal Shell (if present)	Drain - (Shield on STP or FTP cables)	

Typical Pin Out Charts Per Published ANSI-PLASA-ESTA-EIA-TIA Data/DMX Standards & Recommended Termination Practices. Refer To Latest Standards For Exact Info.

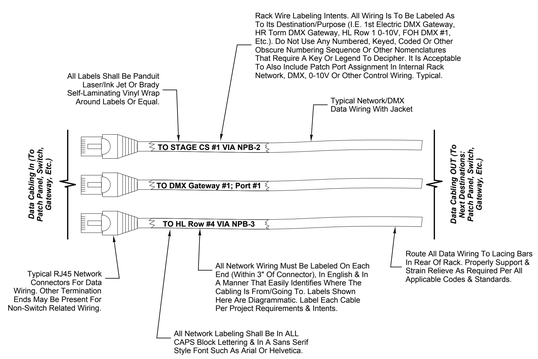


5-Pin XLR DMX Connector Pinout Configuration



3-Pin XLR DMX Connector Pinout Configuration

3 DMX PINOUT DETAILS
TL505 NONE



NOTES:

All DMX512 Data Cabling Must Be Installed Per ANSI E1.11 - 2008 (Or Current Revision). All Network/DMX Data Cabling Must Meet The ANSI/TIA/EIA-485 Standard. Network/DMX Daisy Chain Topography & Signal Integrity Must Be Maintained Throughout. No Other Wiring Topographies Shall Be Allowed.

Properly Support & Strain Relieve All Network/DMX Wiring Inside Rack(s), Terminators, Etc. To Rack Lacing Bars. Provide Data Wiring Service Loop As Indicated (12" Minimum).

DMX Is Understood To Be An Abbreviation That Refers To The DMX512 Wiring Standard.

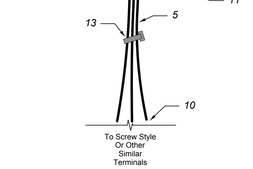
All Wiring, Terminations, Etc. Shall Be DMX512/RDM Compliant. Network Wiring Shall Be sACN And Compliant With All Related Standards. Follow All Manufacturer Recommended Installation Instructions.

Labels Shall Not Contain Coded Information Requiring A Key To Decipher.

Wiring Labels Shall Meet The Five Major Categories Of Requirements Of ANSI/TIA Labeling Standards As Follows:

1. Permanent: Labeling Must Be Permanently Placed At Both Ends Of Every Cable.
2. Identification: Both Ends Of Every Cable Must Be Labeled To Identify Its Usage.
3. Terminations Points: The Terminations Points Of The Cable Must Be Identified On The Labels.
4. Legibility: Every Label Must Be Legible & In English (Typically This Infers A Machine Printed Label).
5.Records: The Information On Each Label Must Match Those Shown On As-Built Records.

2 DMX/NETWORK DATA WIRING LABELING DETAIL
TL505 NONE



STEP	*DMX CABLE PREP NOTES:*
1	Cut cable so that an 8" tail extends from the edge of the related terminations box (plus required service loop).
2	Strip 7" of the main outer cable jacket back.
3	Label the main cable above the strip line with a durable, self-laminating, vinyl wrap-around style label with the data type and run designation (see other details for labeling requirements).
4	Strip the foil shielding from each wire set to within 1/4" of the main outer jacket.
5	Untwist the shield wire from each pair and apply a piece of 1/16" clear heat shrink to each shield wire.
6	Twist each shield wire back onto its data pair and then apply a 1 1/2" piece of 3/16" heat shrink all the way down each 3-wire set. Make sure to capture the foil shielding at the base.
7	Apply the 2" piece of the 3/8" heat shrink, centered on the end of the cable jacket and bases of all the wires in the cable bundle.
8	Cap the ends of the unused pair of wires with a 1" piece of 3/16" heat shrink, centered over the end of the wires.
9	Strip 3/16" of insulation from all of the wires to be used (NOT to any unused wires)
10	Maintain the wire pair twist as close to the connector/connection point as possible and terminate the wires as required.
11	Gently bend back the unused set of wires and align them along the main wire outer jacket.
12	Secure the unused set of wires to the main wire above all stripped points with a nylon wire tie.
13	Secure the terminated wires together with a wire tie approx. 2" from the connector/termination point. Properly strain relieve all wiring at each connector/termination point so that there is zero undue pressure of tension pulling on the terminations.
14	Allow a proper (approx. 12") service loop at each termination location beyond all main wire stripped points, coil in a gentle circle and secure loop with a Velcro strap.
Note: In the case of "touch-and-go" wire applications with two wires landing at the same terminals, strip both wires to 3/4", twist them together tightly and then trim them to 3/16". When wiring multiple DMX devices, ensure that the wiring daisy chain contains no "Y's" or loops. Provide DMX terminators at all "ends."

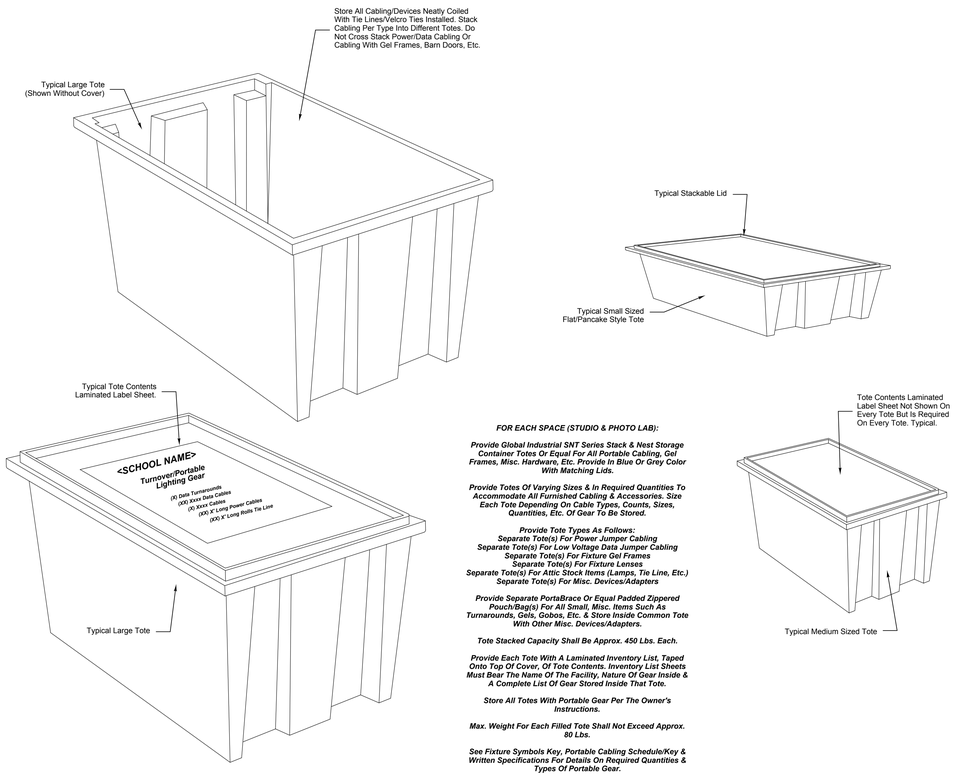
EACH DETAIL IS REQUIRED FOR EACH SPACE (STUDIO & PHOTO LAB).

REFER TO DRAWINGS CTE TL60X FOR ALL LIGHTING RELATED REMOVAL NOTES, DRAWING NOTES, BUBBLE NOTES, KEYS, SCHEDULES, TABLES, ELECTRICAL RELATED NOTES AND OTHER INFORMATION THAT PERTAIN TO THE TL SERIES DRAWINGS.



FOR EACH SPACE (STUDIO & PHOTO LAB):

Provide Global Industrial SNT Series Stack & Nest Storage Container Totes Or Equal For All Portable Cabling, Gel Frames, Misc. Hardware, Etc. Provide In Blue Or Grey Color With Matching Lids.

Provide Totes Of Varying Sizes & In Required Quantities To Accommodate All Furnished Cabling & Accessories. Size Each Tote Depending On Cable Types, Counts, Sizes, Quantities, Etc. Of Gear To Be Stored.

Provide Tote Types As Follows:
Separate Tote(s) For Power Jumper Cabling
Separate Tote(s) For Low Voltage Data Jumper Cabling
Separate Tote(s) For Fixture Gel Frames
Separate Tote(s) For Fixture Lenses
Separate Tote(s) For Attic Stock Items (Lamps, Tie Line, Etc.)
Separate Tote(s) For Misc. Devices/Adapters

Provide Separate PortaBrace Or Equal Padded Zippered Pouch/Bag(s) For All Small, Misc. Items Such As Turnarounds, Gels, Gobos, Etc. & Store Inside Common Tote With Other Misc. Devices/Adapters.

Tote Stacked Capacity Shall Be Approx. 450 Lbs. Each.

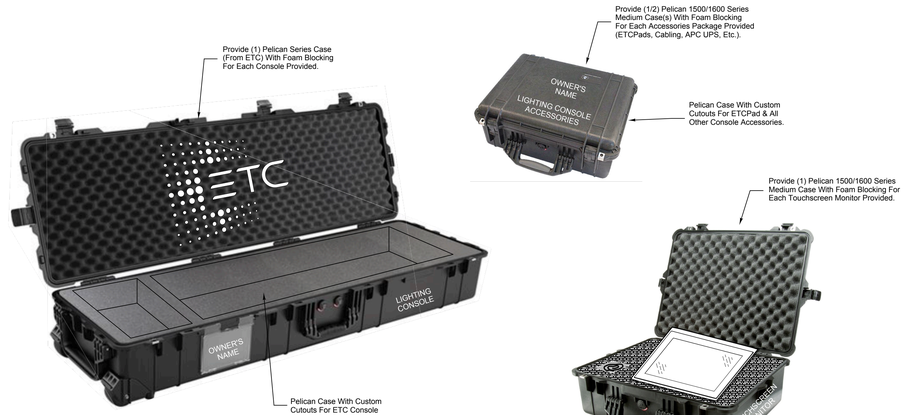
Provide Each Tote With A Laminated Inventory List, Taped Onto Top Of Cover, Of Tote Contents. Inventory List Sheets Must Bear The Name Of The Facility, Nature Of Gear Inside & A Complete List Of Gear Stored Inside That Tote.

Store All Totes With Portable Gear Per The Owner's Instructions.

Max. Weight For Each Filled Tote Shall Not Exceed Approx. 80 Lbs.

See Fixture Symbols Key, Portable Cabling Schedule/Key & Written Specifications For Details On Required Quantities & Types Of Portable Gear.

1 PORTABLE CABLING TOTE SYSTEM DETAILS
TL506 3/4" = 1'-0"



FOR EACH SPACE (STUDIO & PHOTO LAB):

All Cases Must Be Pelican Or Equal.

Size Each Case For Equipment/Cabling/Accessories Specified. Provide Additional Cases Beyond Those Listed If Accessories Require Additional Space.

All Cases Shall Be Watertight In Design. Long Cases Shall Feature Stainless Steel Ball Bearing Polyurethane Wheels. Custom Cut All Foam Blocking So That Console & Accessories Fits Inside Case(s) Snugly & Don't Shift During Transport. Locate Monitor & Accessories Inside Medium Cases. Locate Console In Long Case. Console & Accessories To Be Used With Owner Provided Table Where And As Needed.

Label All Cases Per Owner's Instructions & Similar To What Is Shown. Case Labels Are To Be Durable, Printed & With A Heavy-Duty Adhesive. Size As Space Allows Per Case. Label Sides & Top Of Each Case As To Owner, SUNY PAC & Contents.

E1002	E1002 - ETC Echo Inspire 2 Button Architectural Control Station	One Gang 3.5" Deep	Mounted In Wall At Standard Switch Height Or As Indicated.
E1006	E1006 - ETC Echo Inspire 6 Button Architectural Control Station	One Gang 3.5" Deep	Mounted In Wall At Standard Switch Height Or As Indicated.
DU-X	Connector Strip Mounted DMX Outlets (One For Each DMX Universe - DU-1 = DMX Universe #1, Etc.) Internally Wired/Distributed To Multiple Locations By Manufacturer Inside Each Connector Strip. Typical.	N/A	Mounted In Connector Strip. Each DMX Run Shall Feature (1) ETC DMX Pass Thru Panel With A Separate Single DMX Output Device At The End Of Each Run.
LJB-X	Lighting Junction Box	12" x 12" x 6" NEMA Box	Mounted At Standard Electrical Outlet Height Or As Indicated.
DMX	DMX Plug-in Station	One Gang 3.5" Deep	Mounted At Standard Electrical Outlet Height Or As Indicated.
XX"	Indicates Conduit Size And/Or Wire Runs		
→ XX	Home Run to Device		
CS DMX	DMX Entry At The End Of The Connector Strip Via An ETC "Top Hat" Style Device. Device Must Have Rubber/Plastic Grommet (Cable Cannot Enter Bare Metal Hole).	N/A	Mounted "Top Hat" On Connector Strip By ETC. Wiring To Be Terminated Inside "Top Hat". No Connectorized Terminations (IE XLR, RJ45, Etc. Shall Be Allowed At The Top Hat.
∅ (duplex)	Power - Duplex Edison Outlet - (1) 20 Amp, 120 VAC, Single Phase Circuit. See E Series Drawings For Conduit Sizes & Designations.	One Gang 3.5" Deep	Mounted At Standard Electrical Outlet Height Or As Indicated.
∅	Power - Single Edison Outlet - (1) 20 Amp, 120 VAC, Single Phase Circuit. See E Series Drawings For Conduit Sizes & Designations.	One Gang 3.5" Deep	Mounted At Standard Electrical Outlet Height Or As Indicated.
DD	DMX Drop/Grid Iron Junction Box - ETC Model 9700 DMX. Configured With One Or Two Data Runs As Needed. There Are To Be No Connectorized Terminations On This Box (XLR, RJ45, Etc.). Only Internal, Pressure Clamp Style Terminations Shall Be Allowed.	N/A	Mounted To Side Of Main Connector Strip Gridiron Junction Box.
DPB-X	DMX Pull Box - For Lighting Network Feedthrough. There Are To Be No Terminations Within This Box.	8" x 8" x 6" NEMA Box	Mounted To Structural Steel And Positioned To Facilitate Conduit Runs To DMX Drop Boxes.
CR	Communications Rack - For Echo, Lighting Control Distribution, Network Distribution & Power, Blues System Power Supplies, Cable Management, Switch(s), AV Video Server, UPS, Patch Panel(s) & Other Related Equipment. Size Rack for Equipment Specified & Needed To Complete System.		Wall Mounted At 60" AFF To The Center Of The Rack.
DMX O	DMX-OUT - DMX Signal Output Plug-in Station	One Gang 3.5" Deep	Mounted To Structural Steel As Indicated.
CS NET	Network Entry At The End Of The Connector Strip.	N/A	Mounted "Top Hat" On Connector Strip By ETC. Wiring To Be Terminated Inside "Top Hat". No Connectorized Terminations (IE XLR, RJ45, Etc. Shall Be Allowed At The Top Hat.
PJB-X	Power Junction Box - Junction Wiring Inside Box Per Code. Extend Existing To Box & Junction With New As Required.	12" x 12" x 6" NEMA Box	Mounted As Indicated Or Required
ECHO	ECHO - ETC Unison Echo Relay Panel. ERP-24R1-24B1, 120/208 VAC, Mains Fed Panel With Network, Door, Breakers/Relays, XXX Amp, 120V, 3 Phase Feed. Provide With Ride Thru Option & All Accessories As Required. See Flow Diagram For Complete Details.	Provided By Manufacturer	Wall Mounted At Approx. 60" AFF To The Center Of The Rack (If Possible). Field Coordinate Exact Location With Owner, NEC, ADA Codes, Existing Obstructions, Etc.
OAL	On Air Light Location. For The Attachment Of Sandies USA Model #343 Series 115VAC, 3 Sided Studio Warning Light.	One Gang 3.5" Deep	Empty Backbox Mounted As Indicated. Mount OAL Light To Box As Required.
GIJB	ETC Grid Iron Junction Box - Size Each Box For The Number Of Circuits Indicated.	N/A	Mounted To Structural Steel Or As Indicated.
(connector strip)	ETC Connector Strips (Distribution Series) - Size Each As Indicated On Drawings. Provide Without "Double Height" Termination Box Unless Circuit Count Is Too High For Single Height Strip With Integral Terminations.	N/A	Mounted As Indicated. Provide Connector Strip Brackets As Indicated And In Quantities As Recommended By The Manufacturer.

Notes:

All References To "Standard Electrical Outlet Height" And "Standard Switch Height" Are Intended For The Installing Contractor To Mount These Devices To Match These Mounting Heights With Any Existing Or Adjacent Devices On Site In The Auditorium. Most Backboxes For This Project Are Existing & To Remain; However, For All New Backboxes, Etc. The Following Notes Shall Pertain.

All Device Backboxes Shall Be Flush Mounted Unless Otherwise Noted On The Drawings. If Building Construction Makes Flush Mounting Impossible Or Impractical, Then Obtain Written Permission & Instructions From The Architect (Including Specific Device Types, Conduit/Wiremold Types, Required Painting, Sizes, Profiles, Etc.) Prior To Installing Any Surface Mounted Devices (This Is Excepting Devices Such As GIJB's, JB's, Pull Boxes, Etc. Mounted To Stage Or Other Overhead Steel).

Where Boxes Are Indicated As Surface Mounted, Wiremold Style Boxes Shall Be Utilized, Painted To Match Mounting Surface Or As Directed By Architect/Owner. See E Series Drawings For Restrictions, Etc. For Wiremold Boxes, Raceways, Routings, Etc.

No Catwalk Conduits Shall Be Allowed To Run Along, Behind, In Front Of, Etc. Or In Any Way That Will Cause The Pipe Grid Lighting Pipes Or Manfrotto Track System To Be Unusable.

All Backboxes Shall Be 3.5" Deep With Internal Square Edges. No Backboxes With Rounded Or Radiused Corners Shall Be Acceptable. Where Mounting Brackets Are Required, Provide Appropriate Brackets As Needed To Mount To Studs, Wall, Etc. No Contractor Fabricated Mounting Systems Shall Be Acceptable. Read All Drawing Notes For More Information On Backbox Styles, Types, Etc. Required.

Provide The Owner With Actual Sized Paper Template Copies Of All New Station Faceplates That Are Part Of This Project, Which The Owner Shall Then Tape On The Walls In The Final Desired Locations For All Architectural Control Stations. Do Not Install Any Related Conduit Or Backboxes Until Final Locations Have Been Determined By The Owner. No Stations Shall Be Allowed To Exist In Areas Or Locations Where They Conflict With Other Devices, Are Buried Behind Other Devices, Block Access To Life-Safety Devices, Are Tucked Into Inaccessible Corners Or Are Otherwise In Impractical, Out-Of-The-Way Locations.

Standard Switch Height Is Typically 48" To The Top Of Box.
Standard Outlet Height Is Typically 20" To Top Of Box.
Verify All Standard Heights With E Series Drawings/Field Conditions.

HOUSE/WORK LIGHTING SYMBOLS KEY:

REFER TO THE LIGHTING SYMBOLS KEY & REMOVALS NOTES AS WELL AS ALL OTHER KEYS AND NOTES ON TL601/TL602 AND ALL OTHER TL SERIES DRAWINGS FOR MORE INFO ON ADDITIONAL AND RELATED SCOPE OF WORK, REQUIRED COORDINATION, ETC. REVIEW ALL PORTIONS OF THE 19 2000 SPECIFICATIONS SECTION AS IT CONTAINS A LARGE AMOUNT OF INFORMATION REGARDING SCOPE OF WORK AS IT RELATES TO THE THEATRICAL, WORK, ACCENT AND HOUSE LIGHTING SYSTEMS.

FIXTURE DESIGNATION	SYMBOL	ITEM DESCRIPTION	BACK BOX	QTY. SPARES	NOTES
HL-1	◐	Control Room Houselighting Fixtures - Gotham Incito Architectural LED Downlight: 6" Recessed Can. ICO 30/30-6AR-LSS-55D-120-EDXB-CRI90-SCA (Verify Flange Color With Owner). Fixture Shall Be 3,000° K, 55° Beam Angle, Self-Contained, Remotely Addressable Via RDM Protocol, 90+ CRI, With A 31 Watt Energy Consumption, & An Initial Lumen Rating Of 3,000 Lumens. Dimming Shall Be "Dim To Black" Of Approx. <1%. Dimming Shall Be Via DMX512.	Ceiling Cutout As Required	Provide (3)	Provide All Required Tile Bridges, Spanning Metal, Etc. To Mount In Indicated Locations. Mount Securely Into Ceiling Clouds & Work In Conjunction With The Ceiling Contractor For Appropriate Installation Times. Protect All Fixtures From Dust/Dirt Infiltration. Do Not Modify Any Portion Of Fixtures In Order To Make Them Fit Installation Locations, Especially If Obstructions Exist. Cylinder Fixtures Must Each Be Installed To Roof Deck/JB With Black Power/Control Conduit Routed Neatly. All Safety Cables Must Be Black Wire Rope & Routed As Required.
HL-2	●	Main Green Room Studio & Photo Lab Houselighting Fixtures - Gotham Incito Architectural LED Downlight: 6" Surface/CeilingMounted Cylinder. ICO CYL 30/60-XXX-55D-120-DMXR-FCM-DBL-CRI90-SCA (Verify Flange Color With Owner). Fixture Shall Be 3,000° K, 55° Beam Angle, Self-Contained, Remotely Addressable Via RDM Protocol, 90+ CRI, With A 99 Watt Energy Consumption, & An Initial Lumen Rating Of 6,000 Lumens. Dimming Shall Be "Dim To Black" Of Approx. <1%. Dimming Shall Be Via DMX512. Mounted To Ceiling/Deck.	N/A	Provide (10)	
ACC-L-1	(strip)	Control Room Desk Work (Task) Lighting - Acolyte LED Ribbon Strip RGBW Lighting Fixture: Part # RB-XX-12-4.4-RGB30 Fixture With Both RGB & 3,000°K LED's, An Initial 160° Beam Angle, Remotely Dimmable Via DMX Protocol, 80+ CRI, With A 4.4 Watt Per LF Energy Consumption, & An Initial Lumen Rating Of 286 Lumens/LF. Dimming Shall Be Via DMX512. Provide With End Feed, Jumper Cables, Back Feed, AS20G Aluminum Channel, End Caps W-W/O Holes, Grazer Lens, Back Feed, Tiltable Stands & DMXINFLCD4 12 Volt Output LED Drivers (Per Control Booth).	Provide JB's As Required Per Location, Type, Etc.	Provide (20%) Fixture Length; (4) Power Supplies; (4) DMX Decoders	Mount LED Ribbons Inside Indicated Channel. Mount Channel On Finished Ceiling With Tiltable Stands & Aim Light Towards Countertop Per The Owner's Instructions. Mount All Strips/Channels For Clean Aesthetic Installation. Remote All Power Supplies/Drivers In CR Rack Or As Required (Concealed). Provide An Additional (4) Fixture Sections, Fully Burned In, Re-Boxed & Stored For Future Use As Replacements. Provide All Required Above Ceiling Blocking, Etc. As Required.
	→ XX	Home Run to Device			

House/Work Lighting System Symbols Key Notes (Notes Apply To All Lighting Symbols Keys - Other Symbols Keys May Contain Related Required Devices):

Provide Each House & Work Lighting Fixture With An Approx. 12" Service Loop Of Data Cabling. Manage In Such A Way As To Be Unobtrusive & Unseen From Below For All Pendant Fixtures. Neatly Coil In Loose Arc/Circle & Tie Up. Do Not Put Undue Stress On Cabling.

All Device Locations Shall Be Coordinated With Other Ceiling, HVAC, ETR Devices, Speakers & Other Obstructions. Shift Houselighting Fixture Installation Locations Incrementally & Symmetrically In Order To Fit With Required Clearances. Maintain Even Light Output At Reading Surface Level Throughout.

Provide Each House & Work Fixture With A Safety Cable To Overhead Steel As Required Per NEC/ASTM (Black Cable For All Exposed Pendant Style Fixtures). All Required Fixture Safety Cabling Must Be New & Routed Directly (Vertically) To Overhead Structural Steel Members. Safety Cables Must Be Load & With Proper Attachments To Overhead Steel. Provide All Required Spanning Members & Misc. Hardware As Required For Proper Supports. Safety Cables Cannot Be Routed Inside Of Any Stem/Conduit.

Route All Data Cabling To Pendant Fixtures With Black Velcro Cinch Straps Every 12". Do Not Overtighten. All Data Cable Drops To Pendant Fixtures Must Be Black Jacketed Tactical Style Data Cabling. Any Connectors Used Must Be Black Or Hidden From View From Below.

All Pendant Style Mounted Fixtures Shall Be Provided With Housing Color As Determined In Writing By The Architect/Owner. Typically Studio Housings Shall Be Flat Black.

All Conduit, Wiring, Installation And Installation Hardware Related To The House & Work Lighting Systems Shall Be Provided With All Required Misc. Spanning Metal/Unistrut Necessary In Order To Span Where Structural Steel Does Not Exist So That Fixtures Can Be Mounted In The Locations Indicated On The Drawings. All Hardware And Misc. Spanning Metal/Unistrut Used For The Installation Of Fixtures Shall Be Load Rated And The Mounting Method Must Be Approved By The Project Structural Engineer. Paint All Related Mounting Hardware Flat Black (Or Color As Determined By The Architect/Owner In Architecturally Sensitive Areas). All Color Selections Shall Be Obtained In Writing From Authorized Personnel. Paint All Pendant Style Fixture Mounting/Suspension Hardware To Match Existing Structure (Or Black) & As Determined By The Architect/Owner. Verify Color In Writing Prior To Install.

All Recessed Houselight Fixtures Are To Have A 100% Light Blocking Metal Trim Ring & One-Piece Reflector. Trim/Goof Ring Colors Shall Be Provided In A Color TBD By The Architect/Owner, Even If Custom Colors Are Required. No Visible Gaps Shall Be Allowed Between Fixture Trim/Goof Rings & Ceiling Openings. Only Manufacturer Furnished Trim/Goof Rings Shall Be Allowed. All Trim/Goof Ring Painting Must Be Spray Applied & Performed Professionally. All Related Spare Fixtures Parts Must Also Be Painted To Match. Manufacturer Provided Finishes, If Available, Shall Be Provided As Required.

DMX/RDM Address Each New LED House & Work Lighting Fixture & Properly Setup (Except Hard DMX Addressing). Any Houselighting Fixtures That Require "Hard" DMX/0-10V (Control) Addressing (Parameters That Must Be Manually Entered On The Fixture Itself As Opposed To Remote Addressing) Must Be Set Prior To Installation. Terminate The Entire Houselighting Low-Voltage Control Cabling System As Required For Proper Functionality & Remote Addressing Of The Entire System.

All Fixtures And Lamps Shall Be 120 Volt Versions.

All Device Locations Shall Be Coordinated With Other Ceiling, HVAC, Plumbing, Unistrut Mounted Devices & All Applicable Details. The Houselighting Fixtures' Locations Shall Be As Noted Here And Shall Take Precedence Over The Exact Locations Of All Other Devices. Shift Other Devices Incrementally & Symmetrically In Order To Fit.

PROVIDE A FULL (1) ONE YEAR REPLACEMENT WARRANTY ON ALL LED HOUSE/WORK LIGHTING FIXTURES/DRIVERS. THIS WARRANTY SHALL COVER ALL MATERIALS, ACCESS EQUIPMENT, PROGRAMMING (INCLUDING ANY SPECIALIZED THEATRICAL CONTRACTOR/MANUFACTURER ASSISTANCE) AND INSTALLATION LABOR COSTS ASSOCIATED WITH ANY FAILURE IN THE HOUSELIGHTING LED FIXTURES - SPECIFICALLY THE RECESSED CAN LED'S. ANY FIXTURES THAT FAIL IN THE FIRST 365 DAYS (AFTER OFFICIAL TURNOVER OF THE ROOM - POST ACCEPTANCE TESTS AND COMPLETED PUNCH LIST ITEMS) SHALL BE REPLACED BY THE EC AT NO ADDITIONAL COST TO THE OWNER.

Provide All Wiring Harnesses, Wire Whips, Breakouts, Cable/Signal Distribution, Etc. As Is Required In Order To Daisy Chain The DMX/RDM Feeds Tagged Along From Fixture To Fixture As Indicated.

All LED House & Work Lighting Fixtures Shall Be Provided With The Latest Working Firmware/Software Updates Having Been Downloaded Into Every Fixture (Including Spares). Provide All Required Factory Personnel & Programming.

Completely Clean All Fixture Reflectors Of All Dirt, Dust, Debris And Fingerprints Prior To The Completion Of The Project. This Should Be Performed After All Dirt And Dust Creating Work And All Room Painting Has Been Completed. Protect Reflectors, LED Arrays, Etc. From Damage Or Overpainting During Construction.

Protect All Fixtures, LED Arrays, Reflectors, Etc. From All Paint, Dust, Dirt, Debris Or Other Construction Damage During Entire Installation Period. Remove All Protective Films, Etc. Prior To Turning Room Over To Owner. The Installing Contractor Shall Be Solely Responsible For Any Damage To Fixtures, Overpainting, Etc. That Alters It From Brand New Condition, Even If That Requires Complete Replacements.

STUDIO LIGHTING SYSTEM NOTES:

Each note and detail indicator indicates a typical location for the type of work to be performed or equipment to be provided. The referenced contractor shall provide for all instances of typical work indicated. All drawing notes may not appear or be referenced on each drawing; however, all notes still apply to the work indicated within each note and all similar instances of typical work shall be performed by the referenced contractor(s).

Perform all work as described below and on each TL series drawing. All work shall conform to the standards of Divisions 19 & 26 as well as this project's architectural & structural standards, the construction schedule, the current National Electric Code (NEC) and all other applicable codes and standards.

GENERAL:

Provide all devices, conduits, junction boxes, backboxes, wiring, etc. that are required to have a specified rating as devices with those ratings and listings per all applicable codes. This includes CE, UL, ETC, NEMA, plenum ratings, etc.

Provide all portable devices with strain relief/rubber grommets for all power and data cabling entry/exit from box(es). No devices with simple holes cut in them for cable entry/exit and without grommets or other approved strain relief systems shall be allowed. Strain relief shall be painted to match color of box it is mounted to.

Provide all misc. cabling, jumpers, two-fers, extensions, turn-arounds, adapters, connectors, labor, data cords, etc. in order to provide and interface all fixtures with plugs to match those on the connector strips and outlet boxes included in the design (and any existing related devices), even if those cables are not specifically listed on the contract documents. Provide all portable and interface cabling with tie line and cable type/length marked at each end.

Program the architectural control system so that all remotely controllable relay circuits are powered on at 6:00 AM and powered off at 12:00 PM every day (with override to ON if someone initiates a preset or control console function at any time during those "off" hours. Stagger the relay power up sequence in order to lessen the overall inrush current potential to the power system. This will help in extending the effective life of the LED lights by depowering their control electronics circuits for approx. 6 hours every day. Verify with owner and all applicable codes whether this should also apply to the circuits powering the LED houselighting fixtures that are being powered from the ELTS2 device, as these may need to be programmed to be on at all times in order to meet NEC and owner requirements.

Set maximum trim for all dimmable LED houselighting fixtures within this project to 80% of total full output (as an initial and not to exceed limit - actual day-to-day settings shall be field tweaked with the consultant during acceptance testing day(s) and then programmed & saved to all related devices, presets, show files, master templates, etc. by the contractor. No dimmable LED houselighting fixtures shall be allowed to exceed 80% of their total full output.

Program all houselighting presets for a minimum ramp up/ramp down time of 5 seconds.

All devices shown on the drawings are indicated in approximate locations. Coordinate the exact locations of all devices shown with the owner, existing obstructions and any other A/V related items that they may need to be located near or in conjunction with.

All device faceplates shall be from the manufacturer's standard color selections (cream/ivory, white or black - TBD by owner) with contrasting color engraved lettering/numbering unless otherwise noted (such as junction boxes) and as directed by owner/architect. All device faceplates shall be labeled with the nomenclature as indicated on the single line flow diagram. Device types shown on flow diagram and plans shall not be engraved on faceplates (shown on flow diagram in parenthesis - these are for ease of identification only), unless specifically indicated as such. Only the nomenclature shown, plus owner selected names as indicated, shall be engraved on faceplates. Obtain any owner selected device faceplate names in writing prior to ordering or fabrication.

MISCELLANEOUS:

All circuits in this lighting system (dimmed, relay and/or constant) shall be physically landed in a one-to-one patch from origination to destination. This means that Circuit #X at the dimmer rack must be carried through from there to the JB/GIJB and to the connector strip/outlet box/misc. other destination as the same Circuit #X throughout. Soft patch cannot be used in order to accomplish proper dimmer routing. Where existing wiring is to be reused, the use of inline butt splices and wiring extensions shall be required in order to accomplish a proper 1:1 patch. In the case where there is more than one rack with overlapping numbering schemes (i.e. a dimmer rack and a relay rack), then the numbering shall include a prefix in order to differentiate (i.e. Circuit #D1 would be dimmer rack dimmed circuit #1; Circuit #C24 would be constant circuit #24; Circuit #R12 would be relay rack circuit #12; etc.). The prefix "D" is typically dropped for connector strip or outlet box numbering. Coordinate with the theatrical contractor as required for consistency in all numbering schemes.

Program the architectural control system to pass all necessary DMX channels/values in order to pass and control all intended/indicated fixtures in the system (minimum values are 1 - 2048).

MODEL NUMBERS:

Manufacturer model numbers for products are indicated on drawings to provide a full understanding of the system functional intent. See written specifications and the project manual for additional information and requirements for substitutions and procedures.

STUDIO LIGHTING SYSTEM KEYED NOTES:

Each note indicates a typical location for the type of work to be performed or equipment to be provided. The TC shall provide for all instances of typical work indicated. All drawing notes may not appear or be referenced on each drawing; however, all notes still apply to the work indicated within each note and shall be performed by the referenced contractor(s).

SYSTEM SETUP:

1 The lighting system must be fully operational prior to the commencement of any training or acceptance testing/punch list visits.

ARCHITECTURAL CONTROLS SETUP:

2 Address & program all pushbutton stations to control fixtures/fixture groups and at predetermined levels as is required by the owner. The owner will have specific day-to-day controls access requirements, fixture access requirements, pushbutton station functionality requirements, timed event and timed access requirements, etc. that must be completely programmed for the owner. Obtain owner sign-offs, in writing, prior to commencement of final programming.

3 Independent to each studio: The intent is for either the control booth lighting control console or that studio's portable lighting control console to be "selectable" from a control standpoint. Once one is selected (either via a physical pushbutton station trigger or a touchscreen trigger) that device shall take over complete control of the studio lighting system and the other device shall no longer have "input" until it is reselected. In this way there are no "behind the scenes" programming or control sequences or looks taking place that the operator has no control over, etc. When control is selected the system shall switch to a preset state (verify preset state status with owner - all studio fixtures off/worklights on full, retain current levels but release control, etc.) This preset state should be discussed in detail with the owner and fully signed off on, in writing, prior to implementing any control system programming. Each fixture in each studio shall be programmed with a fixture name, fixture descriptor, fixture number, graphical representation of the fixture on the portable touchscreen, DMX address and universe assignment (each of these assignments shall be mirrored with labels on each fixture - labels to be large enough to be easily read but also not impede fixture cooling or usage). Corresponding cabling for each fixture shall also be labeled to reflect fixture number, DMX address and universe assignment. Only a graphical representation of each fixture along with its fixture descriptor shall be required on the touchscreen (all other info shall remain "hidden" from view) along with the other controls indicated on the details sheets. If factory fixture name & descriptor are in a large and bold enough font on each fixture, then these can be used for the fixture name & descriptor (there is no need to duplicate this with additional, redundant labeling). For instance, the ARRI font sizes appear to be of adequate size to satisfy the intents and for easy viewing from a reasonable distance. Group fixtures, by type, on the touchscreens for control. The system shall default/reset back to control booth console control at midnight (12:00 am) every night.

4 All portable cases shall be set up, custom foam cutouts complete and neat, all devices & accessories stored and marked. Provide laminated list on top of each case that details the case's contents. Mark each case for the owner, as directed, with nomenclature as to ownership, etc.

5 Provide custom signage for the relay rack location as indicated. Provide all nomenclature indicated plus additional as applicable. Mount signage on an adjacent wall near the relay rack as space allows.

6 Unpack, set up, address & program all LED fixtures, set fan speeds to studio/quiet mode (or other levels as indicated), set colors, create/program/assign color pickers, create and assign devices in smart template or magic sheet style files, arrange touchscreens (on screen windows and physical layout) per owner's wishes, plug-in power/data cabling, daisy chain as required, manage all related cabling, label fixtures as indicated, provide all tie-line cordage (cut and properly installed), assign fixtures into groups, sub-groups, faders, presets, architectural controls, touchscreens, browsers, smart devices and related apps, etc. and at predetermined levels as is required by the owner. Provide an owner-directed focus per spec requirements. Program all DMX and gateway assignments and terminate all DMX runs with terminators per spec. Provide a fully complete lighting package, fully set up and ready to use.

PORTABLE STUDIO CONSOLE:

7 Provide the portable lighting control console & monitor with the cart and all accessories as indicated. Provide with a 35' long, black power and control cabling bundle for portable use around the studio/photo lab floor areas. Neatly bundle the power and control cables together with black Velcro style straps every 12" along the entire length of the umbilical. All portable cabling used for the interfaces shall be highly flexible, round, black jacketed cabling.

8 Provide all portable cabling and accessories storage containers, labeling, etc. as indicated. Provide, label and package all portable cabling into the indicated tote/storage container system. Cabling shall be stored by type into different tote sizes as indicated on detail drawings. Remove all shipping wire ties, packaging, etc. and furnish all cables with required tie line, etc. as indicated. See details for complete info.

9 Label all lighting system equipment with nomenclatures as indicated on these drawings. This includes, but is not limited to, architectural control system components, gateways, racks, fixtures, internal rack wiring, low voltage control wiring, patch panel legend(s), etc.

ELECTRICAL RELATED NOTES FOR THE STUDIO LIGHTING SYSTEM:

Each note and detail indicator indicates a typical location for the type of work to be performed or equipment to be provided. The referenced contractor shall provide for all instances of typical work indicated. All drawing notes may not appear or be referenced on each drawing; however, all notes still apply to the work indicated within each note and all similar instances of typical work shall be performed by the referenced contractor(s).

Perform all work as described below and on each TL series drawing. All work shall conform to the standards of Divisions 19 & 26 as well as this project's architectural & structural standards, the construction schedule, the current National Electric Code (NEC) and all other applicable codes and standards.

REFER TO THE 19 2000 SPECIFICATIONS SECTION AND ALL OTHER TL SERIES DRAWING NOTES, KEYS, SCHEDULES, ETC. AS THEY CONTAIN ADDITIONAL INFORMATION REGARDING THE EC'S SCOPE OF WORK AS IT RELATES TO THE THEATRICAL LIGHTING SYSTEM.

PROFESSIONAL STANDARDS:

The contractor is expected to install all work to the appropriate industry professional standards, manufacturer recommendations and current applicable codes. If any work required exceeds the skills of the contractor, then he shall employ appropriate subcontractors for the scope required.

The acceptability of materials and workmanship shall be determined by the Architect, Consultant and CM.

Any work that might be damaged, inadvertently painted or become dirty during construction will be protected by the contractor. All responsibility for protection shall be by the contractor. The contractor shall provide final cleaning and or repair of all equipment in their scope to like new condition.

The contractor shall attend and/or arrange meetings as required to ensure their scope is coordinated with all other trades. The contractor is responsible to make known to all other trades critically dimensioned items and locations to avoid conflicts. Where conflicts occur, follow required procedures in the project manual to seek resolution.

Where any substandard work is provided by related trades that impedes the work of the contractor, he shall notify the CM, Consultant, Architect or Engineer in writing as called for in the project manual to rectify the issue.

Where work is provided by others, the contractor is responsible to verify installation conditions that relate to his work. If installation of related work is substandard, then the contractor shall generate a written RFI through proper channels based upon the project manual. The contractor shall not install his work to any substandard devices, etc. provided by others until such work has been resolved or until the contractor has received written authorization from the construction manager to proceed. If the contractor ignores substandard installation work by others and proceeds to install his devices to these items, then he accepts and bears sole responsibility to repair, reinstall and correct any found deficiencies to the satisfaction of the owner upon final inspections.

The contractor shall comply with the AHJ (Authority having jurisdiction) as it relates to programming any and all emergency interfaces.

The contractor is expected to possess knowledge of the equipment of his industry and to provide all small items required to install the specified equipment. Provide all small items such as rack rails, DIN rails, rack panels, power cords, connectors, wall-wart power supplies, crimps, nicopress and other items that may not be specifically called out on the drawings or in the specs but are required to support primary equipment.

When in doubt about any aspect of the work, the contractor should not proceed until he obtains clarification from the appropriate entity with authority following procedures detailed in the project manual.

BOXES, CONDUIT & WIRE:

All work must comply with applicable codes, NEC and NYSED requirements.

No conduits and/or wiring shall be allowed to be routed in, around or in such a way as to restrict or obstruct the movement of any rigging system components.

Connector strip electrical wiring shall be SO/SJOW/SOOW (or similar equivalent rating as required per NEC and installation location) multi-conductor cabling. Utilize as few multi-conductor cables as is required in order to support the indicated circuits (including individual hots, neutrals and NEC required quantity of grounds). Multiple single circuit SO style cables bundled together shall not be allowed.

Verify exact wiring details, conduit/wire routing paths, etc. with approved factory shop drawing submittals for technical, performance and theatrical systems prior to roughing in any power, conduit or wiring for devices. Some devices have internal lugs, some may require external or additional boxes or outlet devices and some devices may be approved equivalents.

Coordinate the exact locations of all devices with the lighting, rigging, A/V and other theatrical/technical systems clearance requirements, etc. in planning out conduit & cabling paths/lengths. The conduits shown on the drawings are understood to indicate the conduit types, sizes and wiring required only. The exact conduit routing paths and quantities of couplers, elbows, LB's, JB's, misc. pull boxes, support hardware, etc. that are required have not been indicated and must be determined by the contractor prior to rough-in.

Architectural controls & misc. system interface/power boxes: Devices have been shown in suggested yet diagrammatic locations on these drawings; however, it is the intent that the owner choose all final actual locations of all devices. Obtain owner sign-offs for all device placements prior to rough-in. Coordinate final locations with existing obstructions.

Mount and locate all indicated equipment per NEC regardless of the visual depiction locations shown on the contract drawings. If a device must have NEC driven clearances, etc. and this precludes mounting the device in or near the indicated location, then locate the device where it needs to be in order to meet NEC.

Any junction boxes that may be needed for conduit/wiring runs in the catwalk, side galleries or on stage shall not be located in inaccessible or buried locations. Conduits shall be located at 7' - 0" AFF on catwalk and side galleries or higher and may not be mounted on any lighting pipe batten, in between lighting pipe positions or any other way that violates any notes or visual depictions shown on the contract documents. Do not encroach catwalk walking area with conduits or loose wiring.

Provide all wiring run in conduit unless specifically noted on these drawings as otherwise. No conduit shall be allowed to be loaded beyond 50% fill.

Provide all devices, conduits, junction boxes, backboxes, wiring, etc. that are required to have a specified rating as devices with those ratings and listings per all applicable codes. This includes CE, UL, ETC, NEMA, plenum ratings, etc.

Terminate all conduits into racks, junction boxes, pull-boxes or other appropriate devices as indicated. No cut off conduits with end bushings and wiring dangling out the end shall be allowed.

Refer to all lighting related notes, drawing arrow notes and written specifications for work clarification and additional scope of work as it regards assembly, installation labor, labeling requirements and/or coordination with theatrical trades. Labeling requirements outlined in the written specifications are extensive and detailed.

Any wiring splices necessary must utilize butt style inline insulated splices crimped with a properly adjusted controlled cycle termination tool. Referenced product Panduit BSV10X-D or equal. Size splices per gauges of wiring to be spliced & provide as required. No incorrectly sized splices shall be allowed.

Labeling: All conduits shall be clearly labeled on each end as to their origin and destination in a simple, logical manner. All junction boxes, switch boxes and backboxes indicated on drawings shall be labeled with the nomenclature indicated on the drawings. All outlet boxes shall be labeled with the corresponding panel and circuit designations they are fed from. Permanent black marker on conduit or junction box face is acceptable on conduits, junction boxes, etc. that will not be painted. If any related devices are to be painted, then provide the following: Conduits shall be labeled with 3M Durable ID Labels with permanent adhesive (applied after painting). Junction boxes, etc. shall be labeled with 3M Durable ID Labels with permanent adhesive (except stage devices, which shall be labeled with Lamacoid style engraved labels, permanently adhered to the device). All junction boxes, outlets, etc. shall also be labeled on the back of each cover plate and also with a durable tag inside each box stating the same information. All labeling shall be done with block style lettering/numbering by hand or printed. All labeling shall reference the device's designation, conduit originations/destinations, etc. & not be a coded, indexed or legend style referencing system.

Provide blank cover plates for any switch box or junction box that does not have a specific device plate indicated on the drawings symbols keys. All cover plates shall be provided in a color and style that matches other cover plates in the immediate vicinity of the indicated device or as determined by the owner. Cover plates shall be "form fitting" and shall not have sharp edges that protrude out past edges of backboxes.

All conduits shall be concealed unless specifically called out on drawings as exposed. Any visible conduits and boxes are to conform to general contract requirements and Division 26 for finish and installation requirements.

Back-to-back outlets in common or acoustical walls shall not be permitted. All outlet boxes shall be separated by at least one stud bay/cavity. Putty pads must be installed in all backboxes. See architectural drawings/specs for putty pad requirements and installation methods.

FLEXIBLE CABLE DROPS:

Flexible cable supports and strain reliefs shall be as follows: Cable entry into raceways, grid iron or other junction boxes (such as for SO type flexible wiring) shall be Hubbell Kellems grips for strain relief, Deluxe liquid tight cable grips (07401 series). Where multiple cables are bundled together provide a separate kellems for each cable entry and start bundling the cable far enough down the run to avoid conflicts of grips. Cable support (such as overhead or auxiliary support for SO type flexible wiring, power cabling, control wire, etc.) shall be Hubbell Kellems grips for cable support (02206 series) heavy-duty, single eye, double weave grips. Note that both styles of grips MUST be installed over the blunt cut end of the wiring, so coordinate installation of grips with termination of related cabling.

Flexible cables shall be sized to allow proper swag to the rigging system. Coordinate exact length with the rigging system and related set movement/travel and related trades. Do not purchase, install or terminate any flexible cable drops until the length is determined.

Flexible control cable drops for connector strips shall be provided by the contractor. Where these attach to connector strips/outlet boxes (DMX or network distribution) they will need to be bundled with the SO multi-cable. Provide all flexible control cable drops as black jacketed TMB ProPlex or SSRC AES/EBU DMX/DATA style stranded network wiring down to connector strip(s). Solid core wiring is not allowed for flexible data drop cabling.

All circuits are required to have separate hot and neutral conductors. Provide ground wiring as required by applicable code. All circuits shall be calculated for full rated loads, constant-duty, non-diversity, unless otherwise indicated. Size wire gauges and conduit to allow for full load operation after taking into account all derating for distance, voltage drop and other conditions required by the NEC, the New York State building codes and any applicable local codes.

Provide all low voltage control cabling pulled in and out of conduit as indicated on drawings. Do not pull any wire until submittals and lighting shop drawings have been approved & issued. Verify all wire types, quantities and routing with the approved submittal shop drawings.

Where low voltage wire is indicated on the drawings, either in conduit or in walls, ceilings or chases, this wire shall be provided with at least 3' excess wire at each end unless otherwise indicated on the drawings. Secure ends of all pulled wire to prevent accidental removal or damage during construction. Label all low voltage cables as to their origin and destination and tuck into back boxes to protect from damage and until final termination by the factory technician. Coordinate availability on site when the wiring is to be terminated to assist with any problems encountered by the factory technician. Provide continuous pull strings in all conduits even after all indicated wire is pulled.

Where conduit is indicated with no wire called out on the drawings, provide the conduit with a pull string. Provide continuous pull strings in all conduits, tied off at both ends, even after wire has been pulled. Wire must be able to be pulled through the conduits without exceeding the pull spec of the specified wiring. Typical pulling tension for cables of this type is between 35 and 50 lbs. tension.

In some areas wiring may be called out as CL3 not in conduit. In these areas provide adequate attachment and support to protect the cable from potential damage using the best routing. Wiring may not be left lying loose in any area unless fully protected (i.e. Inside a wall).

Install all Category 5 or higher cabling noted on these drawings in accordance with all applicable ANSI/TIA/EIA standards and recommended practices as it relates to cable run lengths, cable pull tension, minimum bend radii, etc. Any damaged or non-functional cabling installed and found to be defective shall be completely replaced the installing contractor's own cost.

Radius all conduits where possible. Conduit runs are not to exceed 180 degrees of radius bend. Where elbows and pull boxes are unavoidable, locate these in easily accessible locations not requiring special equipment to reach. Any elbows used must be sweeps and must be accessible without the use of special equipment. If more than 180 degrees of bend is required, Provide accessible pull boxes. Provide as-built drawings that clearly indicate the exact locations of all pull boxes with dimensions, conduit routing paths with dimensions and all junction/termination boxes.

Provide all power circuits indicated on TL, TR, and TS drawings and associated conduit, backboxes, wire, termination and duplex outlets. Termination of these outlets will be to panel boards as indicated on E-series drawings. These outlets may also be indicated on E series drawings. Check TL and E drawings and verify there is no duplication of devices. Some outlets are to be installed in racks - coordinate with the theatrical contractor for exact locations within each rack.

INSTALLATION OF EQUIPMENT:

Fire stop all penetrations in fire rated assemblies resulting from the work of this contract.

Provide acoustic caulk infilling and professional finishing on both sides of ALL Studio walls, floors & ceilings or any that is shared with the control booth or related ancillary spaces that has been penetrated by lighting system related conduit, raceway or wiring.

All attachment methods for equipment to conform to Division 26 and Division 19 specifications.

ACCEPTANCE TESTING:

Prior to system turn on, perform all manufacturer required procedures for Field Service Technician arrival and system energization including, but not limited to, feeder cable termination, dimmer rack access & secure mounting, dimmer rack air gap sealing, branch & load circuit terminations complete, control wiring runs match manufacturer shop drawings, etc.

Have a representative on sight during final system test to provide assistance with any line or load wiring problems encountered.

NOTE:

It is each contractor's responsibility to receive all device shipments, equipment, deliveries, etc. for their own equipment on/at the job site personally. This will require each contractor to carefully coordinate drop-ship delivery dates with the manufacturers and trucking companies in order to have adequate personnel on site to inspect, unload and store all shipments. Each contractor shall be responsible to arrange for storage of all received materials on site until the appropriate time when he shall either turn them over to installing contractor or install them himself.

If the contractor chooses to allow a third party to receive shipments on his behalf, then that contractor bears sole responsibility for any missing and/or damaged parts and devices that may need to be reordered or rush freight required to maintain schedule, all at no additional cost to the owner.

Any equipment that is furnished by the receiving contractor but installed by others shall be turned over to the installing contractor at such time as it fits into their production schedule and the project's overall construction schedule.

Any large items such as racks, emergency transfer equipment, etc. shall be transported by the receiving contractor from its storage area and relocated to the general vicinity (i.e. in the room and general area) where it will be installed. At this point in time it shall be turned over to the installing contractor for installation.

ELECTRICAL RELATED KEYED NOTES FOR THE STUDIO LIGHTING SYSTEM:

Each note indicates a typical location for the type of work to be performed or equipment to be provided. Provide for all instances of typical work indicated. All drawing notes may not appear or be referenced on each drawing; however, all notes still apply to the work indicated within each note and shall be performed by the referenced contractor(s).

A

Branch circuits indicated are for the dedicated use of the specified system. No other connections may be made or branches added to these circuits. Each circuit must have a separate hot, neutral, and ground conductor. Conduit grounds are not acceptable for these circuits. All wire to be THHN stranded with gauge as required by NEC. All grounds to be #10 minimum THHN stranded copper. Where ISO ground panels are provided the THHN ground wire shall be utilized for the ISO ground. Building ground to switch boxes on ISO ground circuits as required by NEC.

Neutrals and grounds may not be shared with any other circuits.

The branch circuits indicated are to be installed as indicated. Coordinate with the appropriate contractor where connections are to be made within racks and equipment furnished by others to provide well timed construction progress.

See E series drawings for feeder panel designations and origination. Do not duplicate circuits.

All indicated circuits shall be individual, independent, home-run circuits to a panel/breaker box as indicated on the E series drawings (unless otherwise noted or indicated as being paralleled with another). Provide circuits in voltage, wattage, phase and amperage and land/terminate each circuit into a backbox or other device as indicated.

All circuits in this lighting system (dimmed, relay and/or constant) shall be physically landed in a one-to-one patch from origination to destination. This means that Circuit #X at the dimmer rack must be carried through from there to the JB/GIJB and to the connector strip/outlet box/misc. other destination as the same Circuit #X throughout. Soft patch cannot be used in order to accomplish proper dimmer routing. Where existing wiring is to be reused, the use of inline butt splices and wiring extensions shall be required in order to accomplish a proper 1:1 patch. In the case where there is more than one rack with overlapping numbering schemes (i.e. a dimmer rack and a relay rack), then the numbering shall include a prefix in order to differentiate (i.e. Circuit #D1 would be dimmer rack dimmed circuit #1; Circuit #C24 would be constant circuit #24; Circuit #R12 would be relay rack circuit #12; etc.). The prefix "D" is typically dropped for connector strip or outlet box numbering. Coordinate with the theatrical contractor as required for consistency in all numbering schemes.

B

Locate the Green Room Studio/Photo Lab gridiron junction and DMX drop boxes in such a way that the flexible SO and DMX cables dress neatly, in line with and/or through the SSRC cable tray system the connector strip set pipe battens and so that they will not interfere with adjacent devices, etc. during normal system operation. Attach securely to overhead structure as indicated. Coordinate cable dress, box orientation and drop requirements as required. Conduit entrance locations to GIJB's cannot interfere with SO cable exit locations.

C

HOUSE/WORK LIGHTING SYSTEMS:

PROVISION OF FIXTURES - Provide all house/work lighting fixtures and all required/indicated supplementary hardware, supports, etc. Protect from dirt and dust until final cleaning in the space has been performed. Protect from overspray & painting.
HOUSELIGHT TESTING & FINAL ACCEPTANCE - The entire house, accent and work lighting system shall be set up and burned in at full for a full 30 days (24/7 and without interruption) after all dirt and dust creating work and all appropriate cleanups have been completed (fixtures shall remain with protective dust coverings until this time). Upon completion of this burn in, the contractor shall visually inspect every houselight location in order to gauge performance and lamp/fixture acceptability. All houselight fixtures that exhibit abnormal behaviors or any fixtures that display inconsistent visual or measurable anomalies (any behaviors or outputs that deviate from the "group" norm or from the manufacturer's stated parameters - i.e. lower light output than other fixtures, changes in light output pattern, strobing, ghosting, popcorning, flickering, fading, overheating, etc.) shall be deemed as faulty fixtures and shall be replaced by the contractor. Fully wipe clean with a new, lint-free, damp cloth each fixture's related LED array and the interior of the reflector cone prior to final acceptance.

D

MISCELLANEOUS:

Refer to the E Series drawings for power conduit sizes and wire gauge/type designations and requirements as well as for panel and circuit designations.

In addition to the scope of work described above, review all notes on TL, TR and TS series drawings as well as spec sections 191000, 192000 and 193000 for any additional information on the scope of work and coordination labor to be provided due to related work by others.

Provide all backboxes in sizes as indicated. No multi-gang backboxes with raised, tile ring, extension ring or mud ring style reducers to obtain the specified faceplate gang size shall be acceptable in lieu of the indicated device backbox. Install all backboxes flush, plumb and level.

Provide all surface mounted outlet boxes as full-sized backboxes so that the cover/face plates do not protrude beyond the box edges. All outlet boxes to be Thomas & Betts AFS style boxes or equivalent size/style. The intent is for the faceplate to be the same size as the backbox in order to prevent sharp or protruding edges that could catch or snag clothing, etc. or cause injury.

Extend all existing houselighting wiring from its existing feed locations as needed to reach the new dimmer rack locations. All extensions shall be performed per NEC code, including raceways or junction boxes as needed.

Provide all swagged, cable tray mounted, portable, visible DMX/Network cable as SSRC AES/EBU-DMX 110 Ohm, 2 Pair, Flexible Black DMX/ethernet tactical style flexible cable with no connectors. No other colors for outer jacket shall be acceptable. Provide only flexible cable. All connectors required shall be Neutrik XLR style connectors, unless otherwise noted or required.

All locations & clearances shown for the dimming system & other related devices are specific & critical and may not be altered in the field without obtaining prior written permission from the consultant. Any new proposed locations or field obstructions must be communicated to the consultant in writing and clearly indicated on scaled plan drawings for approval prior to rough-in.

All conduit, connectors, backboxes, Unistrut channel, GIJB's, worklighting fixtures, EM fixtures (except fixture lens & reflector), junction boxes, houselighting fixture mounts/supports and all related hardware, etc. mounted in the studio or photo lab ceiling spaces or areas that are not inherently black in color shall be provided/painted flat black. All items shall be properly primed prior to final painting so that the black paint adheres to the surface and does not easily scratch off. All flexible wiring out of conduit must be inherently black jacketed cabling.

MODEL NUMBERS:

Manufacturer model numbers for products are indicated on drawings to provide a full understanding of the system functional intent. See written specifications and the project manual for additional information and requirements for substitutions and procedures.

QUOTATION NUMBERS:

Manufacturer reference quotation numbers given for any piece of equipment or assembly have been provided for convenience in obtaining bid prices. The quotation reference number does not guarantee exact final dimensions, accessories, fit and finish, or changes that might be implemented via addendum or change orders. The successful contractor is solely responsible for verifying any product purchased for this project meets the performance requirements, finish, fit, and all other required performance factors regardless of any factory quote number issued.

E

CATEGORY WIRING & TERMINATIONS:

For all DMX, network, category, 0-10V, control and data style cabling: Restrict all conduit and wiring runs to less than 250' - 0" (as a general rule and as measured along the resulting wire path from device origination point to device destination point).

Pull, terminate, test and certify all category wiring pulls prior to system turnover to other related trades. Provide a full, written report to the architect, CM, consultant and all related trades that verifies a complete and certified network of cabling. Testing shall be performed using current industry standards and equipment (Fluke, Meterk, Klein Or Equal) as well as all required methodologies, reporting and documentation procedures, etc. Any wiring anomalies shall be corrected by the installing contractor prior to turnover of this system to related trades. Only a fully certified system shall be allowed to be turned over to a related trade or to the owner. All category terminations must be performed with IDC (insulation displacement connectors) style connector devices. Standard category wiring shall not be allowed for portable or swagged drops along SO cables (for these, only SO style flexible black-jacketed, heavy duty category cabling such as SSRC, CBI, Gepco or TMB Proplex data cabling shall be allowed).

F

SO FLEXIBLE MULTI-CABLE STUDIO ELECTRIC POWER DROPS:

The SO multi-cables and related internal conductors between the GIJB boxes and related connector strips shall be sized at 10AWG and shall meet the following conditions:

1. There must be fewer than (13) single phase circuits with 20A circuit breakers in each SO multi-cable.
2. The SO multi-cables must be provided as 90 C rated cables.
3. Individual hot & neutral per circuit; quantity of grounds per NEC.

All SO multi-cables must meet the requirements of NEC table 520.44.

G

ACOUSTIC ISOLATION PENETRATIONS & WALL PANELS:

Maintain ALL acoustic isolation characteristics, etc. when penetrating or routing ANY conduits, cabling, wire, raceways, etc. through any acoustic wall/assemblies. The contractor shall be solely responsible to seal around all conduits that penetrate or pass through any acoustic walls, etc. in order to maintain their STC ratings. This will include working closely with all related trades as well as sealing all penetrations in the proper sequential order during wall constructions, etc. in order to properly seal as required. The contractor shall be responsible to correct, at his own expense, any acoustic assembly STC deficiencies that result from his work. Use only acoustic caulking or other approved acoustic sealants. All seals must be neat, clean and complete.

Any devices mounted in areas with acoustical panels installed on the wall shall be provided as follows: Flush mount backbox into wall as standard. Carefully mark and cut acoustical wall panels, X cut face fabric and cut/remove glass fiber board (follow manufacturer's instructions carefully so as to maintain fabric wrap and aesthetic value/integrity). Take extreme care and caution when cutting face fabric, etc. Apply spray adhesive and reattach face fabric. Provide extension rings, etc. as required for devices (WAP, etc.) and match all installation instructions and installation details for all other electrical, fire, and other misc. device installations, etc. as it applies to mounting these devices with the acoustical panels. See architectural drawings for panel layout and seams. Installation details and mock-up of locations (using device templates) to be approved by architect prior to any installations. Failure to follow these and any manufacturer or other architectural details in handling mounting devices on/with acoustic panels will result in the contractor providing new acoustic panels at his own expense.

H

ADDITIONAL INSTRUCTIONS:

All surface mounted conduits shall be painted to match the substrate/surface they are mounted to. Conceal all conduits that are possible.

DO NOT locate ANY devices in the Level 5 finish Green Screen Wall areas in the corner of either studio. These areas are off limits to all devices. These areas are to be maintained with NO breaks, devices, inputs, outputs, plates, boxes, JB's, conduits, wiring, etc. See the TR series lower level plan and architectural drawings for the physical extents and approx. dimensions of this off limits area. This is to be maintained from the finished floor height to the underside of the overhanging soffit/mechanical room wall height in the vertical plane.

I

ACOLYTE DESK LIGHTING SYSTEM:

Provide the entire L-shaped Acolyte desk accent/work lighting system & supports/hardware. Mount the Acolyte ribbons & related aluminum extrusion(s) as required for a continuous, uninterrupted appearance. Provide the appropriate extrusions adjustable leg brackets, power supplies, drivers, aluminum extrusion, Unistrut support channels, misc. blocking above ceiling, misc. hardware & interface devices as needed in order to mount & power the indicated lengths of Acolyte strips. Mount the drivers & DMX decoders inside NEMA control junction boxes with vented panels as indicated & locate above ceiling/ceiling tiles in an accessible location (discreetly mark tile to note location above). Provide all control junction boxes, custom sized raceways, additional misc. metal, brackets, hardware, etc. required. Protect from overspray & painting.

GENERAL NOTES:

Do not scale plans.

Field verify all dimensions before ordering material or performing any work. Location of all devices must be coordinated with existing and/or new architectural, mechanical, electrical and structural elements. Where conflicts occur contact the architect, construction manager and consultant in writing for clarification before performing any work.

Where work is critically dimensioned to work provided by others it is the sole responsibility of the contractor to verify the intended location of all other elements with all other contractors by reviewing their shop drawings.

Coordinate all work for symmetrical installation with relation to height and level with architectural elements, switches, outlets, and other controls.

These drawings represent the configuration of a system. They do not in any way constitute instructions for installation except with regards to configuration. The sole responsibility for field verification of dimensions, installation/fabrication methods, code conformance, safety issues and the quality and performance of their work shall be that of the installing contractor.

These drawings are to be interpreted in conjunction with all other drawings in the construction set as well as written specifications for this project. The contents of these drawings does not in any way negate the written specifications nor do the written specifications in any way negate the contents of these drawings.

If there are inconsistencies between written specifications and drawings or between any drawing and other drawings in the construction document set, it is the responsibility of the contractor to obtain clarification before bidding this project. If no clarification has been obtained prior to bid, then the contractor shall abide by the decision of the architect and consultant at no additional cost to the owner even if work has to be redone.

Obtain shop drawings from related trades to verify the intended configurations and scheduling of their work. The contractor is responsible for coordinating their work with other related trades in a manner that avoids conflicts of work and scheduling.

CONSTRUCTION DOCUMENTS

STUDIO GREEN SCREEN U-WALL FINISH & PAINTING NOTES:

Finish The Indicated Wall As Directed Below: (17)

1. Prep all surfaces.
2. Apply fiberglass mesh joint tape to all joints.
3. Mud all joints with multiple coats, sand, etc. until smooth and flat (Durabond 90 ONLY-no exceptions-no EZ sand style mud allowed).
4. Sweep & vacuum all dust, debris, etc.
5. Wipe entire surface with a clean, damp cloth.
6. Apply one heavy coat of ProCyc Grey Bonding Primer (use only wide rollers to prevent lines and streaking).
7. Apply two medium coats of finish color (chromakey green) to the cove walls and cyc. It is critical that an even final finish coating is obtained in order for video keyer/photo shoot software to work properly.

NOTE: Use disposable surgical booties over shoes for all prep work, set setup, etc. when doing shoots in order to prolong the life of flooring and to minimize damage to the flooring surface.

Green wall paint shall be ProCyc Virtual Green ChromaKey Green ONLY. Provide additional coats of paint as needed. See all notes to the right for more information and requirements.

Perform the following after completion of painting:

A. Verify with owner and video keying system that painted surfaces are sufficiently even in paint coverage so that keying system works properly. If surface coverage is questionable or keying errors occur, then provide additional coats as required in order to obtain an even surface coverage that allows keying system to work properly.
B. Provide the owner with an extra, unopened pails of the grey bonding primer and Virtual Green finish paints as listed below (of each type/color used) for future use after all surfaces have been primed, finish painted and verified with the keying system. Turn over to the owner any leftover supplies from final finishes work as well. All paint provided, both initial coats and extra paint, shall be from the same batch/color runs in order to provide the most consistent coloring possible. All MUST be from ProCyc As Indicated.

(All Drywall Finishes Must Be Level 5 Finish. All ProCyc Joints & Seams And Floor And Wall Intersections Must Be Taped With Fiberglass Mesh Drywall Adhesive Tape Furnished By Factory & Mudded With Durabond 90 Joint Compound. All Painted Surfaces Shall Be Primed With ProCyc Grey Bonding Primer And Finish Coated With 2-3 Coats Of Pro Cyc Virtual Green ChromaKey Green Paint. NO EXCEPTIONS OR SUBSTITUTIONS SHALL BE ALLOWED FOR THE TAPE, MUD OR PAINTS.)

PROCYC SYSTEM 3 EZ SETUP NOTES:

The Contractor Shall Be Responsible To Perform The Following Tasks When Setting Up & Installing The ProCyc Cove Sets (Includes, But Is Not Limited To). The Contractor Shall Perform These And Any Other Tasks Necessary & Recommended By The Manufacturer In Setting Up Cyc Unit & ProMatte Flooring System From Uncrating To Finished, Installed Product:

1. Uncrate & setup/install ProCyc cove system (provide blocking for coves).
2. Sand the entire surface of the ProCyc units (as well as all adjacent related surfaces).
3. Sand all edges to prep for mudding & taping.
4. Prep all surfaces.
5. Sweep & vacuum all dust, debris, etc.
6. Wipe entire surface with a clean, damp cloth.
7. Use disposable surgical booties over shoes for all prep work, set setup, etc. when doing shoots in order to prolong the life of flooring and to minimize damage to the flooring surface.
8. Upon completion of ProCyc setup, the contractor shall install ProMatte flooring as directed by the manufacturer in order to cover the floor area detailed on the drawings.

ALL FINISHING & PAINTING OF COVE CYC/GREEN SCREEN WALLS SHALL BE BY THE CONTRACTOR AND AS PER THE MANUFACTURER'S RECOMMENDATIONS. THE CONTRACTOR SHALL PROVIDE COVE CYCS, DURABOND 90, MESH TAPE, PAINT AND RELATED PAINTING SUPPLIES AND ALL RELATED LABOR.

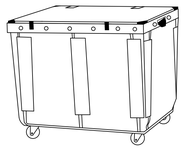
5 CURTAIN FABRICATION DETAIL
TR501 NONE



CURTAIN STORAGE CARTS:

Each Unit Shall Be A New, Extra Heavy Duty Canvas Laundry Cart/Hamper Truck Unit Sized To Comfortably Fit All Stage Curtains (Unless Specific Sizes & Quantities Listed Below). Field Verify Cart Storage Locations With The Owner & Provide Carts That Will Fit Through Required Access Doorways.

Provide (Green Room Studio):

(1) 24 Bushel (BU) Cart For General Use
(1) 20 Bushel (BU) Cart For The Curtains

Provide (Photo Lab):

(1) 24 Bushel (BU) Cart For General Use

Each Laundry Cart Truck Is To Feature Heavy-Duty Zinc Plated Electro-Welded, High Tensile Spring Steel Construction, All Swivel Heavy Duty Caster Set In A Rectangle Pattern Configuration (3" Casters For Carts 20 BU And Under; 4" Casters For Carts 24 BU And Over), Water & Wear Resistant Upper Band, Stitched And Reinforced Vertical Pipe Support Pockets & Wear Points, Riveted Stress Points, Handles For Maneuverability, Rust Resistant Welded Steel Bottom Support, Hardwood Runners And A 3/4" Thick Hinged Birch Plywood Lid (Or Equal) With Zinc Plated Hasps & "Keyed Alike" Master Locks. Provide Stacking Cups On Top Of Plywood Cover Only If Owner Desires To Stack Carts.

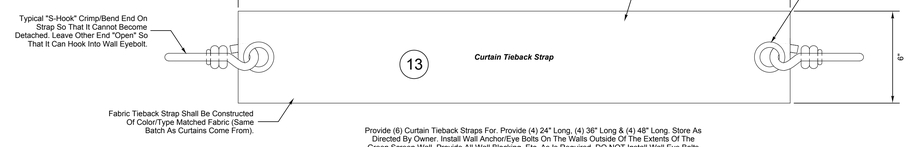
All Carts Shall Be Sized For The Curtain(s) That Will Be Stored In Them (Unless Specific Sizes Have Been Listed Above). All Carts Shall Be Load Rated For The Maximum Weight Of Curtain(s) To Be Stored In Them. Storage Location For Carts TBD By Owner.

Nothing Is To Be Stored Or Stacked Upon The Curtain Storage Units At Any Time (Except Other Carts As Needed). Stacked Carts Are Limited To (2) Units High MAX.

Diagram Above Is Typical Of Curtain Storage Units. Vinyl Sided Laundry Carts/Hampers Shall Not Be Allowed.

No Curtain Track, Rotators Or Misc. Hardware Is To Be Stored Within Or On Top Of Any Of The Curtain Storage Units.

6 CURTAIN STORAGE CART DETAIL
TR501 NONE



Provide (6) Curtain Tieback Straps For. Provide (4) 24" Long, (4) 36" Long & (4) 48" Long. Store As Directed By Owner. Install Wall Anchor/Eye Bolts On The Walls Outside Of The Extents Of The Green Screen Wall. Provide All Wall Blocking, Etc. As Is Required. DO NOT Install Wall Eye Bolts Through Gyp Only. These Must Be Anchored To Something Substantial (Wood Blocking, Stud, Concrete Block, Etc.). Wall Eye Bolts Must Be Smooth, Forged, Flat Black & Only Protrude From The Wall Enough To Clip Into. Mount At Approx. 60" AFF.

7 CURTAIN TIEBACK STRAP/SLING DETAIL
TR501 NONE

Adhere To Curtain Labeling As Follows:
Each Separate Curtain On This Project Shall Incorporate A Durable Label With Permanent, Non-Smudging Ink Detailing The Information Listed Below. For Traveler & Leg Curtains, The Side Of The Stage They Go On (SR or SL) Should Also Be Indicated. All Handwritten Info Shall Be Written In Plain, Neat Block Lettering With Permanent, Non-Smudging Ink That Will Not Leach Into The Label Over Time. All Labels Shall Be Stitched Onto Curtain With One Continuous Row Of Stitching On All Sides.

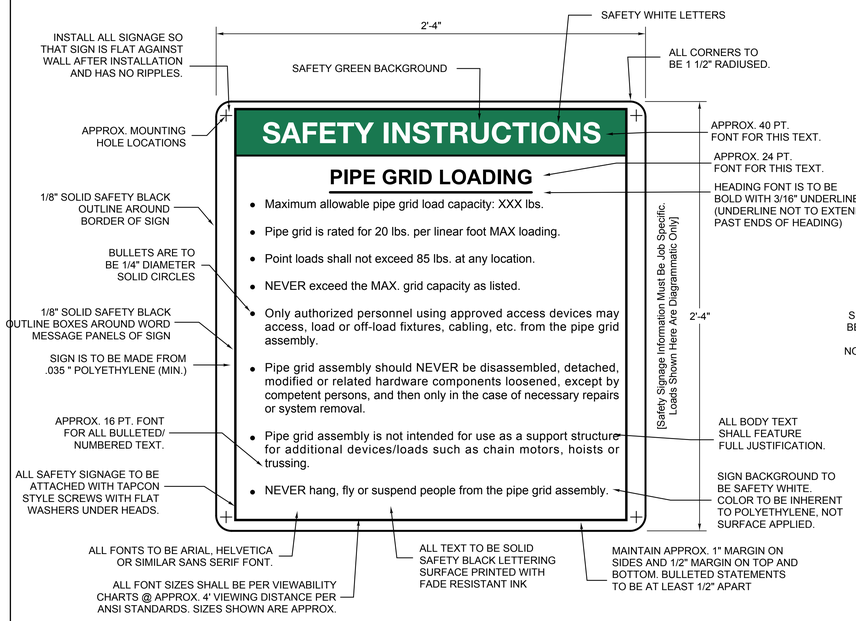
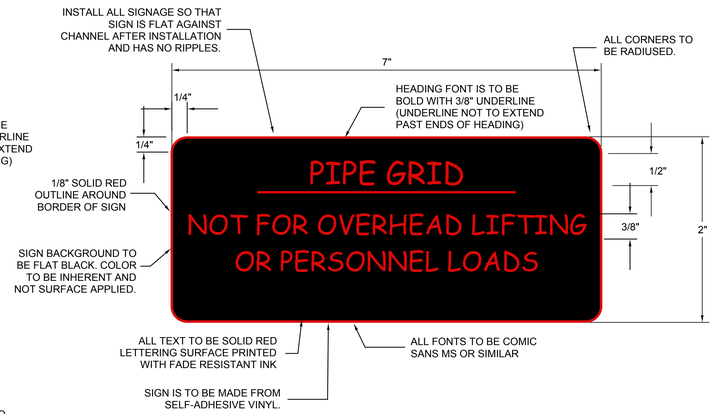
CTE TR504

CONSTRUCTION DOCUMENTS



1 SAMPLE PIPE GRID SAFETY SIGNAGE
TR505 NONE

EACH DETAIL IS REQUIRED FOR EACH SPACE (STUDIO & PHOTO LAB), UNLESS OTHERWISE INDICATED.



[Pipe Grid Warning Signage - The Contractor Shall Provide (2) Signs For Every 10' Of Pipe Grid. Mount One Sign On Each Side Of Pipe Battens & Opposite Each Other. Provide (1) Sign Per Tormentor. Provide (1) Sign For Balcony Pipe Batten.] Sign Titles Shall Reflect Their Location (i.e. Pipe Grid, Tormentor Pipes, Balcony Pipe).

2 SAMPLE PIPE GRID WARNING SIGNAGE
TR505 NONE

REFER TO DRAWINGS CTE TR60X FOR ALL RIGGING RELATED REMOVAL NOTES, DRAWING NOTES, BUBBLE NOTES, KEYS, SCHEDULES, TABLES, ELECTRICAL RELATED NOTES AND OTHER INFORMATION THAT PERTAIN TO THE TR SERIES DRAWINGS.

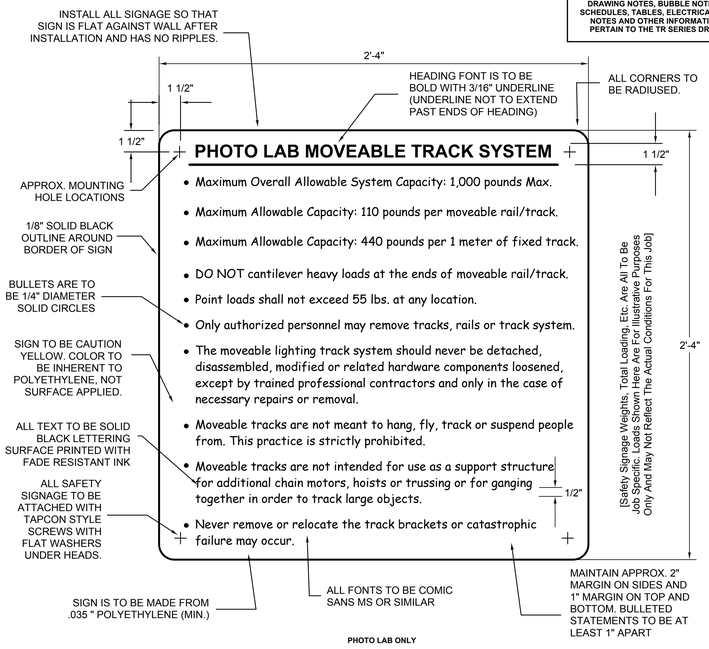


PHOTO LAB ONLY

3 SAMPLE MANFROTTO TRACK SYSTEM SAFETY SIGNAGE
TR505 NONE

NOTES:

Provide The Following Custom Safety Signs (See Written Specifications For More Information). Provide Per Space As Each Pertains And As Indicated.

(1) General Warning Safety Sign (Mounted As Directed By Owner)

(1) Standard Dead Hung Rigging Operational Guidance Sign (Mounted As Directed By Owner)

(1) Pipe Grid Rigging Sign (Mounted As Directed By Owner)

(1) Photo Lab Moveable Track Sign (Mounted As Directed By Owner)

(1) Rigging Inspections Sign (Mounted As Directed By Owner)

(1) ProMatte/ProCyc Sign (Mounted As Directed By Owner)

(XX) Pipe Grid Warning Signs (Mount As Indicated)

Field Verify All Exact Mounting Locations With The Owner & Mount Where Existing Obstructions Permit. DO NOT Mount Any Safety Signage Where It Is Hidden Behind Curtains, Doors, Etc. Or Where It Cannot Be Easily Seen & Read.

15

SIGNAGE MOUNTING NOTES:

Do Not Mount Any Signage In Locations Where It Is Visible From The Audience Areas (E.G., Do Not Place Signs On Open Galleries Facing Audience Or Signs On Upstage Wall Within View From Seating Areas). Do Not Place Any Signage In Locations Where It Could Become A Distraction To Audience Members.

Signage Is Intended For Stage Hand & Operator Information, Use & Warning. Signage Is Not Intended To Be Visible To The Public. Mount In Suggested Locations Unless Otherwise Instructed By The Owner In Writing.

Generally (With The Exception Of House Devices-Truss, Torms, Etc.), All Signage Should Be Mounted Near The Device(s) Being Described In The Signage (Within Approx. 3' - 0").

Signs Shall Not Be Mounted To The Upstage Wall Inside The Extents Of The Proscenium Opening Or In Other Locations Where They Are Buried Behind Obstructions.

Signs Shall Not Be Installed Higher Than 8' - 0" AFF To Top Of Sign Unless Specifically Indicated.

All Signage Must Be Installed In Areas Where It Is Visible From Most Onstage & Wing Vantage Points.

GENERAL SIGNAGE NOTES:

All Signage Shall Meet The ANSI Z535.2-2011 (R2017) Or Most Recent Version.

All Safety Signage Shown Is Diagrammatic In Nature. Specific Safety Signage Text & Statements Must Accurately Reflect The Rigging At The Intended Facility. Verify All Pertinent Signage Text With The Designed & Intended System(s). Do Not Include Any Signage Text That Does Not Apply To This Particular Installation. Signage Sizes & Related Text May Need To Be Larger Than What Is Shown Due To Increased Text Demands And ANSI Requirements For Readability At Distance. Typical Readable Distance Is Generally Understood To Be Approx. 10' - 0" To 15' - 0".

Do Not Reduce Signage Text Font Size In Order To Fit Intended Verbiage Onto Specific Signage Size Shown (Except For Critical Signage Sizes Such As Unistrut, Etc. Signs).

Do Not Cherry Pick Desired Text From Examples Shown Or Rename Signage Titles To Suit Personal Tastes. Include All Pertinent & Relevant Text Shown As It Pertains To This Project As Well As Any Additional Text That May Be Relevant. Reinterpretations Of Text Are Not Allowed Without Prior Written Approval.

For All Set Naming Nomenclatures As Shown On The "Set Capacity Chart" Use Those Names As Shown On The Contract Documents Unless Specifically Instructed By The Owner In Writing To Use Alternate Naming Conventions. If The Owner Is Used To Calling Certain Set Types By Specific Names (I.E. Stage Electrics May Be Colloquially Referred To As "LX1, LX2" Or Border Curtains May Be Variously Referred To As Teaser, Olio Valance, Top Masking, Header, Etc.). In Those Cases It Would Be Best To Maintain Owner Familiarity In Naming Conventions To Avoid Confusion. Verify With Owner In Writing Prior To Signage Fabrication.

All Signage Is To Be Installed In Locations That Make Sense & That Meet The Current ANSI Standards, Unless Otherwise Instructed In Writing By Owner To Mount Elsewhere. (I.E. Place Signage Near, Beside Or Above Equipment It Is Referring To & Within Easy View Of Operators, Except For Any Visible FOH Locations.).

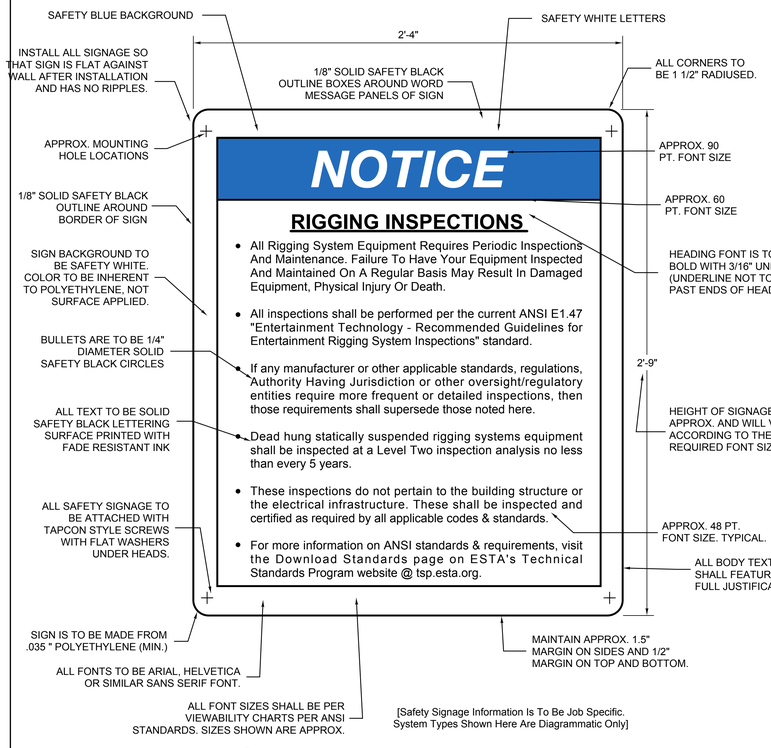
All Signage Colors Referenced Shall Meet The ANSI Z535.1-2017 Or Most Recent Version Color Technical Specifications. Specific Pantone Colors Or Color Mix Makeup Percentages Have Not Been Noted Here. Refer To The Most Recent Version Of The Referenced Standard For Exact Color Requirements.

Do Not Include QR Codes Or Other Links/URL's To Specific Standards On Any Signage, As These May Change And/Or Be Superseded Over Time. Instead Reference Higher Level Locations On A Relevant Website (I.E. "Visit The 'Download Standards' Page On ESTA's Technical Standards Program Website @ TSP.ESTA.ORG For More Information" Or Something Similar).

All Signage Must Be Spell-Checked By The Contractor. No Signage With Spelling And/Or Major Grammatical Mistakes Shall Be Allowed. Verify That All Final Signage Text Matches Approved Shop Drawings Prior To Installation. Any Deficient Signage Will Be Replaced By The Contractor At His Own Expense.

Fully Instruct The Owner On Periodic Maintenance Required Of Signage To Keep Clean & To Maintain Good Legibility Over Time. Inform Not To Use Harsh Cleaning Chemicals On Signage.

Do Not Place Any Safety Signage Where It May Get Damaged Or Dislodged Due To Set, Arbor, Motor Or Other Stage Device Movement Or In Areas Where Portions Of The Signage Will Be Blocked By Doors, Racks, Gates, Rigging System Components, Etc.



4 SAMPLE RIGGING INSPECTIONS SIGNAGE

1/4"

APPROX. 24 PT. ARIAL FONT FOR THIS TEXT.

PROPER CARE & USE INSTRUCTIONS

1. Inspect the entire cyc monthly to check for damage, cracking or other signs of damage/wear that may need to be fixed or addressed.
2. Repaint the entire cyc surface whenever the surface becomes too marred, marked up or damaged to properly key.
3. ProCyc does not recommend that the cyc surface be washed with any type of liquid. If the painted surface becomes too dirty to key correctly, then repaint the entire surface per the manufacturer's application instructions.
4. Inspect the dry mortar bed behind the base of the cyc floor units annually and repair as necessary to keep adequate and proper support under the leading edge of the curved ground row cyc sections.
5. Inspect the cyc supports and hardware connections (bolts, screws, nuts, etc.) annually to verify good working order. Tighten any connections that have become loose. Replace any damaged/rusting hardware immediately.
6. Do not hang anything on or to the cyc or related support legs/hardware. It has not been manufactured to support extraneous devices, fixtures, etc.

PROPER CARE & USE INSTRUCTIONS - CONTINUED:

7. Do not stand on or place props, set pieces, etc. on any part of the ground row of curved floor cyc panels. These are not intended for load.
8. Any cracking, holes or other broken panel damage to the cyc units themselves should be repaired immediately by a competent professional.
9. Do not use the cyc if it is damaged. Repair prior to returning the cyc to active service. Any ProCyc repairs can be successfully completed by a person with the knowledge and skills in repairing and finishing drywall or fiberglass boats.
10. Do not remove any previous coats of paint when it comes time to repaint the cyc. Simply apply new additional coats of ProCyc Virtual Green paint directly over the existing coats of paint. ProCyc Virtual Green paint is intended to be used in conjuction with the ProCyc Grey Bonding Primer. See manufacturer painting instructions for complete info.
11. The ProCyc must be located in a climate-controlled room. Exposure of the cyc to large temperature and humidity swings could detrimentally affect the taped joints, painted finishes and ultimate reliability when utilized with any keying functions, etc.

11"

ALL TEXT TO BE SOLID BLACK LETTERING (EXCEPT AS NOTED) & SURFACE PRINTED WITH FADE RESISTANT INK

STANDARD USE - FLOORING

1/8"

PROPER CARE & USE INSTRUCTIONS

1. Always wear the universal shoe cover booties over all footwear for all talent standing on the ProMatte flooring. If talent's feet/shoewear must be visible, completely clean the soles of all shoes prior to and in between uses. All shoes worn without booties should be no marring soles.
2. Always remove and properly store flooring when it will not be in use for extended periods of time. Continued exposure of the flooring to everyday foot traffic will inevitably lead to permanent damage.
3. In between uses, the ProMatte flooring should be covered with a layer of plastic in order to keep it dust/dirt/debris free and to protect it from incidental damage.
4. ProMatte flooring is intended to be used on a hard, flat surface with the textured side facing up. Use of the flooring on top of carpet will void the manufacturer's warranty.
5. Use only ProCyc no-residue double-faced tape to secure ProMatte flooring to other sections of rolled flooring or to the studio floor itself. The use of other tapes may permanently damage the ProMatte flooring or irreversibly mar it.
6. Always install the ProMatte flooring so that the section seam overlaps always face away from the primary camera angles

PROPER CARE & USE INSTRUCTIONS - CONTINUED:

7. Always follow all manufacturer instructions on assembling multiple flooring strips into one contiguous flooring section, including seam tape, seam orientations, seam overlap widths, etc.
8. Thoroughly clean the studio floor prior to laying down the ProMatte flooring.
9. Failure to properly adhere the ProMatte flooring to the underlying studio floor could result in the flooring becoming a trip/safety hazard and/or the flooring sliding under the talent's feet when in use. Always secure the flooring to the underlying studio floor for proper stability and safety.
10. Clean the entire ProMatte flooring textured surface periodically with a damp, lint-free cloth, warm soapy water or a mild detergent (use only those cleaners provided with the cyc or similar replacements per manufacturer recommendations).
11. For any scuff marks or other marring stains, use the provided scrub brush and mild detergent cleaners to gently spot clean those areas until the marks have been erased. Take extreme care not to damage the flooring by overly aggressive scrubbing, etc.
12. DO NOT EVER use harsh chemicals, bleach or abrasive pads to clean the ProMatte flooring, as these may permanently damage/mar the flooring.

PROVIDE (1) SIGN FOR EACH LOCKING RAIL, LOADING BRIDGE, ETC. AND A COPY IN THE OWNER'S MANUAL.

PACKING/STORING - FLOORING

APPROX. 8 PT. ARIAL FONT FOR ALL BULLETED/ NUMBERED TEXT.

REMOVING & STORING PROMATTE FLOORING:

1. Carefully turn each section of flooring upside down (textured side down) using a minimum of two people; walk it back over its length without allowing it to fold or crease (folding or creasing will damage the flooring).
2. Remove all of the double-face tape attached to the flooring and discard all removed tape and any residual residue.
3. Tightly wrap the ProMatte flooring around the outside of the 8" tube provided. DO NOT attempt to insert into any tube, as it will be difficult or impossible to remove from inside the tube.
4. When wrapping the ProMatte onto the tube, use one of the dry, lint-free towels provided to wipe away all dust and debris from the top/bottom surfaces.
5. After the ProMatte flooring has been completely wrapped onto the tube (all available lengths), wrap the entire tube of flooring with stretch wrap in three locations (top, middle & bottom) in order to secure it and keep it from unrolling.
6. Store the ProMatte flooring inside the provided case and secure the case prior to moving to the designated storage area.

GENERAL REMINDERS:

1. Always carefully inspect flooring during storage or deployment to ensure that there is no damage.
2. Always replenish cleaning supplies with matching brands after initial quantities have been fully consumed.
3. Following the procedures and safety reminders outlined on this signage as well as those shown in the manufacturer's literature should result in many years of care-free use of the ProCyc and ProMatte flooring. Failure to follow these procedures and safety reminders could result in the premature failure of one or more of the installed components and the need for partial or complete replacements to be purchased and installed.
4. Approved Cleaners: Fantastik Heavy Duty or Formula 409 spray cleaners.

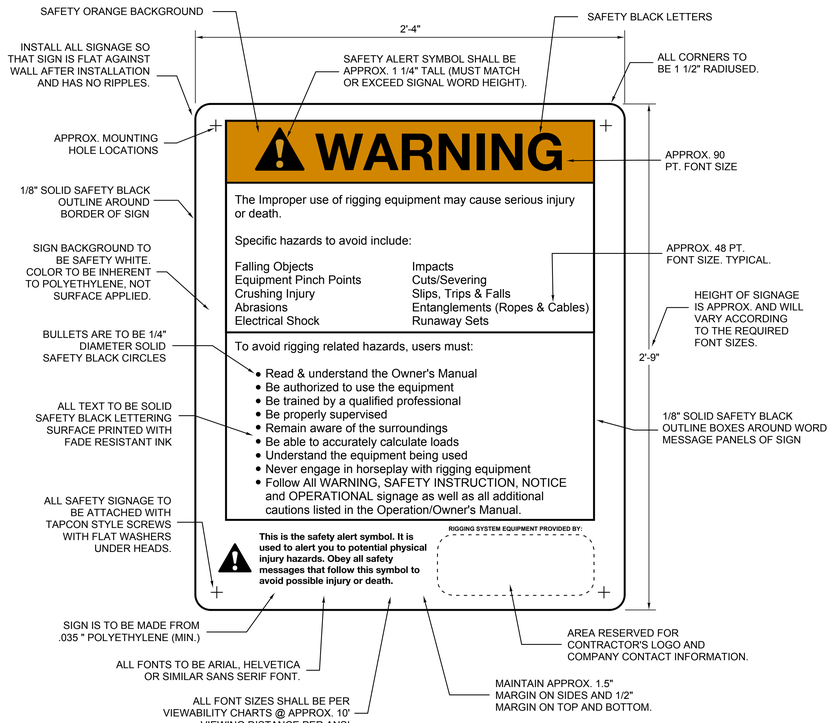
CONSTRUCTION DOCUMENTS

EACH DETAIL IS REQUIRED FOR EACH SPACE (STUDIO & PHOTO LAB), UNLESS OTHERWISE INDICATED.



1 SAMPLE GENERAL WARNING SAFETY SIGNAGE
TR506 NONE

NOTES:

Provide The Following Custom Safety Signs (See Written Specifications For More Information). Provide Per Space As Each Pertains And As Indicated.

(1) General Warning Safety Sign (Mounted As Directed By Owner)

(1) Standard Dead Hung Rigging Operational Guidance Sign (Mounted As Directed By Owner)

(1) Pipe Grid Rigging Sign (Mounted As Directed By Owner)

(1) Photo Lab Moveable Track Sign (Mounted As Directed By Owner)

(1) Rigging Inspections Sign (Mounted As Directed By Owner)

(1) ProMatte/ProCyc Sign (Mounted As Directed By Owner)

(XX) Pipe Grid Warning Signs (Mount As Indicated)

Field Verify All Exact Mounting Locations With The Owner & Mount Where Existing Obstructions Permit. DO NOT Mount Any Safety Signage Where It Is Hidden Behind Curtains, Doors, Etc. Or Where It Cannot Be Easily Seen & Read.

15

SIGNAGE MOUNTING NOTES:

Do Not Mount Any Signage In Locations Where It Is Visible From The Audience Areas (E.G., Do Not Place Signs On Open Galleries Facing Audience Or Signs On Upstage Wall Within View From Seating Areas). Do Not Place Any Signage In Locations Where It Could Become A Distraction To Audience Members.

Signage Is Intended For Stage Hand & Operator Information, Use & Warning. Signage Is Not Intended To Be Visible To The Public. Mount In Suggested Locations Unless Otherwise Instructed By The Owner In Writing.

Generally (With The Exception Of House Devices-Truss, Torms, Etc.), All Signage Should Be Mounted Near The Device(s) Being Described In The Signage (Within Approx. 3' - 0").

Signs Shall Not Be Mounted To The Upstage Wall Inside The Extents Of The Proscenium Opening Or In Other Locations Where They Are Buried Behind Obstructions.

Signs Shall Not Be Installed Higher Than 8' - 0" AFF To Top Of Sign Unless Specifically Indicated.

All Signage Must Be Installed In Areas Where It Is Visible From Most Onstage & Wing Vantage Points.

GENERAL SIGNAGE NOTES:

All Signage Shall Meet The ANSI Z535.2-2011 (R2017) Or Most Recent Version.

All Safety Signage Shown Is Diagrammatic In Nature. Specific Safety Signage Text & Statements Must Accurately Reflect The Rigging At The Intended Facility. Verify All Pertinent Signage Text With The Designed & Intended System(s). Do Not Include Any Signage Text That Does Not Apply To This Particular Installation. Signage Sizes & Related Text May Need To Be Larger Than What Is Shown Due To Increased Text Demands And ANSI Requirements For Readability At Distance. Typical Readable Distance Is Generally Understood To Be Approx. 10' - 0" To 15' - 0".

Do Not Reduce Signage Text Font Size In Order To Fit Intended Verbiage Onto Specific Signage Size Shown (Except For Critical Signage Sizes Such As Unistrut, Etc. Signs).

Do Not Cherry Pick Desired Text From Examples Shown Or Rename Signage Titles To Suit Personal Tastes. Include All Pertinent & Relevant Text Shown As It Pertains To This Project As Well As Any Additional Text That May Be Relevant. Reinterpretations Of Text Are Not Allowed Without Prior Written Approval.

For All Set Naming Nomenclatures As Shown On The "Set Capacity Chart" Use Those Names As Shown On The Contract Documents Unless Specifically Instructed By The Owner In Writing To Use Alternate Naming Conventions. If The Owner Is Used To Calling Certain Set Types By Specific Names (I.E. Stage Electrics May Be Colloquially Referred To As "LX1, LX2" Or Border Curtains May Be Variously Referred To As Teaser, Olio Valance, Top Masking, Header, Etc.). In Those Cases It Would Be Best To Maintain Owner Familiarity In Naming Conventions To Avoid Confusion. Verify With Owner In Writing Prior To Signage Fabrication.

All Signage Is To Be Installed In Locations That Make Sense & That Meet The Current ANSI Standards, Unless Otherwise Instructed In Writing By Owner To Mount Elsewhere. (I.E. Place Signage Near, Beside Or Above Equipment It Is Referring To & Within Easy View Of Operators, Except For Any Visible FOH Locations.).

All Signage Colors Referenced Shall Meet The ANSI Z535.1-2017 Or Most Recent Version Color Technical Specifications. Specific Pantone Colors Or Color Mix Makeup Percentages Have Not Been Noted Here. Refer To The Most Recent Version Of The Referenced Standard For Exact Color Requirements.

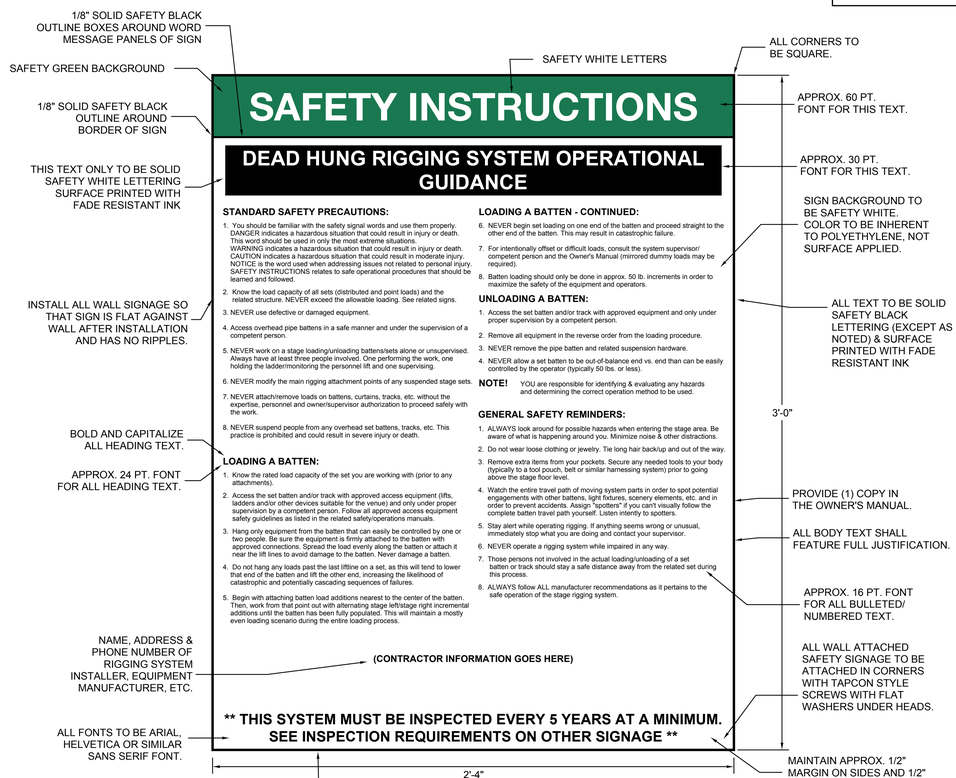
Do Not Include QR Codes Or Other Links/URL's To Specific Standards On Any Signage, As These May Change And/Or Be Superseded Over Time. Instead Reference Higher Level Locations On A Relevant Website (I.E. "Visit The 'Download Standards' Page On ESTA's Technical Standards Program Website @ TSP.ESTA.ORG For More Information" Or Something Similar).

All Signage Must Be Spell-Checked By The Contractor. No Signage With Spelling And/Or Major Grammatical Mistakes Shall Be Allowed. Verify That All Final Signage Text Matches Approved Shop Drawings Prior To Installation. Any Deficient Signage Will Be Replaced By The Contractor At His Own Expense.

Fully Instruct The Owner On Periodic Maintenance Required Of Signage To Keep Clean & To Maintain Good Legibility Over Time. Inform Not To Use Harsh Cleaning Chemicals On Signage.

Do Not Place Any Safety Signage Where It May Get Damaged Or Dislodged Due To Set, Arbor, Motor Or Other Stage Device Movement Or In Areas Where Portions Of The Signage Will Be Blocked By Doors, Racks, Gates, Rigging System Components, Etc.

REFER TO DRAWINGS CTE TR60X FOR ALL RIGGING RELATED REMOVAL NOTES, DRAWING NOTES, BUBBLE NOTES, KEYS, SCHEDULES, TABLES, ELECTRICAL RELATED NOTES AND OTHER INFORMATION THAT PERTAIN TO THE TR SERIES DRAWINGS.



[Safety Signage Information Is To Be Job Specific. What Is Shown Here Is Diagrammatic Only]

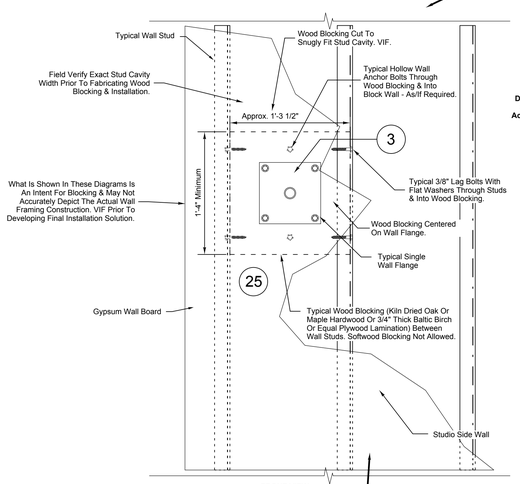
TOP VIEW



FRONT VIEW

Diagrammatic Wall Shown. VIF For Actual Construction.

NOTE (TYPICAL FOR ALL PIPE GRID SSRC WALL FLANGE ATTACHMENT LOCATIONS):

ALL HARDWARE TO BE 3/8" DIAMETER MINIMUM & GRADE 5 OR HIGHER (BOLTS, WASHERS, NUTS, ETC.).

ALL THREADS MUST BE TREATED WITH VIBRATITE AND USED IN SUCH A WAY AS TO BE VISIBLE UPON INSPECTION.

ALL PAINTING SHALL BE PERFORMED IN A PROFESSIONAL MANNER. THIS INCLUDES UTILIZING PROPER PRIMING AND FINISH COATING TECHNIQUES AS REQUIRED AND THE PROPER MASKING OF ADJACENT AREAS & ACOUSTIC WALL PANELS.

PAINT SHALL BE SPRAY APPLIED WHERE POSSIBLE BEFORE SUSPENSION AND SHALL BE MULTI-COAT AND NEAT. NO DRIPS, RUNS, MOTTLED FINISHES, ETC. SHALL BE ALLOWED.

PAINT ALL PIPE GRID, WALL FLANGES, ACCESSORIES AND ALL ATTACHMENT HARDWARE FLAT BLACK (IF NOT INHERENTLY FLAT BLACK).

NO BRIGHT, SHINY, BARE METAL COLORED OR OTHERWISE CONFLICTING COLORED METAL OR HARDWARE ITEMS SHALL BE ALLOWED FOR ANY PORTION OF THE PIPE GRID SYSTEM.

LOCATE ALL HOLLOW WALL ANCHORS AS DIRECTED BY PROJECT STRUCTURAL ENGINEER. DRILL AND/OR TAP ALL HOLES BY STANDARD ACCEPTED PRACTICES AND TO PREVENT SPALLING, CRACKING OR OTHERWISE DAMAGING THE EXISTING/NEW CONCRETE BLOCKS (ESPECIALLY THE REAR SIDE OF BLOCK CORES BEING DRILLED INTO). DO NOT CUT, NICK OR DAMAGE ANY EXISTING INTERNAL BLOCK REINFORCING.

ALL WELDING OF PIPE GRID AND WALL FLANGE ASSEMBLIES (SHOP & FIELD) PERFORMED BY CERTIFIED WELDERS AND IN ACCORDANCE WITH CURRENT AMERICAN WELDING SOCIETY SPECIFICATIONS. ENSURE THAT ALL ITEMS ARE IN PROPER PLUMB AND LEVEL POSITIONS PRIOR TO FINAL WELDING. FIELD WELDING SHALL BE DONE CAREFULLY AND WITH WELDING BLANKETS COVERING ALL FLAMMABLE SURFACES IN THE VICINITY OF THE WELDING (IE - ACOUSTIC TREATMENTS, GYP, HARDWOOD BLOCKING, ETC.). IT IS RECOMMENDED THAT ALL PIPE GRID INSTALLATION AND WELDING BE PERFORMED BEFORE ANY ACOUSTIC WALL PANELS AND FINAL FINISHES HAVE BEEN INSTALLED.

DO NOT CUT ANY PART OF ANY WALL REINFORCEMENT OR OTHER STRUCTURAL MEMBERS WHEN INSTALLING PIPE GRID ASSEMBLIES. IF CONFLICTS EXIST, SHIFT PIPE ASSEMBLY INSTALLATION LOCATIONS INCREMENTALLY IN ORDER TO AVOID REINFORCEMENTS.

FIELD INSPECT WALL CONSTRUCTION PRIOR TO FABRICATION AND ATTACH ALL PIPE GRID ASSEMBLIES IN A SAFE MANNER AND WITH THE LOAD RATING INDICATED. COORDINATE THE EXACT MOUNTING METHODS & ANCHORS USED WITH THE ACTUAL WALL CONSTRUCTION, INTERNAL BLOCKING & THE PROJECT STRUCTURAL ENGINEER IN ORDER TO PROVIDE AN OVERALL ASSEMBLY WITH THE APPROPRIATE LOAD RATINGS & SAFETY FACTORS AS INDICATED AND WHILE ATTACHING EACH BASE PLATE INTO STRUCTURAL MEMBERS. PROVIDE ALL INDICATED AND ADDITIONAL BLOCKING INSIDE WALLS IN ORDER TO OBTAIN APPROPRIATE MOUNTING SURFACES. ALL INTERNAL WOOD BLOCKING MUST BE SNUG FITTING AND SHALL NOT BE NARROWER THAN THE OPENINGS INTO WHICH IT IS MOUNTED. BLOCKING SHALL BE REQUIRED TO BE TIGHT TO BLOCK WALL AND TIGHT TO REAR SIDE OF GYPSUM WALL BOARD IN ORDER TO PREVENT CRACKING, BUCKLING, ETC. DURING WALL FLANGE INSTALLATION OR ANY SETTLING, SHIFTING, ETC. OF THE PIPE GRID DURING USE.

NOTE:

THE PIPE GRID ASSEMBLY IS INTENDED ONLY FOR THE LOAD TYPES AND USAGES SHOWN. INTENDED USAGE INCLUDES TRACK AND CURTAINS, LIGHTING FIXTURES, AUDIO GEAR, MISC. POWER SUPPLIES, OWNER PROVIDED ACCESSORIES AND RELATED ITEMS ONLY.

THE PIPE GRID ASSEMBLY IS NOT INTENDED FOR USE AS A SUPPORT STRUCTURE FOR ADDITIONAL CHAIN MOTORS, HOISTS OR TRUSSING.

ANY USE OF THE PIPE GRID ASSEMBLY OTHER THAN THAT SHOWN AND INTENDED IS STRICTLY PROHIBITED.

NOTE: COORDINATE ALL FLANGE ATTACHMENT POINTS WITH WALL PANEL, STUD & INTERNAL HARDWOOD BLOCKING LOCATIONS. FIELD MODIFY ACOUSTIC WALL PANELS AS REQUIRED IN ORDER TO ACCOMMODATE FLANGE & FINISH PER WALL PANEL MANUFACTURER'S INSTRUCTIONS.

ALL FINISHED INSTALLATION OF ACOUSTIC WALL PANELS & FLANGES SHALL APPEAR PROFESSIONAL & FINISHED.

INSTALL STUDS & INTERNAL WOOD BLOCKING AS REQUIRED FOR WALL FLANGE PLACEMENTS.

SOFTWOOD BLOCKING SHALL NOT BE ALLOWED.

CTE TR508
CONSTRUCTION DOCUMENTS

GREEN ROOM STUDIO & PHOTO LAB CURTAIN SCHEDULE:

Curtain Name	Width	Height	Notes	Fullness	Material Type
All Black Walk-Along "Gangable" Panels (Both Spaces)	As Indicated	As Indicated	Provide Curtains In Individual Panels That Are Able To Be "Ganged" Together In Various Configurations In Order To Mask Different Areas As Needed Or So That Entire Bank Of Panels Can Be Used To Form One Continuous Traveler Curtain. Provide With Velcro Strips, Chain Pocket, Chain, Grommets & Tie Off System.	25%	KM Fabrics 18 oz IFR Crescent With No Lining
All "CBS Gray" Walk-Along Continuous Panels (Green Room Studio Only)	As Indicated	As Indicated	Provide Curtains In Single, Continuous Panels To Be Used Where Needed Or So They Can Be Used To Form One Continuous Gray Backdrop Curtain. Provide With Velcro Strips, Chain Pocket, Chain, Grommets & Tie Offs	0%	KM Fabrics 18 oz IFR Crescent With No Lining
All Digital Keying Walk-Along Continuous Panels (Green Room Studio Only)	As Indicated	As Indicated	Provide Curtains In Single, Continuous Panels To Be Used Where Needed Or So They Can Be Used To Form One Continuous Digital Blue Backdrop Keying Curtain. Provide With Chain Pocket, Chain, Grommets & Tie Offs	0%	Fred Krieger Fabrics Supreme Fabric With No Lining - Digital Blue
Roll Mounted Backdrops (Provide (1) Roll Of EACH Different Type Shown) In Addition To Those Shown On Other Schedules (Photo Lab Only)	As Indicated	As Indicated	Provide Continuous, Seamless Rolls As Indicated. Provide Each Roll With Heavy Duty Cardboard Tube. Mount To PhotoTech Rollers As Needed. Up To Four Backgrounds Can Be Stored In MW System At One Time. All Other Unused Backgrounds Shall Be Stored In PhotoTech Paper Grip System. Mount As Directed By Owner. See Other Drawings For More Paper/Background Types Required.	0%	PhotoTech Extra Wide Seamless Paper (NFR): ChromaKey Green #85 - 140" x 100' Grey #88 - 140" x 100' PhotoTech Vinyl Background (NFR): Matte White - 107" x 20' Matte Black - 107" x 20'

NOTE: *Refer To Rigging Specifications For More Information Regarding Specific Curtain Types, Colors, Fabrication & Other Requirements.*

General:

"As Indicated" Intents Are That All Curtains Be Sized Per The Plan & Section View Drawing Dimensions Shown, Unless There Are Physical Constraints With The New System Which Preclude This Intended Sizing. If Physical Sizing Constraints Are Present Which Do Impact The Intended Curtain Sizing, Then Contact The Consultant In Order To Obtain Revised Sizing Requirements.

IFR Indicates That Curtain Material Is Inherently & Permanently Flame Retardant & Never Needs Flame Treatment For The Life Of The Fabric. Flame Retardant Will Not Wash Out Unless Treated With Additional Flame Retardant Chemicals.

FR Indicates That Curtain Material Is Flame Retardant Via Chemical Treatment In Order To Offer Flame Resistance. This Material Must Be Retreated Periodically By Qualified Personnel In Order To Maintain Its FR Status. Flame Retardant Chemical Salts Will Wash Out When Exposed To Water, Steam, Dry Cleaning Or Other Water-Based Liquids.

NFR Indicates That Curtain Material Is Not Flame Retardant Treated In Any Way.

Oz Weights Given Are Per Yard And Are Approximate. See Manufacturer's Specs For Exact Weight Per Yard.

Miscellaneous:

Any Uninstalled Drapes Shall Be Neatly Folded, Bagged, Sealed, Labeled And Stored As Instructed By The Owner (Use Curtain Hampers If Provided).

All Installed Curtains Must Be Hung Long Enough For All Wrinkles, Folds & Creases From Storage & Shipment To Have Been Removed (Use Bottom Pipe Weight, Stretchers, Etc. To Assist As Needed). Final Curtain Presentation, Upon Acceptance Testing & Room Turnover To The Owner, Shall Be Smooth, Flat Curtains. No Curtains Displaying Wrinkles, Folds & Creases Or Other Such Anomalies Shall Be Allowed Or Accepted.

The Bottom Edge Of All Installed Curtains Must Be Level & Flat Relative To The Finished Floor. No Curtains Shall Be Allowed That Feature A Hump, Angle, Wave Or Other Non-Parallel & Non-Level Installations.

Provide Flat Fabric Tie Back Straps For Use As Tie-Ups For All Studio Curtains. See Details For Complete Info.

All New Curtains Shall Be IFR Unless They Are Specifically Called Out On These Drawings Or In The Written Specifications As Being Other.

WARNING! - Notify The Owner In Writing And During Trainings (To The Highest Level Possible) That Any Future Chemical Treatments Of IFR Curtains (Such As The Application Of Inspecta-shield Fire Retardant Or Equal) Will Negate Those Very IFR Properties In The Fabric, Thus Potentially Rendering Them Able To Burn And In Violation Of NFPA Standards. Notify The Owner That, If Such Chemical Treatments Are Applied To IFR Curtains The Manufacturer Cannot Stand Behind The Material.

Provide The Following Fabric Style Tieback Sling/Strap Package: Fabric Style Straps For Use As Tie-Ups For All "Gangable" Curtains. Provide In Color Matched Fabric. Provide Quantities As Indicated. Store In Clear Plastic "Jugs/Totes" Per Owner's Instructions. Provide Eyebolts On The Side Walls @ Approximately 48" AFF For Attachment When Curtains Are Gathered & Stored (Locate Per Owner's Instructions & In Areas Where Acoustic Panel Conflicts Or ChromaKey Green Wall Conflicts Exist. Provide Each Fabric Sling/Strap With S-Hooks Crimped On The Strap Side & Open On The Hook Side (For Eye Bolt). See Details For More Information.

Provide The Following Empty Carriers For Each Studio Track System (One Set For The Green Room Studio & One Set For The Photo Lab): (6) Master Carriers; (24) Standard Carriers - Provide Carriers As Loose Spares. These Will Be For Spares/Replacements And/Or Additional Drops/Curtains As Needed By Owner. Store Extra Carriers In A Contractor Provided Clear Plastic Tote Per Space & Store Per The Owner's Instructions.

NOTE:

It is each contractor's responsibility to receive all device shipments, equipment, deliveries, etc. for their own equipment on/at the job site personally. This will require each contractor to carefully coordinate drop-ship delivery dates with the manufacturers and trucking companies in order to have adequate personnel on site to inspect, unload and store all shipments. Each contractor shall be responsible to arrange for storage of all received materials on site until the appropriate time when he shall either turn them over to installing contractor or install them himself.

If the contractor chooses to allow a third party to receive shipments on his behalf, then that contractor bears sole responsibility for any missing and/or damaged parts and devices that may need to be reordered or rush freight required to maintain schedule, all at no additional cost to the owner.

Any equipment that is furnished by the receiving contractor but installed by others shall be turned over to the installing contractor at such time as it fits into their production schedule and the project's overall construction schedule.

Any large items such as racks, emergency transfer equipment, etc. shall be transported by the receiving contractor from its storage area and relocated to the general vicinity (i.e. in the room and general area) where it will be installed. At this point in time it shall be turned over to the installing contractor for installation.

GENERAL NOTES:

Do not scale plans.

Field verify all dimensions before ordering material or performing any work. Location of all devices must be coordinated with existing and/or new architectural, mechanical, electrical and structural elements. Where conflicts occur contact the architect, construction manager and consultant in writing for clarification before performing any work.

Where work is critically dimensioned to work provided by others it is the sole responsibility of the contractor to verify the intended location of other elements with other contractors by reviewing their shop drawings.

Coordinate all work for symmetrical installation with relation to height and level with architectural elements, switches, outlets, and other controls.

This drawing represents the configuration of a system. It does not in any way constitute instructions for installation except with regards to configuration. The sole responsibility for field verification of dimensions, installation/fabrication methods, code conformance, safety issues, and the quality and performance of their work shall be that of the installing contractor.

This drawing is to be interpreted in conjunction with other drawings in the construction set as well as written specifications for this project. The contents of the drawing do not in any way negate the written specifications, nor do the written specifications in any way negate the contents of the drawings.

If there are inconsistencies between written specifications and drawings or between any drawing and other drawings in the construction document set it is the responsibility of the contractor to obtain clarification before bidding this project. If no clarification has been obtained prior to bid the contractor will abide by the decision of the architect and consultant at no additional cost to the owner even if work has to be redone.

Obtain shop drawings from related trades to verify the intended configurations and scheduling of their work. The contractor is responsible for coordinating their work with other related trades in a manner that avoids conflicts of work and scheduling.

ELECTRICAL RELATED NOTES FOR THE PHOTO LAB RIGGING SYSTEM:

Each note and detail indicator indicates a typical location for the type of work to be performed or equipment to be provided. The referenced contractor shall provide for all instances of typical work indicated. All drawing notes may not appear or be referenced on each drawing; however, all notes still apply to the work indicated within each note and all similar instances of typical work shall be performed by the referenced contractor(s). All work shall conform to the standards of Divisions 19 & 26 as well as this project's architectural & structural standards, the construction schedule, the current National Electric Code (NEC) and all other applicable codes and standards.

REFER TO THE 19 3000 SPECIFICATIONS SECTION AND ALL OTHER TR SERIES DRAWING NOTES, KEYS, SCHEDULES, ETC. AS THEY CONTAIN ADDITIONAL INFORMATION REGARDING THE EC'S SCOPE OF WORK AS IT RELATES TO THE THEATRICAL RIGGING SYSTEM.

The contractor shall perform all electrical work as described below and on each TR series drawing.

PROFESSIONAL STANDARDS:

A

The contractor is expected to install all work to the appropriate industry professional standards, manufacturer recommendations and current applicable codes. If any work required exceeds the skills of the contractor, then he shall employ appropriate subcontractors for the scope required.

The acceptability of materials and workmanship shall be determined by the Architect, Consultant and CM.

Any work that might be damaged, inadvertently painted or become dirty during construction will be protected by the contractor. All responsibility for protection shall be by the contractor. The contractor shall provide final cleaning and or repair of all equipment in their scope to like new condition.

The contractor shall attend and/or arrange meetings as required to ensure their scope is coordinated with all other trades. The contractor is responsible to make known to all other trades critically dimensioned items and locations to avoid conflicts. Where conflicts occur, follow required procedures in the project manual to seek resolution.

Where any substandard work is provided by related trades that impedes the work of the contractor, he shall notify the CM, Consultant, Architect or Engineer in writing as called for in the project manual to rectify the issue.

Where work is provided by others, the contractor is responsible to verify installation conditions that relate to his work. If installation of related work is substandard, then the contractor shall generate a written RFI through proper channels based upon the project manual. The contractor shall not install his work to any substandard devices, etc. provided by others until such work has been resolved or until the contractor has received written authorization from the construction manager to proceed. If the contractor ignores substandard installation work by others and proceeds to install his devices to these items, then he accepts and bears sole responsibility to repair, reinstall and correct any found deficiencies to the satisfaction of the owner upon final inspections.

The contractor shall comply with the AHJ (Authority having jurisdiction) as it relates to programming any and all emergency interfaces.

The contractor is expected to possess knowledge of the equipment of his industry and provide all required small items required to install the specified equipment. Provide all small items such as rack rails, DIN rails, power cords, connectors, wall-wart power supplies, crimps, nicopress and other items that may not be specifically called out on the drawings or in the specs but are required to support primary equipment.

When in doubt about any aspect of the work, the contractor should not proceed until he obtains clarification from the appropriate entity with authority following procedures detailed in the project manual.

INSTALLATION OF EQUIPMENT:

Install system devices, feeder cabling, disconnects, wiring, etc. as delineated on the Theatrical Systems Scope Delineation Matrix Spreadsheet included on these drawings. All items bearing the mark "X" in the column are the responsibility of the indicated contractor to perform.

All attachment methods for equipment to conform to Division 26 and Division 19 specifications.

B

GENERAL ELECTRICAL REQUIREMENTS:

For all network, category, control and data style cabling: Restrict all conduit and wiring runs to less than 250 lineal feet (as measured along the resulting wire path from origination point to destination point). No network, category, control and data style cabling runs shall be allowed to exceed 250 feet.

Provide all devices, conduits, junction boxes, backboxes, wiring, etc. that are required to have a specified rating as devices with those ratings and listings per all applicable codes. This includes CE, UL, ETC, NEMA, plenum ratings, etc.

No conduits and/or wiring shall be allowed to be routed in, around or in such a way as to restrict or obstruct the movement of any rigging system components. Any conduits and/or wiring so installed shall be required to be moved by the installing contractor. This note applies to all conduits and/or wiring on this project (lighting, audio, video, AV, rigging, data, fire system, network, smoke detection, alarm, etc.).

Provide all conduit, wire, SO cables, raceways, switch boxes, junction boxes, duplex or quad outlets and related faceplates, breakers and panels, disconnects, switches, miscellaneous hardware, cable reel devices, SO cabling, flex conduit, misc. interface devices, misc. boxes, misc. electrical device mounting hardware and all installation labor required to provide complete conduit layouts and control, line and load circuits/runs, interfaces, switches as indicated. Refer to rigging related notes below and written specifications for additional scope as it regards assembly, installation labor, labeling requirements and/or coordination with related trades. Labeling requirements outlined in the written specifications are extensive and detailed. These requirements apply to all devices/systems listed below.

Labeling: All conduits shall be clearly labeled on each end as to their origin and destination in a simple, logical manner. All junction boxes, switch boxes and backboxes indicated on drawings shall be labeled with the nomenclature indicated on the drawings. All outlet boxes shall be labeled with the corresponding panel and circuit designations they are fed from. Permanent black marker on conduit or junction box face is acceptable on conduits, junction boxes, etc. that will not be painted. If any related devices are to be painted, then provide the following: Conduits shall be labeled with 3M Durable ID Labels with permanent adhesive (applied after painting). Junction boxes, etc. shall be labeled with 3M Durable ID Labels with permanent adhesive (except stage devices, which shall be labeled with Lamacoid style engraved labels, permanently adhered to the device). All junction boxes, outlets, etc. shall also be labeled on the back of each cover plate and also with a durable tag inside each box stating the same information. All labeling shall be done with block style lettering/numbering by hand or printed. All labeling shall reference the device's designation, conduit originations/destinations, etc. & not be a coded, indexed or legend style referencing system.

All provided, furnished or installed equipment and labor may appear in schedules, on plan layouts, in flow diagrams or on detail drawings. Carefully consult each drawing in order to obtain an exact delineation of his responsibilities as it pertains to provision of equipment, installation of equipment for others, assembly and wiring of equipment furnished by others and other necessary installation labor as noted in detail on these TR series drawings.

All locations & clearances shown for the rigging system & other related devices (motor starters, user control interfaces, etc.) are specific & critical and may not be altered in the field without obtaining prior written permission from the consultant. Any new proposed locations or field obstructions must be communicated to the consultant in writing and clearly indicated on scaled plan drawings for approval prior to rough-in.

All conduits shall be clearly labeled as to their destination (permanent black marker on conduit acceptable). No conduit shall be allowed to be loaded beyond 50% fill.

Provide all low voltage control cabling pulled in and out of conduit as indicated on drawings. Do not pull any wire until submittals and rigging shop drawings have been approved & issued. Verify all wire types, quantities and routing with the approved submittal shop drawings.

Do Not install any system devices, power, boxes, cabling, conduit, wire, etc. until a thorough and complete review of the approved motorized rigging shop drawings, as some items and requirements could change. Only purchase and install system related devices after a full consultation with these drawings and the provided equipment and related furnishing contractor/manufacturer.

Provide required breaker panel, feeder, motor rated breakers, conduit, wire and power to distribute power per NEC to all motorized units.

Provide wiring types & counts as indicated on the approved shop drawings (use those shown here as a guide). Quantities and types may be slightly different on shop drawings then what is shown on the bid documents due to manufacturer recommendation changes, enhanced feature set upgrades, substitutions, etc. The contractor shall be responsible for all wiring as indicated on the final approved shop drawings.

Provide any required step up/down voltage transformers in order to provide power for the motorized systems as required. Any required transformer(s) shall NOT be allowed to be located on the stage or in the vicinity where it would allow its acoustic noise output to be heard on the stage or in the general auditorium/control booth/stage areas.

Fire stop all penetrations in new and existing fire rated assemblies that results from the work of this contract. All fire-stopping must adhere to NEC, NFPA and all other current applicable safety standards.

C

Provide all power, conduits, wire, installation labor, misc. junction boxes, installation of misc. power units, operator control panel(s) misc. remote devices and any miscellaneous installation hardware needed in order to complete the work indicated for the wiring of the PhotoTech RollEasy motorized roll drop background systems and controls. Provide all wiring and termination for the motorized unit(s) power and control wiring and all necessary hard wired terminations, etc.

GREEN ROOM STUDIO & PHOTO LAB RIGGING SYSTEM KEYED NOTES:

Each note and detail indicator indicates a typical location for the type of work to be performed or equipment to be provided. The referenced contractor shall provide for all instances of typical work indicated. All drawing notes may not appear or be referenced on each drawing; however, all notes still apply to the work indicated within each note and all similar instances of typical work shall be performed by the referenced contractor(s). All work shall conform to all applicable codes, construction schedules and standards as well as this project's architectural & structural standards. Some notes apply to both studio spaces (green room studio and photo lab) and others only to one. Provide as required per space.

PROFESSIONAL STANDARDS:

The contractor is expected to install all work to the appropriate industry professional standards, manufacturer recommendations and current applicable codes. If any work required exceeds the skills of the contractor, then he shall employ appropriate subcontractors for the scope required.

The acceptability of materials and workmanship shall be determined by the Architect, Consultant and CM.

Any work that might be damaged, inadvertently painted or become dirty during construction will be protected by the contractor. All responsibility for protection shall be by the contractor. The contractor shall provide final cleaning and or repair of all equipment in their scope to like new condition.

The contractor shall attend and/or arrange meetings as required to ensure their scope is coordinated with all other trades. The contractor is responsible to make known to all other trades critically dimensioned items and locations to avoid conflicts. Where conflicts occur, follow required procedures in the project manual to seek resolution.

Where any substandard work is provided by related trades that impedes the work of the contractor, he shall notify the CM, Consultant, Architect or Engineer in writing as called for in the project manual to rectify the issue.

Where work is provided by others, the contractor is responsible to verify installation conditions that relate to his work. If installation of related work is substandard, then the contractor shall generate a written RFI through proper channels based upon the project manual. The contractor shall not install his work to any substandard devices, etc. provided by others until such work has been resolved or until the contractor has received written authorization from the construction manager to proceed. If the contractor ignores substandard installation work by others and proceeds to install his devices to these items, then he accepts and bears sole responsibility to repair, reinstall and correct any found deficiencies to the satisfaction of the owner upon final inspections.

The contractor is expected to possess knowledge of the equipment of his industry and provide all required small items required to install the specified equipment. Provide all small items such as misc. JB's, connectors, power supplies, crimps, nicopress and other items that may not be specifically called out on the drawings or in the specs but are required to support primary equipment.

When in doubt about any aspect of the work, the contractor should not proceed until he obtains clarification from the appropriate entity with authority following procedures detailed in the project manual.

All painting shall be performed in a professional manner. This includes utilizing proper priming and finish coating techniques as required and the proper masking of adjacent areas.

Paint shall be spray applied where possible before suspension and shall be multi-coat and neat. no drips, runs, mottled finishes, etc. shall be allowed.

THEATRICAL SCOPE NOTES FOR THE THEATRICAL RIGGING SYSTEM:

GENERAL:

All pipe grid rigging systems equipment to be H&H Specialties, SSRC, ADC or equal. All system miscellaneous hardware such as shackles, bolts and other hardware to be of domestic manufacture and stamped with the working load limit. The working load limit shall incorporate a safety factor of at least 10:1. See written specifications and detail drawings for additional rigging standards and requirements. Minimum size of misc. hardware to be 1/4" (this includes wire rope assemblies). Provide larger sizes as required in order to maintain indicated load ratings and safety margins.

All rigging system equipment and all misc. hardware shall be brand new (never been used before) and specifically configured for use on this project.

All rigging system equipment and all misc. hardware indicated on these drawings shall be mounted to the beams and overhead steel as is visually depicted. The intent is for all headblocks, loftblocks, beam clamps, suspension assemblies, etc. to be mounted to overhead beams/trusses. Attachment points are indicated through visual representations on these drawings and the building's structural beams are the intended recipients of these rigging system suspension hardware assemblies (unless alternate attachment methods have been designed and clearly indicated on the contract documents). The contractor shall not be allowed to field select other rigging attachment points, misc. spanning steel, alternate locations, etc. not depicted on the contract documents, and from which to suspend the rigging system equipment, unless prior written authorization has been specifically granted, verified by the project structural engineer and clearly communicated to all design team members and related construction trades.

All suspension hardware, liftlines, supports lines, etc. shall be installed plumb (understood to be perpendicular in the vertical plane relative to earth level) from their overhead attachment points to their batten (or other) terminations points, unless they are bridles or are otherwise specifically shown on the contract documents as being installed at angles.

All misc. hardware used on this project shall feature load rating markings (if applicable). All hardware shall be Grade 5 minimum (higher if specifically called out).

LOADING INFORMATION:

All loading information shown below is approx. All lbs/LF loading is understood to be evenly distributed along the entire length of the related batten.

Studio dead hung pipe grid system shall be rated for an approx. 20 lbs/LF live load plus the self-weight of the related suspension, batten and hardware along all pipes.

All wire rope shall be of a tested load rated variety, either domestic or imported. Load test information must be provided for all wire rope utilized in this system.

At any locations where nicopress oval sleeves have been provided and crimped but are in inaccessible locations where field inspections are not possible from the floor, platform or other area, the contractor shall provide written authentication and digital photos of these properly crimped swages (to the manufacturer's recommended tolerances in order to realize full load capacity) and shall provide copies of these verifications to the consultant, architect and owner.

RIGGING SYSTEM EQUIPMENT:

1 Provide miscellaneous metal, plate steel adapters and/or Unistrut support members complete with Unistrut channel assemblies, wall flanges, welded verticals & bracing, misc. beam clamps, load rated anchorages and all necessary and miscellaneous hardware as indicated and/or needed in order to provide appropriate pickup points for all rigging equipment where beams do not exist and/or to mount devices where indicated. Mount at elevation(s) as indicated on TR series drawings. Entire Unistrut assemblies and all suspension hardware are to be painted by the contractor only as indicated or as directed by architect/owner and to match adjacent or mounted to surfaces. Miscellaneous metal and Unistrut assemblies must be rigidly attached to existing overhead structural steel and be rated for a 10:1 safety factor for the loads imposed.

2 Provide pipe grid system complete with all required hardware, misc. clamps and any other necessary items as indicated. Mount pipe grid at elevation as indicated on TR series drawings. Entire pipe grid and all suspension hardware is to be inherently black or painted flat black. No shiny, gray or aluminum, zinc or galvanized colored items shall be allowed. All batten & pipe grid suspension assemblies shall feature copper nicopress closures on lift lines with thimbles, shackle, turnbuckle and H&H Specialties full pipe clamps as indicated.

3 Provide SSRC style 8" x 8" black wall flanges on welded steel plates and internal pipe mount insert for 1 1/2" schedule 40 black iron pipe for lateral wall support and/or main structural supports for all tormentor and Shakespeare pipe assemblies. SSRC or equal. Mount to masonry with load rated epoxy masonry anchors or as indicated. Provide in wall blocking as required for all gyp/studded walls.

4 Provide H&H Specialties model #680 full batten clamp assembly for all indicated batten suspension locations with Grade 5 hex head bolts, lock washers and a load rated shackle. Tighten batten clamp tight enough to prevent it from "walking" along pipe batten or sliding under load.

5 Provide a PhotoTech RollEasy Model MW motorized roll drop system for the Photo Lab (including all wall/ceiling mounts brackets, backgrounds, rollers, spares, roller storage devices, power/control distro box, remote wall control, drive assemblies, idle ends, core clamps, misc. jumpers) and all accessories and installation labor as indicated & required. Install in location indicated on drawings.

6 Provide a Manfrotto Sky Track system for the Photo Lab and all parts & accessories as indicated and required to provide a complete and fully functioning system. This includes, but is not limited to, black anodized rails - both fixed and movable, mounting brackets, aligning connectors, end stops, tube brackets, sliding carriages, spigots, spigot adapters for all indicated lighting fixtures, cable carriages & supports, operating poles, outlet boxes, pantographs, springs, posts, extension tubes, safety cables and all misc. and related hardware. All portions of the Manfrotto Sky Track system must be inherently black. No shiny or gray/metal colored devices shall be allowed (except stud/spigots).

7 Provide Sapsis Rigging Grid Lock pipe clamps or equal. All clamps to be constructed of two separate pieces of 7 gauge steel formed flat bar stock. Pipe clamps shall be formed to accept 1 1/2" schedule 40 black iron pipes tightly when attached to two of them in perpendicular pairs. All grid lock clamp halves to be connected together with 3/8" Grade 5 bolts and nyloc nuts. Bolts shall be just long enough to penetrate end of nut when tightened and shall not protrude below nut by more than 1/4". The WLL limit of a clamp pair shall be 1,800 lbs. All portions of the clamp shall be flat black (spray paint bolts and nuts after final tightening).

8 Provide SSRC cable tray system in the Green Room studio & Photo Lab above the pipe grid as detailed and specified. Provide the SSRC CT-8410 cable tray system in lengths and in locations indicated. See plan view drawings for total length of cable tray system needed. All cable trays and misc. brackets/accessories must be finished flat black. NO other colored finishes shall be allowed. See TL series drawings for more information on exact intended location.

9 ***ALL SUSPENSION CABLES, THREADED ROD, CONDUIT, BACKBOXES, UNISTRUT, CABLE TRAYS, MISC. HARDWARE, WIRING, STRAPS, LOOSE CABLING AND MISC. DEVICES MOUNTED IN THE STUDIO CEILING AREA THAT ARE NOT INHERENTLY BLACK MUST BE PAINTED FLAT BLACK BY THE INSTALLING CONTRACTOR. ALL DEVICES MUST BE PROTECTED FROM DRYFALL OR OTHER PAINT INFILTRATION INTO SENSITIVE AND/OR OPEN CHANNELS, CONNECTORS, ETC. AND CLEANED AFTERWARDS TO AS NEW CONDITIONS BY THE INSTALLING CONTRACTOR. FAILURE TO DO SO MAY REQUIRE THE INSTALLING CONTRACTOR TO PROVIDE NEW EQUIPMENT TO REPLACE EQUIPMENT WITH PAINT INFILTRATION.***

10 Provide B-Line B422-X Series 7 gauge standard duty, steel right angle beam clamp (with load rated U-bolt and hex nuts) for the overhead suspension of "direct-to-steel" pipe attachments. Provide clamp sized to match pipe. Provide one clamp per each side of each supporting beam, unless noted otherwise. Ensure that all beam clamps are installed properly, sit straight, even and level on each beam, have both hex bolt/lock nuts installed. Beam clamps shall be rated for a minimum WLL of 600 lbs. each. Verify flange dimensions and clearances prior to ordering any hardware.

11 *BATTENS:*

Provide 1.5" (1.9" OD) Schedule 40 black iron pipe battens (painted flat black) with industry standard 18" batten splices & grade 5 minimum hardware (no threaded ends or couplers allowed). Batten splices shall be precisely drilled so that any batten on any set could be interchanged with that of any other set. Adjust battens on trim chains to hang true, level and plumb to upstage-downstage orientation and the stage floor. Provide safety yellow vinyl plastic ends caps on both ends of all battens (except FOH shall have black caps). Electric and projection screen sets shall be pipe-over-pipe style with brackets every 5' plus one on each end. See TR detail drawings for more information.

All battens must be installed perfectly level with each other in both orientations +/- 1/16".

12 *CURTAIN TRACKS:*

Provide ADC Rig-I-Flex 140/240 walk along tracks (both straight & curved sections as needed) with crossover at the center as needed and so that the curtains may track into the wings against the side walls. Provide carriers on 12" centers on these tracks (6" centers for any curved tracks). Provide supplemental bracing, brackets & accessories as needed to mount tracks as intended. Tracks to be suspended per manufacturer's recommendations. Attach to pipe batten backbone as indicated.

General Track Info: Provide all curtain tracks as black powder coated steel tracks along with all black parts, pulleys, mounting hardware, etc. Provide all required carriers and jack chains in a black finish. No portions of the curtain tracks and related hardware shall be allowed to feature shiny or metal colored/gray finishes.

CURTAINS:

13 Provide curtains, straps and accessories as indicated on drawings, in specs and on schedules.

14 Provide CR Daniels Dandux extra duty style canvas basket/truck laundry hampers (see details for exact quantities, size requirements, etc.). All carts shall feature heavy-duty zinc plated welded steel construction, stitched and reinforced vertical pipe support pockets, stitched double layer/folded top edging with rust resistant brass grommets, reinforced push-pull handles on either end of the cart, casterboard (all casters shall be 3" heavy-duty swivel casters set on a rectangular frame with cross bracing), and a hinged wooden lid. Wooden lid shall be 5/8" MDF covered with a black, durable laminate or 5/8" A-A-faced, sanded smooth, void-free plywood with no sharp edges or splinters (coat all raw plywood surfaces with 2 coats of satin finish polyurethane). Lids shall feature rounded corners with corner plates. Lid hinges shall be rust resistant brass or galvanized, low profile, bolted completely through lid and welded to the frame. Color of cart canvas shall be determined by the owner. LAUNDRY HAMPERS MUST HAVE BLACK CANVAS SIDES & BLACK PLYWOOD TOP.

15 Provide all required signage as indicated. Signage shall include custom signage that states the maximum load of all sets/categories, standard safety & operational signage, user warnings signage, etc. All signage shall be mounted to the walls as indicated and at easily readable heights AFF and in areas designated on the detail drawings (do not mount signage where it will be obscured or hidden behind permanent obstructions - curtains, doors, racks, J-guide system, etc.). Custom signage must be provided for all major areas such as counterweight rigging, motorized rigging, stationary rigging, inspections, etc. (see drawing details for exact types/styles and quantities to provide), shall include verbiage as indicated and shall require the contractor to coordinate with the project structural engineer for verification of loading info, etc. Standard safety signage shall be similar to that provided by most rigging equipment manufacturers (hand winch operation, manual counterweight system operation, motorized winch operation, dead hung rigging systems, etc.). Submit all intended signage sizes, text, loading, sign attachment methods, etc. to consultant for approval prior to fabrication. Signage to be permanently attached to the wall on all four corners with screws, bolts or other similar means (Tapcon or similar). Neither adhesive backed tape nor pressure sensitive backings are acceptable as the sole means of mounting the signage. Foam core signage is not acceptable.

GREEN ROOM STUDIO & PHOTO LAB RIGGING SYSTEM KEYED NOTES - CONTINUED:

16 Provide Anvil International 3/8" standard duty, carbon steel beam clamp Fig. 133 series style beam clamps (with grade 8 bolts and sleeves) for the overhead suspension of all indicated rigging sets where applicable. Ensure that beam clamps are installed properly, sit straight, even & level on each beam, have both hex bolt/lock nuts installed so that the beam clamps cannot "open up" or sag in the middle at the loading point. Beam clamps shall be rated for a WLL of 1,000 lbs. each. Beam clamps must captivate both sides of beam flanges. Verify flange dimensions and clearances prior to ordering any hardware.

17 Provide a complete ProCyc System 3EZ Modular Cove Hard Cyclorama system with ProMatte flooring (cove cycs attached to walls). This includes, but is not limited to, hi-impact ABS/fiberglass composite panels (corner & vertical modules), attachment/assembly hardware, Durabond 90 joint compound, fiberglass joint tape, tapcon style screws, internal plywood/hardwood wall blocking & related coordination, vinyl ChromaKey green flooring material, no residue tape, surgical booties, ProCyc primer, ProCyc ChromaKey green paint (provide enough for two primer, two finish coats and additional as noted for owner's future use) and any additional and necessary hardware and tools to complete the installation as detailed and intended. The contractor shall be responsible for installation of cyc, finishing, priming, painting and verification of paint with chroma keying video system (for evenness of paintwork).

18 Provide NW Displays & Exhibits Custom Largo style ABS black plastic storage case(s) with interior foam lining for the ProMatte (and other) specialty studio flooring. Provide (1) case for each specific type of flooring; each custom sized for the flooring it is intended to store. See details sheets for complete case requirements. Verify all sizing parameters with ProCyc prior to case fabrication to ensure fit. Store case(s) per owner's instructions. Provide an eye bolt and bungee cord system for each case so that it can be stored in a vertical orientation. Verify all storage locations/orientations with owner.

19 Provide Werner fiberglass stockr's platform step ladders as indicated and for the owner's use for accessing the studio grid. Mark all ladders with block lettering for the owner's facility in two locations (identifying marks/nomenclature TBD by owner). Store all ladders per the owner's instructions (preferably near the stage). Provide wall hooks for ladder storage and install in locations as determined by owner.

REQUIRED COORDINATION:

20 Coordinate the installation of the studio/photo lab rigging and other related system components with related trades and any fireproofing material being applied to the roof steel and with the actual wall construction. This may require certain rigging equipment to be pre-installed to overhead structural steel prior to fireproofing application and wrapping individual components tightly and completely with multiple layers of Saran-Wrap in order to prevent the fireproofing material from getting inside sheaves, bearings, etc. This will require the preinstallation of the wood internal wall blocking and exact detailed layout documentation for grid installation after walls have been completed. The installing contractor shall be prohibited from simply scraping fireproofing material off structural beams in order to mount rigging system components without express written permission from all applicable parties, fire marshal, etc. Coordination of system installation as it regards the fireproofing of structural rigging beams shall be the sole responsibility of the installing contractor and may require additional and multiple trips to the jobsite not normally associated with a rigging system installation. See A & S series drawings for fireproofing intents and other applicable notes and requirements.

21 The rigging installer shall be responsible for the dressing of all cables as they relate to the stage rigging system and its related components. Coordinate the final dress of all cables with all related trades and the natural twist of the furnished and installed cable(s) to ensure that each cable dresses neatly and properly. All sets with swagged cable shall be dressed so that no part of any set or related items and hardware catch, snag or otherwise become caught on or interfere with any other rigging set, adjacent devices, walls, misc. conduits, HVAC ducting or supports or any other items. Cables must swag from grid iron or other related junction boxes down to battens in a similar manner to that which has been graphically depicted on the detail drawings. The intent is for the cable (when set is at its lowest stage location or in trim height) to begin to rise from the end of the batten up towards the related junction box without going below the batten (the batten should be the lowest elevation that the SO cable ever reaches). All swagged cabling must be strain relieved as indicated on the detail drawings at both the batten end and at the grid iron junction box. Cable dress requirements includes, but is not limited to, all moving electric SO power cabling (low and high voltage), flexible DMX or Network wiring, hanging microphone cables, control wiring, speaker wiring, projection screen power and low-voltage control cabling, AFC system cabling, etc. No SO cables shall be allowed to drag/droop on the floor. Cable lengths and swag is critical and shall be coordinated with all related parties/contractors at regular job meetings to ensure an acceptable installation. No swagged cables shall be allowed to be visible within the proscenium opening. All swagged cables shall dress to the end of their related batten and off stage.

22 **MISCELLANEOUS:**

Provide all scaffolding, lift platforms, chain motors, chain falls, block and tackle or other methods required to install all system components and hardware and as needed to safely complete the work outlined on these drawings and in the written specifications. Follow all OSHA procedures and recommendations as they pertain to this work and provide OSHA safety devices as required for all personnel.

Protect floors, wall surfaces and related areas, all adjacent and nearby items, etc. during work.

Refer to the written specifications & detail drawings for additional scope of work as it regards labeling. Labeling requirements outlined in the written specifications are extensive and detailed.

In any locations where the contractor has performed work and future access to inspect and/or maintain that work is unlikely or impossible due to limited access, etc., the contractor must provide a full set of date/time stamped digital photos that prove the extent and quality of his work.

Field verify and document all existing structural steel locations & dimensions, all HVAC & MEP devices and the exact steel layout over the house/stage prior to the creation of submittal shop drawings and installing any rigging system components. Detail on precisely dimensioned shop drawings all field verified devices, equipment and other misc. elements as it relates to the new rigging systems equipment, intended layouts, proper clearances, etc. This should include documentation of any field vs. drawing discrepancies, any custom parts needed and all misc. metal necessary to install system as designed and/or any required digressions from the design document intents based upon these field verified dimensions. The intent is to accurately measure and document all equipment, locations, elevations, structural elements, etc. prior to submission of shop drawings and system installation. The contractor shall be solely responsible for all additional costs associated with preparing and submitting additional stamped shop drawing sets based upon unverified field discrepancies, faulty field information or post-submission discovered site conditions that preclude the installation intents.

Field verify, prior to the creation of submittal shop drawings and installing any rigging system components, that the existing structural steel is plumb, level and that there is no twisting or bending of any of the structural rigging beams or other signs of a potential structural issue (for all steel being used to attach designed rigging devices to - house or stage). Any discovered issues or problems with the existing structural steel shall be documented with digital photos, verified with detailed and precise field measurements and marked on a simple diagram drawing. This information shall then be communicated to the owner, architect, construction manager, consultant and project structural engineer in writing at the contractor's earliest convenience (early during site demolition and/or building erection/rough-in phases) prior to shop drawing creation and to any rigging system installation work being performed on the site in order to obtain further instructions on how to proceed. The contractor shall not be responsible for existing damage to structural steel or for additional items needed in order to remedy any structural related issues except at additional cost to the owner beyond the original scope of work.

MODEL NUMBERS:

Manufacturer model numbers for products are indicated on drawings to provide a full understanding of the system functional intent. See written specifications and the project manual for additional information and requirements for substitutions and procedures.

23 Provide all misc. Green Room studio and Photo Lab accessories as indicated.

24 Provide ETC "centering" & SSRC "stiffener" strap style brackets (if not provided by others) in types and quantities as indicated on TR series drawings and/or as required for system installation. Provide customized brackets as required. Provide stiffener brackets for all locations where connector strips are not present and at projection screen suspension assembly locations as indicated (do not provide "empty" connector strip brackets in locations where connector strips do not occur). All pipe-over-pipe stage electrics or projection screen sets shall be mounted directly from lift lines via Nicopress closure & thimble to load rated turnbuckle to full brackets (effectively transferring bottom pipe/pipe-over-pipe stage electric/projection screen ladder system loads directly to lift lines). Provide manufacturer brackets for all term box locations where required. Where standard manufacturer brackets will not work, provide custom SSRC brackets to match required brackets with additional holes, etc. as needed. No contractor manufactured, non load-rated brackets shall be allowed.

25 Provide all internal wall blocking as required per SSRC/Unistrut wall flange location. Coordinate with wall construction and related trades. Wall wall blocking shall be either a solid hardwood block or a built up assembly of Baltic Birch style or equal plywood. Built up plywood blocking shall be glued together with TiteBond III or equal glue for all layers and trimmed to fit for final size. All blocking must be the full width/depth of the associated stud cavity and be lagged into place as indicated. See details for more info on required blocking sizing. VIF for exact cavity sizes on a per location basis prior to fabricating blocking (mark each piece of blocking and stud cavity with corresponding legend system). Locate all blocking as required for intended wall flanges and prepare detailed field notes regarding exact blocking locations relative to a known fixed point of reference in each space (also document blocking installation locations with digital photos). All blocking shall be fabricated from kiln dried materials. Take extreme care and caution when mounting SSRC/Unistrut wall flanges to blocking through gyp wall finishes so as not to deform/crush wall finishes or so that these finished surfaces are not affected visually or structurally during installation. Provide all blocking and install on the wall erector's schedule. Provide all hardware, measurements, exact blocking, etc. as is required. Provide all blocking in locations as required. Provide all blocking and install on the wall erector's schedule.

CTE TS502

CONSTRUCTION DOCUMENTS

ELECTRICAL SCOPE OF WORK (RELATED TO THE AV SYSTEMS):

All Work Shall Conform To The Standards Of Division 26 Specifications And Spec Section 19 1000:

BOXES, CONDUIT & WIRE:

The Contractor shall provide (provide means to furnish and install) all conduit, duplex or quad outlets and related faceplates, multiple device boxes, miscellaneous hardware and all installation labor to provide complete conduit layouts and control, line and load circuits/runs as indicated. The Contractor shall carefully consult each drawing in order to obtain exact delineation of his responsibilities as it pertains to provision of equipment, installation of equipment for others, assembly and wiring of equipment furnished by others and other necessary installation labor as noted in detail on these drawings and in the written specifications. All devices shown on the drawings are indicated in approximate locations. The Contractor shall coordinate the exact locations of all devices shown with the owner, existing obstructions and any other A/V related items that they may need to be located near or in conjunction with. The Contractor shall determine all final locations prior to routing or installing any conduit or backboxes.

The Contractor shall provide no wiring run in conduit unless specifically noted on the plan drawings as otherwise. No conduit shall be allowed to be loaded beyond 50% fill.

The Contractor shall terminate all conduits into racks, junction boxes, pull-boxes or other appropriate devices as indicated. No cut off conduits with end bushings and wiring dangling out the end shall be allowed.

The Contractor shall refer to all notes, drawing arrow notes and written specifications for work clarification and additional scope of work as it regards assembly, installation labor, labeling requirements and/or coordination. Labeling requirements outlined in the written specifications are extensive and detailed.

Labeling All conduits shall be clearly labeled on each end as to their origin and destination in a simple, logical manner. All junction boxes, switch boxes and backboxes indicated on drawings shall be labeled with the nomenclature indicated on the drawings. All outlet boxes shall be labeled with the corresponding panel and circuit designations they are fed from. Permanent black marker on conduit or junction box face is acceptable on conduits, junction boxes, etc. that will not be painted. If any related devices are to be painted, then the Contractor shall provide the following: Conduits shall be labeled with 3M Durable ID Labels with permanent adhesive (applied after painting). Junction boxes, etc. shall be labeled with 3M Durable ID Labels with permanent adhesive (except stage devices, which shall be labeled with Lamacoid style engraved labels, permanently adhered to the device). All junction boxes, outlets, etc. shall also be labeled by the Contractor on the back of each cover plate and also with a durable tag inside each box stating the same information. All labeling shall be done with neat, simple, easily readable, block style lettering/numbering (labeling may be done by hand, if the labeler's handwriting is neat and legible. If not, then all labeling must be done by laser printing onto indicate labels). All labeling shall reference the device's designation, conduit originations/destinations, etc. & not be a coded, indexed or legend style referencing system. The Contractor shall provide printed documentation to all related contractors as to the source, destination, elbows/sweeps, pull box locations, approx. run distances and routing of related conduits throughout building as part of normal coordination on the project. Labelling shall be done in neat, easily readable, block style letters/numbers. Locate internal labels to prevent damage/smudging, etc.

The Contractor shall provide blank cover plates for any switch box or junction box that does not have a specific device plate indicated on the drawings symbols keys. All cover plates shall be provided in a color and style that matches other cover plates in the immediate vicinity of the indicated device or as determined by the owner. Cover plates shall be "form fitting" and shall not have sharp edges that protrude out past edges of backboxes.

All conduits are to be concealed unless specifically called out on drawings as exposed. Any visible conduits and boxes are to conform to general contract requirements and Division 16 for finish and installation requirements.

Back-to-back outlets in common walls shall not be permitted. All outlet boxes shall be separated by at least one stud bay/cavity.

Note - All circuits are required to have separate hot and neutral conductors. Provide ground wiring as required by applicable code. All circuits shall be calculated for full rated loads, constant duty non diversity unless otherwise specified. Size wire gauges and conduit sizing to allow for full load operation after taking into account all derating for distance, voltage drop and other conditions required by the most recent national electric code (NEC), the New York State building codes and local codes.

The Contractor shall provide continuous pull strings (for future use) in all conduits even after all indicated wire is pulled in.

Where conduit is indicated with no wire called out on the plan drawings, The Contractor shall provide the conduit wire based on requirements of the systems indicated on single line system diagrams The Contractor shall provide continuous pull strings in all empty conduits, tied off at both ends. Wire must be able to be pulled through the conduits without exceeding the pull spec of the wire to be pulled. Typical pulling tension for cables of this type is between 35 and 50 lbs. tension.

Wiring Standards - Plenum Rated Cable: Unless specifically noted on the drawings, all low voltage wiring is to be CL2/CL3 wiring. Where specific plenum conduits exist it has been noted to use a plenum rated cable. Where wiring runs occur in concealed spaces – walls, ceilings, etc. - and are not enclosed in conduit the Contractor must verify the space is not being used as a plenum path. Any areas encountered that are plenums must have plenum cable or the wiring must be contained in conduit rated for the plenum application. Field verify conditions prior to ordering or installing cabling.

In some areas wiring may be called out as CL3 not in conduit. In these areas the Contractor must provide adequate attachment and support to protect the cable from potential damage using the best routing. Wiring may not be left lying loose in any area unless fully protected (i.e. Inside a wall).

The Contractor shall radius all conduits where possible. Conduit runs are not to exceed 270 degrees of radius bend. Where elbows and pull boxes are unavoidable, locate these in easily accessible locations not requiring special equipment to reach. Any elbows used must be sweeps and must be accessible without the use of special equipment. If more than 270 degrees of bend is required, The Contractor shall provide accessible pull boxes.

The Contractor shall provide all power circuits indicated on TS drawings and associated conduit, backboxes, wire, termination and duplex outlets. Termination of these outlets will be to panel boards as indicated on E-series drawings. These outlets may also be indicated on E series drawings. Check TS and E drawings and verify there is no duplication of devices. Some outlets are to be installed in racks - coordinate with the contractor for exact locations within each rack.

The Contractor is responsible for fire stopping all penetrations in new and existing fire rated assemblies resulting from the work of his contract.

POWER SYSTEM DRAWING NOTES:

Each note indicates a typical location for the type of work to be performed or equipment to be provided. The contractor shall provide for all instances of typical work indicated. All drawing notes may not appear or be referenced on each drawing; however, all notes still apply to the work indicated within each note and shall be performed by the referenced contractor(s).

Failure by the contractor to adhere to any of the specific notes on these drawings shall result in the contractor repairing, replacing or reinstalling extensive system components, conduit, wire or related items at his own expense and at no additional cost to the owner in order to bring the installation up to the standards and intents set forth in these contract documents.

A. Branch circuits indicated are for the dedicated use of the specified system:No other connections may be made or branches added to these circuits. Each circuit must have a separate hot, neutral, and ground conductor. Conduit grounds are not acceptable for these circuits. All wire to be THHN Stranded with Gauge as required by NEC. All grounds to be #12 minimum THHN Stranded copper. Where ISO ground panels are provided the THHN ground wire will be utilized for ISO ground. Building ground to switch boxes on ISO ground circuits as required by NEC.

Neutrals and grounds may not be shared with any other circuits.

The branch circuits indicated are to be installed as indicated. The EC shall coordinate with the appropriate contractor where connections are to be made within racks and equipment furnished by others to provide well timed construction progress.

See E series drawings for panel designations and origination. Do not duplicate circuits.

All indicated circuits shall be individual, independent, home-run circuits to a panel/breaker box as indicated on the E series drawings (unless otherwise noted or indicated as being paralleled with another). Provide circuits in voltage, wattage, phase and amperage and land/terminate each circuit into a backbox or other device as indicated.

If a circuit designated does not appear on the E series panel schedules, the EC shall still be responsible for providing the circuit to a panel designated by the electrical engineer for the project. Typically this panel will be within 150 feet of the branch circuit location.

B. The contractor shall provide all backboxes in sizes as indicated. No multi-gang backboxes with raised, tile ring, extension ring or mud ring style reducers to obtain the specified faceplate gang size shall be acceptable in lieu of the indicated device backbox. Any multi-gang devices with these extension rings used shall be replaced and the specified backbox sizes provided by the contractor at no additional cost to the owner. The contractor shall install all backboxes flush, plumb and level.

C. The contractor shall provide all surface mounted outlet boxes as full-sized backboxes so that the cover/face plates do not protrude beyond the box edges. All outlet boxes to be Thomas & Betts AFS style boxes or equivalent size. Any boxes that are smaller than the cover/face plate will not be accepted. The intent is for faceplate to be the same size as the backbox in order to prevent sharp or protruding edges that could catch or snag clothing, etc. or cause injury.

D. The Contractor shall be responsible for providing an appropriate contact closure feed from the facility's fire alarm system including, but not limited to, wire, conduit, any existing system fire alarm device accessories and triggers needed, fire alarm manufacturer field service technician and related expenses, firestop material to infill firewall penetrations, misc. metal and hardware and all installation labor required to complete the installation and interfacing of this system to the sound system DSP. The contractor shall obtain fire alarm tie in wire type per fire alarm system manufacturer's recommendations and shall provide this wiring to the DSP unit and terminate as indicated. The Contractor shall be responsible for contacting and interfacing with the local fire marshall and other appropriate official personnel, if needed, in relation to the addition and the interfacing of the DSP contact with the fire alarm system.

E. Provide the fire alarm tie to the DSP unit as specified. The intent is for fire alarm triggers (as determined by the owner and applicable codes - i.e. auditorium and building wide triggers, etc.) to be routed from the corresponding contact closure(s) and controls in the main fire alarm system control panel to the DSP unit as needed in order to trigger the DSP to mute during all appropriate fire alarm activation events. Any additional assistance needed from the existing fire alarm service provider company in order to interface with their system shall be arranged in conjunction with the owner and paid for by the contractor.

All locations & clearances shown for the sound system & other related devices are specific & critical and may not be altered in the field without obtaining prior written permission from the consultant. Any new proposed locations or field obstructions must be communicated to the consultant in writing and clearly indicated on scaled plan drawings by the contractor . Contractor shall properly & completely seal all wall & floor conduit penetrations entering or exiting racks to ensure that airflow passes through racks as intended by manufacturers. Any racks, wiring, conduit and related devices that are installed in locations other than those indicated on the bid documents or approved in writing post bid will be removed and reinstalled in the correct locations in an as new manner by the contractor at no additional cost to the owner (unless obstructions are present which precludes the indicated locations, in which case the consultant shall choose the final locations and indicate this in writing prior to their installation).

GYMNASIUM SYMBOLS KEY

WC	Crestron MPC3-102-B	1 Gang	Flush Mounted At Std Switch Height
RJB	6x4x4 Screw Cover Style Box		Flush Mount Behind Custom SSRC Raceway
	Custom SSRC H/L-V Raceway. See TS Drawings For Length As Required		Surface Mounted At As Indicated

Note: All References To "Standard Electrical Outlet Height" And "Standard Switch Height" Are Intended For The Installing Contractor To Mount These Devices To Match These Mounting Heights With Any Existing Or Adjacent Devices On Site.

All Device Backboxes Shall Be Flush Mounted Unless Otherwise Noted On The Drawings. If Building Construction Makes Flush Mounting Impossible Or Impractical, Then The EC Shall Obtain Written Permission & Instructions From The Architect (Including Specific Device Types, Conduit/Wiremold Types, Required Painting, Sizes, Profiles, Etc.) Prior To Installing Any Surface Mounted Devices (This Is Excepting Devices Such As GJB's, JB's, Pull Boxes, Etc. Mounted To Stage Or Other Overhead Steel).

Where Boxes Are Indicated As Surface Mounted, Wiremold Style Boxes Shall Be Utilized, Painted To Match Mounting Surface Or As Directed By Architect.

All Backboxes Shall Be 3.5" Deep With Internal Square Edges. No Backboxes With Rounded Or Radiused Corners Shall Be Acceptable. Where Mounting Brackets Are Required, The EC Shall Provide Appropriate Brackets As Needed To Mount To Studs, Wall, Etc. No Contractor Fabricated Mounting Systems Shall Be Acceptable. The EC Shall Read All Drawing Notes For More Information On Backbox Styles, Types, Etc. Required.

The Contractor Shall Provide The Owner With Actual Sized Paper Template Copies Of Station Faceplates That Are Part Of This Project, Which The Owner Shall Then Tape On The Walls In The Final Desired Locations For All Architectural Control Stations. The EC Shall Not Install Any Related Conduit Or Backboxes Until Final Locations Have Been Determined By The Owner. No Stations Shall Be Allowed To Exist In Areas Or Locations Where They Conflict With Other Devices, Are Buried Behind Other Devices, Block Access To Life-Safety Devices, Are Tucked Into Inaccessible Corners Or Are Otherwise In Impractical, Out-Of-The-Way Locations.

Standard Switch Height Typically Is 48" To The Top Of Box.
Standard Outlet Height Is Typically 20" To Top Of Box.

Where Existing Switches Or Outlets Are Located In The Vicinity Of New And Are Mounted At Different Heights, Verify Design Height With The Owner/Owner's Representative Prior To Rough In.

Where An Existing Back Box And Conduit Patch Can Be Reused, Verify With The Owner/Owner's Representative Before Reusing The Location.

NOTE:

It is each contractor's responsibility to receive all device shipments, equipment, deliveries, etc. for their own equipment on/at the job site personally. This will require each contractor to carefully coordinate drop-ship delivery dates with the manufacturers and trucking companies in order to have adequate personnel on site to inspect, unload and store all shipments. Each contractor shall be responsible to arrange for storage of all received materials on site until the appropriate time when he shall either turn them over to installing contractor or install them himself.

If the contractor chooses to allow a third party to receive shipments on his behalf, then that contractor bears sole responsibility for any missing and/or damaged parts and devices that may need to be reordered or rush freight required to maintain schedule, all at no additional cost to the owner.

Any equipment that is furnished by the receiving contractor but installed by others shall be turned over to the installing contractor at such time as it fits into their production schedule and the project's overall construction schedule.

GENERAL NOTES:

Do not scale plans.

Field verify all dimensions before ordering material or performing any work. Location of all devices must be coordinated with existing and/or new architectural, mechanical, electrical and structural elements. Where conflicts occur contact the architect, construction manager and consultant in writing for clarification before performing any work.

Where work is critically dimensioned to work provided by others it is the sole responsibility of the contractor to verify the intended location of other elements with other contractors by reviewing their shop drawings.

Coordinate all work for symmetrical installation with relation to height and level with architectural elements, switches, outlets, and other controls.

This drawing represents the configuration of a system. It does not in any way constitute instructions for installation except with regards to configuration. The sole responsibility for field verification of dimensions, installation/fabrication methods, code conformance, safety issues, and the quality and performance of their work shall be that of the installing contractor.

This drawing is to be interpreted in conjunction with other drawings in the construction set as well as written specifications for this project. The contents of the drawing do not in any way negate the written specifications, nor do the written specifications in any way negate the contents of the drawings.

If there are inconsistencies between written specifications and drawings or between any drawing and other drawings in the construction document set it is the responsibility of the contractor to obtain clarification before bidding this project. If no clarification has been obtained prior to bid the contractor will abide by the decision of the architect and consultant at no additional cost to the owner even if work has to be redone.

Obtain shop drawings from related trades to verify the intended configurations and scheduling of their work. The contractor is responsible for coordinating their work with other related trades in a manner that avoids conflicts of work and scheduling.
